System Overview

VISION-Financials is an Oracle/PeopleSoft enterprise financial management system utilizing the following modules: General Ledger, Accounts Payable, Purchasing, Accounts Receivable, Billing, Asset Management, Inventory, and Subrecipient Grant Tracking (VT custom module). The system is managed by the Dept of Finance & Management in conjunction with the Agency of Digital Services PeopleSoft Technical Unit.

Introduction to Commitment Control in VISION

Commitment Control is where Appropriations reside in VISION. The budget ledgers store the state's appropriations, organizational budgets, and expenditure transactions. The purpose of a Budget Ledger is to control appropriation authority and to track budgetary expenditures.

Budgetary Control

Budgetary control ensures that commitments and expenditures do not exceed total budgets. VISION provides budgetary control on a transaction-by-transaction basis. The budget checking process looks at each account's budgetary control type to determine whether or not to budget check the transaction. Only expenditures are budget checked. The budget check process reviews each transaction and determines if there is sufficient spending authority in the budget to cover the transaction or not.

Budget Check Errors

This table of budget check errors may be encountered in any module where budget checking is processed.

Description	Explanation
Exceeds Budget Tolerance	There is not enough spending authority in the budget to post the transaction.
No Budget Exists	There is no organization budget OR appropriation and organization budget set up for the fund and DeptID combination used on the transaction.
Budget is Closed	The transaction is trying to post to a closed prior year budget.
Budget Date is Out of Bounds	The accounting date on the transaction is either in a future period or prior fiscal year that is closed.
Spending Authority Over Budget	A credit transaction to an expense account will cause the spending authority to exceed the original budgeted amount; i.e. there are not enough expenditures in the current year to offset the credit.
Budget Date is Outside Specified Dates	The transaction is trying to post to a budget that is no longer available to be posted to.

The Coding Structure for Onetime and Capital Appropriation DeptID's

Special Coded Appropriation DEPTID's

Financial Operations specially codes some DeptID's to make them easily identifiable as very specific types of appropriations.

One-time Appropriation DEPTID's:

One-time appropriations are amounts that are appropriated in an act in addition to the "regular" appropriations. These are specially coded so that the one-time appropriations are easily identifiable.

Coding – the first 4 digits are the GL BU minus the lead zero, the next 2 digits are 89, the next 2 digits are the year, the last 2 digits – start with 01 then 02, etc. for each additional one-time appropriation for the FY.

Example: BU 02200 might have a one-time appropriation in FY 2019 Budget adjustment act. If they already have 2 FY 2019 one-time approps in previous acts, the DeptID would be:

2200891903: 2200 – from 02200; 89 – Designates one-time; 19 – FY 2019; 03 – Third one-time approp of the year

Capital Construction Appropriation DEPTID'S for BGS (BU 01180) only:

BGS requested that their DeptID's be coded in a way that easily identifies what Act and sec the appropriation is from, since they have so many capital construction appropriations.

Coding – the first 2 digits are the fiscal year that the appropriation is available, the next 3 digits are the act #, the next digit is 0, the next 2 digits are the section # in the act, the next digit is 1,2,3 to represent subsections a, b, c etc. and the last digit is 1,2,3 to represent additional subsections or 0 if there is no additional subsection.

Example: Act 84 of 2019 sec 5(a)(1) and sec 5(a)(2) has amounts appropriated to BGS. The DeptID's would be:

1908400511 and 1908400512: 19 – FY 2019; 084 – Act 84; 0 – 0 place holder; 05 – section 5; 1 – subsection a and 1 and 2 – additional subsection (1) and (2).

Capital Construction Appropriations for all departments except BGS:

Capital Construction Act DeptID's are coded in a way to easily identify them as one-time amounts appropriated in the Capital Construction Act.

Coding - the first 4 digits are the GL BU minus the lead zero, the next 2 digits are 99, the next 2 digits are the fiscal year that the appropriation is available, the last 2 digits – start with 01 then 02, etc. with each additional capital construction appropriation for the FY (not necessarily sequential in the act).

Example: The department of Fish and Wildlife (06120) has 2 FY 2019 appropriations in the Capital Construction Act passed in FY 2019. The DeptID's would be:

6120991901 and 6120991902: 6120 – from 06120; 99 – Designates capital construction appropriation; 19 – FY 2019; 01 and 02 – 2 appropriations available in the capital construction act for Fish and Wildlife.

Budget Close Process in VISION and Appropriation Carry Forwards

The budget close process is a system process. Rules are set up in VISION by Financial Operations to identify what funds will carry over and what funds will revert, based on the memo from the Secretary of Administration that authorizes what funds will carry forward each year and based on other carry forward language in Acts.

When the system process is run, the system automatically establishes spending authority in the next fiscal year for all remaining spending authority at 6/30 in funds that have been designated to be carried forward. This means that the carry forward spending authority is available to the departments in their appropriations in VISION as soon as the budget close is run in mid-July. Departments are not authorized to spend these funds until they have an approved carry forward plan with Budget and Management. Once they have an approved plan, they can do an organization budget journal to allocate the spending authority to their organization budget and then it is available to spend.

When budget close is run in mid-July, the process also reverts all appropriations in funds that were not authorized to carry forward by the Secretary of Administration or other Act language.

Current Carry Forward Funds:

10000 – General fund (authorized by Sec of Admin)

20105 – Transportation fund (authorized by Sec of Admin)

20191 – Transportation Infrastructure Bond Fund (authorized by Sec of Admin)

20205 – Education fund (authorized by Sec of Admin)

21933 – Agriculture Water Quality Fund

21932 – Clean Water Fund

3XXXX – Bond funds (authorized by other language)

****Bond funds do not require a carry forward plan before they can be spent****

Spending authority for encumbrances:

If the encumbrance is in a fund designated to carry forward, the spending authority for the rolled PO is included in the carry forward spending authority created by the budget close process. This portion of the spending authority does not have to have a carry forward plan before it can be spent.

If the encumbrance is in a fund that does not carry forward, then the spending authority is established by Financial Operations with budget journals starting with “CF”.

Adding an Organization Budget Journal (No Approval Required)

Possible situations when this function is used: For each appropriation that a department has, it must be allocated to one or more organizational budgets in order to be expended in VISION. Organizational budgets are generally created by departments at the beginning of each new fiscal year and when new appropriations are created. If a department allocates an appropriation to more than one organizational budget, then adjustments to the budgets might need to be made throughout the year to reallocate.

Adjustments to appropriations also occur during the year that might need to be allocated to an existing organization budget. Adjustments can be decreases or increases to the organization budget.

Updating and Resubmitting a Budget Journal

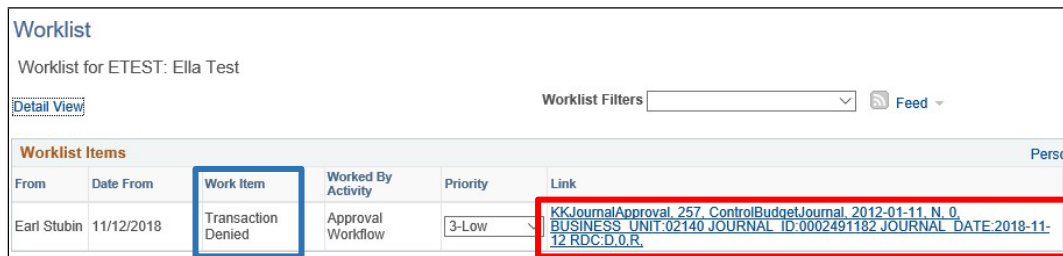

Possible situations when this function is used: Some departments require budget journals to go through an approval process in VISION.

The approver(s) for each department may approve or deny the budget journal. If the budget journal is denied, it can still be rectified and resubmitted. Or it can be deleted. In this case, the user who submitted the journal will read the denial comments, make the requested changes and resubmit the journal.

Budget Journal Errors

Possible situations when this function is used: A department has entered a budget journal entry to establish or adjust an organizational budget. After the post process has been run, the Budget Header status is “errors” or “edit errors”. The error needs to be fixed so that the journal can post, or the journal needs to be deleted.

WorkCenter navigation: General Ledger WorkCenter > Links pagelet > Budget Journals > Enter Budget Journals

Navigator Menu navigation: Commitment Control > Budget Journals > Enter Budget Journals

The Enter Budget Journals page displays, click on the [Find an Existing Value](#) button:

The screenshot shows the 'Enter Budget Journals' page. At the top, there's a 'Find an Existing Value' section with a '+ Add a New Value' button. Below this is a 'Search Criteria' section with the instruction: 'Enter any information you have and click Search. Leave fields blank for a list of all values.' There are two dropdown menus for 'Recent Searches' and 'Saved Searches'. The search criteria fields include: '*Business Unit' (dropdown), 'Journal ID' (dropdown), 'Journal Date' (dropdown), 'UnPost Sequence' (dropdown), 'Budget Header Status' (dropdown), 'Description' (dropdown), and 'User ID' (dropdown). The 'Budget Header Status' dropdown is currently set to 'Error'. There is a 'Show fewer options' link and a 'Case Sensitive' checkbox. At the bottom, there are 'Search' and 'Clear' buttons. The 'Search' button is highlighted with a red box.

1. **Business Unit** - This is a required search field, leave as default or enter Business Unit from the journal in error
2. **Budget Header Status** - Error or Errors
3. Enter other search criteria to narrow your search
4. Click [Search](#)

If there is only one row of data that matches your criteria, the [Budget Header](#) page of the budget journal will automatically load when you click search.

NOTE: If there is no data matching your criteria, a message of “No matching values were found.” will be displayed at the bottom of the screen. If there is more than one row of data matching your criteria, the first 300 results can be displayed, and up to 100 rows of data matching the criteria entered loads at the bottom of the page. Use the left hand scroll bar to view all rows displayed. If there are more than 100 rows that matched the criteria entered a View All hyperlink will display above the data. Click this link to view all results up to the 300 allowed. Click on any hyperlink in the row of data you are looking for.

The **Budget Header** page displays:

The screenshot shows the 'Budget Header' page with the 'Budget Errors' tab selected. The page displays the following information:

- Unit: 01110, Journal ID: 0002491190, Date: 11/27/2018
- Budget Header Status: **Error**
- Header Errors section with a table containing one row: 'Budget exceptions have been logged. Review the Budget Journal Exceptions page for more detail.'
- Line Errors section with an empty table.
- Buttons: Save, Return to Search, Notify, Refresh, Add, Update/Display.

5. Click the **Budget Errors** tab
6. Click the **Error** link

The **Budget Journal Exceptions** page opens in a new window:

The screenshot shows the 'Budget Journal Exceptions' page with the 'Budget Line Exceptions' tab selected. The page displays the following information:

- Business Unit: 01110, Journal ID: 0002491190, Journal Date: 11/27/2018
- *Exception Type: Error, Maximum Rows: 100
- Buttons: Search, Advanced Budget Criteria
- Budgets with Exceptions section with a table containing two rows: 'Parent Budget does not Exist'.
- Buttons: Save, Return to Search, Notify.

The errors are listed in the **Budgets with Exceptions** section. The message here indicates that the parent budget does not exist.

Review the budget line information and make sure there are no data entry errors. Inquire on your appropriation and all its associated organization budgets to verify that the appropriation has been allocated to other organization budgets correctly.

Adjustments can be made to the budget journal lines if needed. If the journal is adjusted, the journal must be re-saved, and the posting process initiated to change the **Budget Header Status** to **Posted**.

If it is found that the journal should not have been entered, then the journal must be deleted.

Note: Additional errors may be found. If an error is returned and it is not clear what the problem is, contact Financial Operations for assistance.

The **Budget Amt** is how much can be spent in that particular fund/DeptID combination. The budget amount has a credit balance.

The **Encumb Amt** is the encumbered amount that has reduced your spending authority. Encumbrances are the result of a purchase order that has been created and budget checked. When a purchase order voucher is created the encumbered amount is reduced by the amount of the voucher and the expended amount increases by the amount of the voucher.

The **Expended Amt** is the amount that has been expended against the overall budget amount thru a voucher or a journal entry.

The **Available Amt** is the amount of spending authority that is left for the fiscal year. It is calculated by taking the Budget Amount minus the Encumbered Amount and the Expended Amount.

The **Pre-Enc Amt** is the pre-encumbrance amount. Pre-encumbrances are the result of a requisition being entered and budget checked. Pre-encumbrances do not reduce the available amount on the appropriation status query. When a requisition becomes a purchase order, the available amount is reduced.

How do I find the detail expenditures for the expense amounts on the appropriation status query?

Run the **Budget Transaction Detail** report.
