Agency of Administration

LETTER OF TRANSMITTAL

To the Honorable Peter Shumlin, Governor,
The Honorable Phil Scott, Lieutenant Governor,
Chairs of House Committees on Appropriations, Institutions and Ways and Means,
Senate Committees on Appropriations, Finance and Institutions, and
The Citizens of the State of Vermont:

I am pleased to present the Comprehensive Annual Financial Report (CAFR) of the State of Vermont for the fiscal year ended June 30, 2013. The Department of Finance and Management prepared this report as required by Title 32, Vermont Statutes Annotated, Section 182(a)(8). By issuing this report by December 31, 2013, the Department has met the State statutorily required issuance date. The Department prepared these financial statements and assumes responsibility for the completeness and reliability of the information presented in this report. To provide a reasonable basis for making these representations, the Department has established a comprehensive internal control framework that is designed to protect the State's assets from loss, theft, or misuse and to compile sufficient reliable information for the presentation of this report in accordance with generally accepted accounting principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB). Because the cost of internal controls should not outweigh their benefits, Vermont's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements are free of material misstatement. I believe that the accompanying financial statements are accurate and fairly stated in all material respects, and presented in a manner designed to fairly report the State of Vermont's financial position, results of operations and changes in net position/fund balances.

I would like to direct your attention toward two important items contained in this CAFR. The first item is the Management and Discussion Analysis (MD&A) that follows the Independent Auditors' Report. This analysis is designed to give you, the reader, an overview of the State's financial position, described in understandable terms, in order to help you better understand the results of operations of your state government. Secondly, I would like to direct your attention to the Basic Financial Statements (BFS) which follow the MD&A. The BFS were prepared in conformity with GAAP as prescribed by the GASB. The BFS contain government-wide statements that present the State's financial activities in a manner similar to that of a private corporation; fund statements that report governmental, proprietary, fiduciary fund financial activity; component unit financial activity; and note disclosures that explain and enhance the basic financial statements.

In addition to the MD&A and BFS, this CAFR includes a Required Supplementary Information (RSI) section, an Other Supplementary Information section, and a Statistical section. The RSI section contains a Schedule of Funding Progress for the State's defined benefit pension and other postemployment benefits plans, and Budget to Actual comparison schedules for the State's major governmental funds with Notes reconciling budgetary fund balance to the governmental funds GAAP fund balance. The Other Supplementary Information section

contains combining fund financial statements for the State's non-major Governmental, Proprietary, and Fiduciary Funds, and for the State's non-major component units. The Statistical section presents data relating to financial trends, revenue and debt capacity, and demographic and operating information about the State of Vermont. It should be noted that the information contained in the MD&A, RSI and Statistical sections is unaudited.

This CAFR includes the funds and entities for which the State is accountable based on GASB's criteria for defining the financial reporting entity. The criteria include fiscal dependence, financial accountability and legal standing. Please refer to Note I, for more information regarding the reporting entity and the component units.

State Profile

Vermont, known as the Green Mountain State, was first settled by the French in 1666, then by the English in 1690, and joined the Union as the fourteenth State in 1791. Rural in character, the state measures 9,249 square miles of land area, and, as of July 1, 2012, had an estimated population of 626,011. The State capital is Montpelier, and the largest city is Burlington. As of calendar year 2011, 93.7% of Vermonters aged 25 or older are at least high school graduates while 37.2% have at least a college bachelor's degree .

The State Constitution provides for three traditional branches of Government – the Legislative, the Executive, and the Judicial. The Legislative branch is comprised of the House of Representatives (150 members) and the Senate (30 members); all are elected for two-year terms. The Executive branch includes six elected officers – the Governor, Lieutenant Governor, Treasurer, Secretary of State, Auditor of Accounts, and the Attorney General – all elected for two year terms, without term limitations. The Governor is responsible for the faithful execution of all laws and the management of the departments and agencies of the Executive Branch – including the agencies of Administration; Transportation; Natural Resources; Commerce and Community Development; Agriculture, Food and Markets; and Human Services, as well as other departments – through which the functions of the State government are carried out. The Judicial branch of the state is made up of a Supreme and Superior Courts, and the Judicial Bureau. The judges are appointed by the Governor with the advice and consent of the Senate, and serve six-year terms.

Budget Adoption and Legal Compliance/Budgetary Results

The Required Supplementary Information section includes Budget to Actual comparison schedules for the General Fund and the five major special revenue funds. The State's budgeting process is described in the Notes to the Budget to Actual comparison schedules. These schedules present each fund's original budget, final budget, actual expenditures incurred on a budgetary basis, and the variance between the final budget and actual expenditures incurred. As the adopted budget provides legal control over spending, expenditures cannot exceed amounts appropriated under Vermont law. Budgetary control is exercised by fund within appropriation.

The General Fund

The General Fund accounts for all revenues and other receipts that are not required by law to be accounted for or deposited in other funds as well as the expenditures associated with these revenues. In fiscal year 2013, General Fund tax revenues accounted for 97.3% of total General Fund revenues. The three principal tax revenue contributors – the personal income tax, the General Fund's portion of the sales and use tax, and the meals and room tax – accounted for 81.2% of General Fund total tax revenues

or approximately 79.0% of total General Fund revenues. General Fund expenditures used 61.8% of the total revenues, and these expenditures occurred in the following major governmental functional categories: General Government, Protection to Persons and Property, Human Services, Labor, General Education, Natural Resources, and Commerce and Community Development. The majority of the remainder of the resources provided from the 2013 General Fund revenues were transferred out to other funds and used for various purposes. Please see Note IV.D. for a summary of these transfers.

Economic Condition

The consensus revenue forecast for fiscal year 2013 was revised twice during the fiscal year as the economic and revenue environment began to stabilize. During fiscal year 2013, the Vermont economy continued a slow and sometimes uneven recovery with the modest upgrade in the consensus revenue forecast in July, 2012, offset partially by a small downgrade in January for the balance of fiscal year 2013, and actual year end revenue collections in the General Fund exceeded the final revised consensus forecast target.

The consensus economic forecast for the Vermont economy reflects the difficulties experienced nationwide due to the sequestration, the on-going recession in Europe, and a slow-down in the developing world. However, there is improvement in consumer sentiment and a firming of the housing market. The near-term outlook is similar to the outlook a year ago and six months ago, although favorable circumstances already seem to be developing, rather than being based on expectations. The most recent forecast calls for minor forecast upgrades for the General Fund and a more significant upgrade for the Transportation Fund, with a minor downgrade in the forecast for the Education Fund. The State's unemployment rate is expected to remain well below both the U.S. and New England regional averages. The most recent consensus economic forecast has the State job growth to continue to improve into 2014 and 2015, although at an unsteady pace.

Long-term Financial Planning

As part of the State's long term financial planning, the Legislature created a Capital Debt Affordability Advisory Committee who is required to present to the Governor and General Assembly, no later than September 30 of each year, a recommendation as to the maximum amount of net tax-supported debt that the State may prudently issue for the ensuing fiscal year and which complies with the State's triple-A debt rating guidelines. The recommendation is calculated and presented in accordance with certain debt affordability guidelines and other matters that may be relevant to the proposed debt to be authorized. The current recommendation contains a recommendation for maximum debt for fiscal years 2014 and 2015. This report may be viewed on the State Treasurer's website under Debt Management – Capital Debt Affordability Advisory Committee.

In the 2013 legislative session, the 2013 Capital Act represents the first year of the biennium. The amount authorized in the bill is \$159.9 million for the biennium, with no more than \$90.4 million appropriated in the first year, and the remainder in the second year. Please see Note G. 1. for addition information of the State's bonded debt.

Independent Audit of These Financial Statements

KPMG LLP, an independent certified public accounting firm, performed an independent audit of the

State's basic financial statements for the fiscal year ended June 30, 2013, with the assistance of the State Auditor's Office. The auditors have issued an unqualified opinion, the most favorable outcome of the audit process. The audit described in the auditors' report is not intended to meet all requirements of the Federal Single Audit Act of 1996. Rather, the Single Audit Report for the State is issued under separate cover.

Awards and Acknowledgements

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Vermont for its comprehensive annual financial report for the fiscal year ended June 30, 2012. This was the fifth year that Vermont has achieved this prestigious award. In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current comprehensive annual financial report continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

The preparation of this report involved the dedicated work of staff in the Department of Finance and Management, the Office of the State Treasurer, the Office of the Auditor of Accounts, and the support of all State agencies, departments, component units, the Legislature, and the Judiciary. We welcome inquiries concerning this report and the finances of the State of Vermont.

Sincerely,

James B. Reardon, CPA
Commissioner

Independent Auditors' Report

The Speaker of the House of Representatives,
President Pro-Tempore of the Senate
And the Governor of the State of Vermont:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Vermont (the State), as of and for the year ended June 30, 2013, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with U.S. generally accepted accounting principles; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements of certain discretely presented component units identified in note IA. We also did not audit the financial statements of the Vermont Lottery Commission, the Special Environmental Revolving Fund, the Vermont Energy Efficiency Utility Fund, the Vermont Universal Service Fund, or the Tri-State Lotto Commission. The discretely presented component units identified in note IA represent 70% of the total assets and 40% of the total revenues of the aggregate discretely presented component units. The Vermont Lottery Commission represents 100% of the total assets and total revenues of the Vermont Lottery Commission Fund and 5% of the total assets and 31% of the total revenues of the business-type activities. The Special Environmental Revolving Fund represents 67% of the total assets and 5% of the total revenues of the Federal Revenue Fund. The Vermont Energy Efficiency Utility Fund and the Vermont Universal Service Fund collectively represent 7% of the total assets and 10% of the total revenues of the Special Fund and collectively represent 9% of the total assets and 2% of the total revenues of the governmental activities. The Tri-State Lotto Commission represents 100% of the information disclosed in note VE. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinions, insofar as they relate to the amounts included for the discretely presented component units, the Vermont Lottery Commission, the Special Environmental Revolving Fund, the Vermont Energy Efficiency Utility Fund, the Vermont Universal Service Fund, and the Tri-State Lotto Commission are based solely on the reports of the other auditors. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General

The Speaker of the House of Representatives,
President Pro-Tempore of the Senate
And the Governor of the State of Vermont

of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Vermont as of June 30, 2013, and the respective changes in financial position, and where applicable, cash flows thereof for the year then ended in accordance with U.S. generally accepted accounting principles.

Emphasis of Matter

As disclosed in note 1 to the financial statements, the State adopted the provisions of Governmental Accounting Standards Board Statements No. 61, *The Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34*; No. 62, *Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements*; No. 63, *Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position*; and No. 65, *Items Previously Reported as Assets and Liabilities*; effective July 1, 2012.

Other Matters

Required Supplementary Information

U.S. generally accepted accounting principles require that the management's discussion and analysis on pages 17-30, the schedules of funding progress and employer contributions for the defined pension plans and other postemployment benefit plans on pages 146-148, and the budgetary comparison information on pages 149-163 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate

The Speaker of the House of Representatives,
President Pro-Tempore of the Senate
And the Governor of the State of Vermont

operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Supplementary and Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The Introduction, Other Supplementary Information-Combining and Individual Fund Statements and Schedules and the Statistical Section listed in the accompanying table of contents are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The Other Supplementary Information-Combining and Individual Fund Statements and Schedules is the responsibility of management and was derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, based on our audit and the reports of other auditors, the Other Supplementary Information-Combining and Individual Fund Statements and Schedules is fairly stated in all material respects in relation to the basic financial statements as a whole.

The Introduction and Statistical sections have not been subjected to the auditing procedures applied by us and the other auditors in the audit of the basic financial statements, and accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued our report dated December 18, 2013 on our consideration of the State's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

KPMG LLP

Colchester, Vermont

VI. Reg. No. 92-0000241

INTRODUCTION

We are pleased to present this analysis and discussion of Vermont's financial performance for the fiscal year ending June 30, 2013. This Management, Discussion & Analysis (MD&A) section is intended to serve as an introduction to the State's basic financial statements, which have the following components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. The MD&A is designed to assist the reader in focusing on significant financial matters, provide an easily readable overview of the State's financial activities, identify any material changes from the original budget, and highlight financial matters that occurred during fiscal year 2013. The following presentation is by necessity highly summarized, and in order to gain a thorough understanding of the State's financial condition, the following financial statements, notes and required supplementary information should be reviewed in their entirety.

FINANCIAL HIGHLIGHTS

Government-wide

- Vermont reported net position of \$1.723 billion, comprised of \$3.640 billion in total assets and \$7.4 million in deferred outflows offset by \$1.925 billion in total liabilities at June 30, 2013 (Table 1).
- The primary government's net position has increased by \$49.9 million as a result of this year's operations. The net position for governmental activities decreased \$11.4 million and net position for business activities increased by \$61.3 million (Table 2).

Fund level

- The State's governmental funds reported a combined ending fund balance of \$934.3 million, an increase of 7.8 percent over last year. Of this amount, \$345.1 million is available for spending at the State's discretion (committed, assigned, and unassigned fund balance).
- The State's General Fund reported an operating deficit this year of \$19.2 million which decreased the accumulated fund balance to \$159.2 million, of which \$1.7 million is nonspendable.

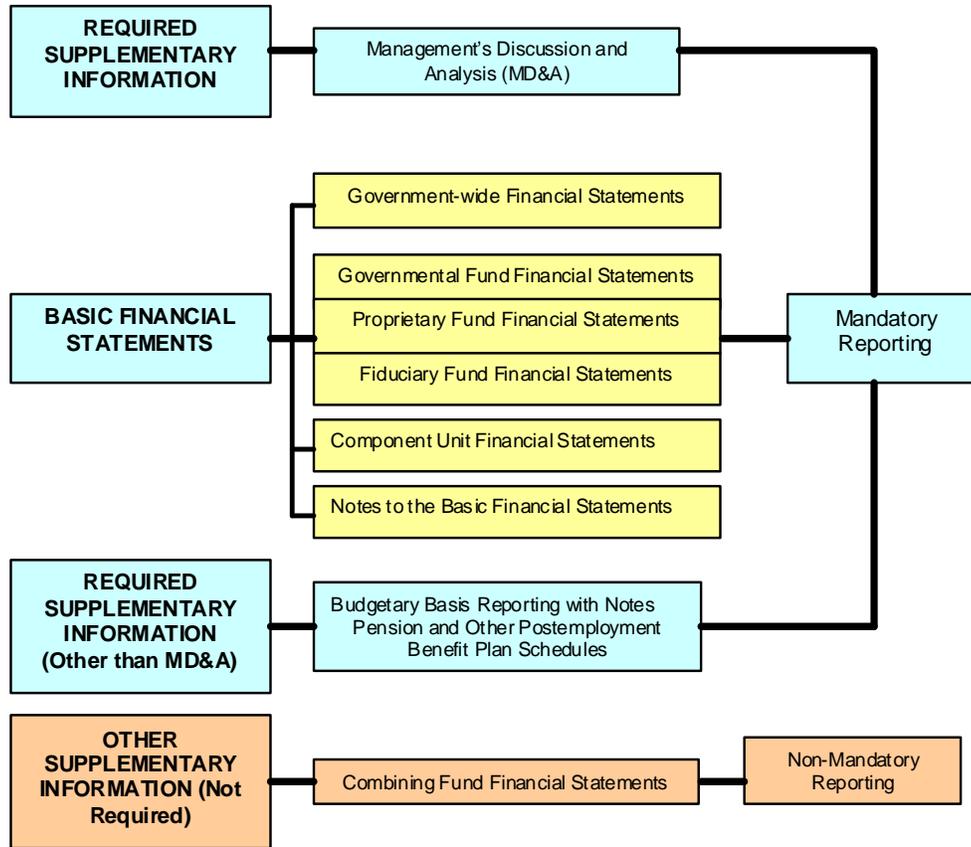

Long-term debt

- The State's debt outstanding for General and Special Obligation Bonds increased \$50.9 million as compared to fiscal year 2012.

OVERVIEW OF THE FINANCIAL STATEMENTS

This Comprehensive Annual Financial Report (CAFR) consists of an introductory section, a financial section, and a statistical section. The financial section contains the Independent Auditor's Report, this discussion and analysis section, the basic financial statements (BFS) with required supplementary information (RSI), and other supplementary information. Additional information regarding the above sections may be found below as well as in the notes to the financial statements.

The layout of the financial section and the relationship of the financial statements and supplementary information is presented in the following diagram. Notice the relationships between the various elements of the CAFR, such as "mandatory versus non-mandatory" reporting, or "required versus not required" supplementary information. This diagram is designed to illustrate how the various elements of the state's financial activity fit together in this CAFR.

Basic Financial Statements

Vermont’s basic financial statements (BFS) consist of four components: 1) government-wide financial statements, 2) fund financial statements, 3) component units’ financial statements, and 4) notes to the financial statements. The fund financial statements include governmental, proprietary, and fiduciary types of funds that will be described later in this analysis. Notes to the financial statements provide explanations and/or additional detail for all of the above type financial statements and are considered an integral part of the financial statements.

1) Government-Wide Financial Statements

Vermont’s government-wide financial statements, which follow this MD&A section, are designed to present a broad view of the State’s operations and financial position in a manner similar to the accounting principles used by most private-sector business. All of the State’s activities except its fiduciary funds’ activities are reported in the government-wide statements. Fiduciary activities are not included because the resources of these funds are not available to support the State’s own programs.

The government-wide statements contain both short-term and long-term information about the State’s financial position and assist in assessing the State’s economic condition at the end of each fiscal year. The State prepares these statements using the “flow of economic resources” measurement focus and the accrual basis of accounting. This basically means that the methods utilized to prepare these statements are similar to those used by most private sector businesses in preparing their financial statements. They take into account all financial activity connected with the reported fiscal year including revenues, expenses, transfers, sales or acquisitions of capital assets, and any other activity affecting or possibly affecting the financial condition of the State, even if cash involved has not been received or paid. The government-wide financial statements present two statements:

The *Statement of Net Position* presents a snapshot of both the primary government's and its component units' assets and liabilities and deferred outflows and deferred inflows, as of the date of this report, with the difference between the assets and deferred outflows, and liabilities and deferred inflows reported as "net position". Over time, increases or decreases in the primary government's net position may serve as an indicator as to whether the financial position of the State is improving or deteriorating.

The *Statement of Activities* presents the reported year's financial activity and hence, the reason(s) for the changes in net position included on the Statement of Net Position. All changes in financial activities are recognized as soon as the underlying event(s) giving rise to the changes occur, regardless of the timing of related cash flows. Thus, some revenues and expenses reported in this statement will not result in cash flows until future fiscal periods. This statement also presents the relationship between the State's major expenditure functions and the associated sources of program revenues associated with each expenditure function.

Both of the above financial statements segregate Vermont's financial activity into three categories: governmental activities, business-type activities, and discretely presented component unit activities. The governmental activities and business-type activities are combined to report on what is termed *primary government activities* which are separate and distinct from the *component units' activities* of the discretely presented component units. For more information regarding discretely presented component units, please see Note I to the financial statements.

Primary Government Activities

Governmental Activities – The financial activities reported in this section generally represent those services (functions) normally performed by a government entity. These activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. The governmental activities include public education, general government, public health services, legal and judiciary services, natural resources, public safety, regulatory services, social services, and public transportation. Taxes, grants, and intergovernmental revenues are the main sources of funding for these activities.

Business-Type Activities – These business-type activities of the State include the operations of Vermont's enterprise activities. For financial reporting purposes, these activities are classified as either major or non-major, depending upon their financial size as compared to each other and to the group as a whole. Activities categorized as major include the Unemployment Compensation Trust Fund program, Liquor Control, and the State Lottery Commission. Activities reported as non-major include the federal surplus property program, publishing Vermont Life magazine, making equipment loans to municipalities, and several other activities. Both major and non-major activities normally recover all or a portion of their costs through user fees and charges to the external consumers of their goods and services, much like a private business.

Component Units' Activities

Discretely Presented Component Units – These are legally separate (incorporated) entities for which the primary government has the ability to impose its will on the entity, receive a benefit from activities of the entity, or could receive a financial burden due to the activities of the entity. The State's discretely presented component units are presented in the aggregate in the government-wide statements. This aggregate total consists of four major and nine non-major component units. This categorization is determined by the entity's relative significance to the State. Additional information or financial statements for each of these individual component units can be obtained from their respective administrative offices. Addresses and additional information about the State's component units are presented in Note I to the financial statements.

Blended Component Units – The State has no blended component units.

2) Fund Financial Statements

A fund is a grouping of related accounts that is used to maintain control over resources that have been

segregated for specific activities or objectives. Similar to other state and local governments, Vermont uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

The fund financial statements focus and report on the State's activities in more detail than the government-wide statements. All of the funds of the State have been divided into three categories for reporting purposes: governmental, proprietary, and fiduciary. In turn, the governmental and proprietary funds are divided into major and non-major categories as required by the Governmental Accounting Standards Board. For the governmental and proprietary funds, the major funds are reported in individual columns in the fund financial statements while the non-major funds are presented in a consolidated column in the fund financial statements. Combining schedules or statements in the Other Supplementary Information section present detailed non-major fund activity. Fiduciary funds are reported by fiduciary type (pension and other postemployment benefit trusts, investment trusts, private purpose trusts and agency funds) with combining schedules or statements for the individual pension, other postemployment benefit, and agency funds presented in the Other Supplementary Information section. It is important to note that these fund categories use different accounting methods and should be interpreted differently as described below.

The three categories of funds are Governmental Funds, Proprietary Funds, and Fiduciary Funds. Following is a brief overview of these three major categories of funds.

Governmental Funds

Most of the basic services provided by the State are accounted for in the governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, the governmental fund financial statements focus on near-term inflows and outflows of spendable resources as well as the balances of resources available at the end of the fiscal year. This approach uses the "flow of current financial resources" measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the State's finances that assist in determining whether there will be adequate financial resources available to meet the current needs of the State.

Because the time period focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented in the governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Schedules reconciling the governmental funds' Balance Sheet and Statement of Revenues, Expenditures, and Changes in Fund Balances to their respective government-wide statements are provided on the pages immediately following each governmental fund financial statement to facilitate this comparison.

The State reports twenty governmental funds of which six are classified as "major" governmental funds. These major funds are the General Fund, Transportation Fund, Education Fund, Special Fund, Federal Revenue Fund and Global Commitment Fund. Each major fund is presented in a separate column in the Governmental Funds' *Balance Sheet* and in the *Statement of Revenues, Expenditures, and Changes in Fund Balance*. The "non-major" governmental funds include the Fish and Wildlife Fund, two capital projects funds, two debt service funds, and nine permanent funds and are presented in one consolidated column in the governmental fund statements. Combining and individual non-major governmental fund statements are reported in the Other Supplementary Information section of this report.

The governmental funds' financial statements immediately follow the government-wide financial statements.

Proprietary Funds

This category of funds includes enterprise funds (business-type) and internal service funds. These funds report activities that operate much like those of commercial enterprises. These funds' financial reports include a *Statement of Net Position*; a *Statement of Revenues, Expenses and Changes in Net Position*; and a *Statement of Cash Flows*.

Enterprise funds provide the same type of information as the business-type activities section in the government-wide financial statements, only in more detail and at the fund level. Like the government-wide financial statements, enterprise fund financial statements use the accrual basis of accounting. Enterprise funds account for services provided to the general public, government, and non-State government entities. They normally derive their revenue by charging user fees in order to cover the costs of their services.

The State reports nine enterprise funds of which three are reported as major funds in separate columns on the proprietary fund statements. These three are the Unemployment Compensation Fund, the Liquor Control Fund, and the Vermont Lottery Commission. The other six enterprise funds are reported as "non-major funds" and are consolidated into one column on the proprietary fund statements.

Internal service funds are used to report activity that provides goods and services to other funds, departments, or agencies of the primary government and its component units, or to other governments on a cost reimbursement basis. Because the activities in these funds primarily benefit governmental activities, they have been combined with the governmental activities in the government-wide statements.

The State reports twenty-three internal service funds, which are reported in one consolidated column entitled "Governmental Activities – Total Internal Service Funds" on the Proprietary Funds Statement of Net Position; Statement of Revenues, Expenses, and Changes In Net Position; and Statement of Cash Flows.

The proprietary funds' financial statements immediately follow the governmental fund financial statements. Combining non-major enterprise and combining internal service fund statements may be found in the Other Supplementary Information section of this report.

Fiduciary Funds

The fiduciary funds are used to account for assets held by the State in a trustee capacity or as an agent for individuals, private organizations, other governmental units, or other funds. Fiduciary funds are excluded from the government-wide financial statements because the State cannot use these assets to finance its operations. The fiduciary funds use the accrual basis of accounting.

The State's fiduciary funds are divided into the following four basic categories: Pension and Other Postemployment Benefit Trust Funds (includes three separate defined benefit pension plans, three separate defined contribution pension plans, one defined benefit other postemployment benefit plan, and one defined contribution other postemployment benefit plan); an Investment Trust Fund (which reports only the external portion of the Vermont Pension Investment Committee investment pool); a Private Purpose Trust Fund (which reports only the Unclaimed Property Fund); and Agency Funds (ten agency funds which account for the assets held for distribution by the State as an agent for other governmental units, organizations or individuals). These funds financial reports include a *Statement of Fiduciary Net Position*; and a *Statement of Changes in Fiduciary Net Position*.

The fiduciary funds financial statements can be found immediately following the proprietary funds financial statements. Individual pension and other postemployment benefit trust funds, and agency funds financial statements are reported in the Other Supplementary Information section of this report.

3) Discretely Presented Component Units' Financial Statements

As mentioned previously, the State has included the net position and activities of four major component units in individual columns and nine non-major component units in a single column on the statements.

The component units' financial statements can be found immediately after the fiduciary funds. Combining individual non-major component units' financial statements can be found in Other Supplementary Information section of this report.

4) Notes to the Financial Statements

The notes provide additional information that is essential to a full understanding of the data presented in the government-wide and the fund financial statements. The notes to the financial statements can be found immediately following the component units' financial statements.

Required Supplementary Information Other Than MD&A

The basic financial statements are followed by a section of required supplementary information. This section includes:

The Schedule of Funding Progress for the three defined benefit pension trust funds and the Schedule of Employer Contributions for the past six years are included in the required supplementary information section. Also, this section includes the Schedule of Funding Progress and the Schedule of Employer Contributions for the other postemployment benefit plans.

Schedules for the General Fund and major Special Revenue Funds comparing their original budgeted amounts; final budgeted amounts; actual inflows, outflows, and balances stated on the budgetary basis; and variances between the final budgeted amounts and actual amounts presented on a budgetary basis. See Note III. A. for additional information regarding the budgetary process, including the budgetary basis.

Notes to Required Supplementary Information include a schedule reconciling the statutory fund balance presented on a budgetary basis to the fund balance prepared on a modified accrual basis as presented in the governmental fund financial statements for each major governmental fund.

Other Supplementary Information

Combining Financial Statements

The combining fund financial statements referred to earlier in connection with non-major funds and non-major component units are presented following the Required Supplementary Information section. The total columns of these combining financial statements carry to the applicable fund financial statement. These combining statements include the following:

- Non-major governmental funds
- Non-major proprietary (enterprise) funds
- Internal service funds
- Fiduciary funds (including individual pension and other postemployment benefit trust funds, and agency funds)
- Non-major component units

Statistical Section

A statistical section containing selected financial, debt capacity, operating, economic and demographic information is presented immediately following the combining financial statements.

GOVERNMENT-WIDE FINANCIAL ANALYSIS

Net Position

The State's (governmental and business-type activities) combined net position totals \$1.723 billion at the end of 2013, as shown in Table 1. Approximately \$1.783 billion of the combined net position represents the State's investment in capital assets such as land, buildings, equipment, and infrastructure (roads, bridges, and other immovable assets) less any related debt still outstanding that was used to acquire those assets. This net investment in capital assets represents resources used to provide services to citizens, and therefore is not available for future spending. Although the State's investment in its capital

assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

An additional portion of the primary government's net position (40.1 percent) represents resources that are subject to external restrictions on how they may be used. Internally imposed designations of resources are not presented as restricted net position. The remaining balance of unrestricted net position is a deficit of \$751.6 million.

The governmental activities' negative unrestricted net position balance is mainly the result of three actions: 1) long-term debt issued by the State for municipal, non-profit or component unit capital purposes, \$218.0 million outstanding at June 30, 2013, that does not result in a governmental activities' capital asset, 2) the amount of net position that is restricted for various purposes, and 3) the net Pension and OPEB liabilities (See Note IV. G. 4.).

At the end of fiscal year 2013, the State reported positive total net position balances in its governmental activities, its business-type activities, and its discretely presented component units.

The following primary government condensed financial statement information is derived from the State's June 30, 2013 and 2012 government-wide Statement of Net Position. Although the government-wide statements include discretely presented component unit activity, the component unit activity has not been included in these condensed statements.

Management's Discussion and Analysis
(Unaudited) **Fiscal Year Ended June 30, 2013**

State of Vermont

In 2013, governmental activities' expenses exceeded revenues by \$35.4 million and received transfers of \$24.0 million from business activities, resulting in a \$11.4 million (or 0.7 percent) decrease in net position. Business-type activities had an overall increase in net position of 190.4 percent, resulting from an operating profit of \$85.3 million and by transfers out of \$24.0 million to governmental activities, primarily from the Lottery (\$22.9 million) to support education.

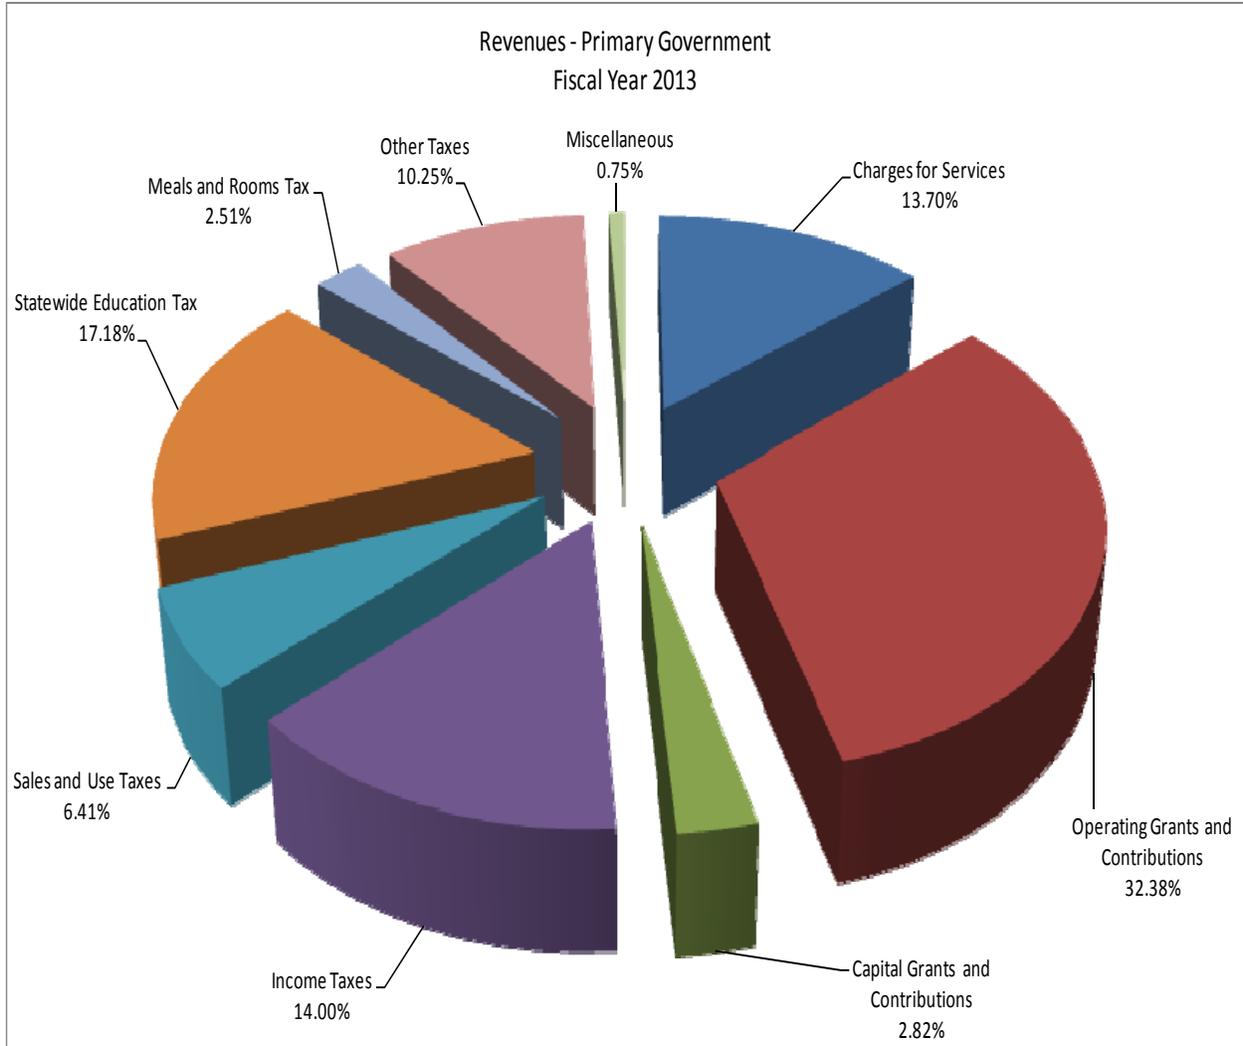

The following condensed table presents a comparison of activity for the fiscal years ended June 30, 2013 and 2012, and contains primary government data only.

Totals may not add due to rounding.

The following graph illustrates the revenues of Vermont’s primary government for fiscal year 2013. Approximately 35.20 percent comes from other entities and governments in the form of operating and capital grants and contributions (primarily federal grant revenues). An additional 31.18 percent of total revenues are generated by the statewide education and income taxes.

Percentages may not equal 100% due to rounding.

The following graph illustrates the percentages of total primary government expenses for fiscal year 2013. The largest category of expense is for human services (41.08 percent of total expense) which provides for Vermont’s low-income, elderly care services and persons in state custody in the form of grants for selected services such as food stamps, health care, housing and child protective services. The second most significant category of expense is for general education (32.25 percent of total expenses) which provides for Vermont’s support to secondary and higher education.

Percentages may not equal 100% due to rounding.

FINANCIAL ANALYSIS OF THE STATE’S INDIVIDUAL FUNDS

As noted earlier, the State of Vermont uses fund accounting to account for its ongoing operations and to demonstrate compliance with finance-related legal requirements imposed by both legislative mandates as well as externally imposed restrictions.

Governmental Funds

The focus of the State’s governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the State’s financing requirements. In particular, *unrestricted (unassigned, assigned, and committed) fund balances* may serve as a useful measure of a government’s net resources available for spending. At the end of fiscal year 2013, the unrestricted fund balance is 36.94 percent of the total fund balance of governmental funds, which is available for spending on governmental programs at the State’s discretion in the coming year. The remainder of this fund balance is restricted or nonspendable to indicate that it is not available for appropriation, such as the principal of the State’s Permanent Funds, and other items that are nonspendable, such as advances and long-term receivables. At the end of fiscal year 2013, the State’s governmental funds reported combined fund balances of \$934.3 million, an increase of \$67.7 million in comparison with the prior fiscal year.

The General Fund is the chief operating fund of the State. At the end of fiscal year 2013, the General Fund’s total fund balance was \$159.2 million and the unassigned portion of this fund balance was \$152.2 million. Its remaining fund balance was made up of nonspendable amounts totaling \$1.7 million, and assigned amounts totaling \$5.3 million. During 2013, total expenditures and other financing uses exceeded total revenues and other financing sources by \$19.2 million.

The Special Fund's total fund balance at the end of fiscal year 2013 was \$86.0 million, a decrease of 2.6 percent in comparison with 2012. The Special Fund's total fund balance is comprised of \$8.8 million as restricted and \$82.5 million as committed. Special Fund revenues increased \$25.0 million and expenditures increased \$12.4 million compared to 2012 resulting in an increase in "excess of revenues over expenditures" of \$12.6 million from last fiscal year. Fiscal year 2013 transfers out to other funds exceeded transfers in from other funds by \$257.6 million. The Special Fund transferred \$293.0 million to the Global Commitment Fund for a portion of the State's payment for Medicaid coverage under the Global Commitment to Health Medicaid waiver.

The Federal Revenue Fund accounts for all federal grants except those federal grants that are awarded to the Agency of Transportation (which are included in the Transportation Fund), the Global Commitment to Health Medicaid waiver (which are included in the Global Commitment Fund) and the Department of Fish and Wildlife (which are included in the Fish and Wildlife Fund, a non-major governmental fund). The Federal Revenue Fund's federal grant revenues for fiscal year 2013 were \$877.1 million, a 3.7 percent increase over fiscal year 2012's federal grant revenues. The Federal Revenue Fund's total fund balance at the end of fiscal year 2013 (\$392.5 million) was an increase of \$40.6 million as compared to the total fund balance at the end of fiscal year 2012.

The fiscal year 2013 ending total fund balance for the Global Commitment Fund was \$94.9 million. Revenues and net transfers in of \$1,166.2 million exceeded expenditures of \$1,160.8 million by \$5.4 million.

The Education Fund at June 30, 2013, had a total fund balance of \$66.4 million, which represents a \$0.6 million increase over fiscal year 2012's ending balance. The State's income sensitivity adjustment to taxpayers' property tax assessment is determined by the Tax Department based on the taxpayers' personal income tax return submissions. Each municipality is notified of the amount each taxpayer is to have applied against their gross property tax bill. The municipality then applies this amount against the homeowner's gross property tax. The State pays this income sensitivity adjustment amount to the municipality directly. The Education Fund's statutory reserve for budget stabilization decreased \$0.6 million to \$29.3 million, the maximum allowed by statute.

The Transportation Fund's total fund balance was \$21.8 million at June 30, 2013, an increase of \$3.5 million from the fiscal year 2012 ending total fund balance. This increase was primarily the result of revenue exceeding expenditures by \$9.1 million offset by transfers to other funds of \$5.7 million. The Transportation Fund's statutory reserve for budget stabilization increased by \$0.04 million to \$10.8 million, the maximum allowed by statute.

See Note I, Section E for more information regarding these funds.

Proprietary Funds

The State's *enterprise funds* provide the same type of information presented in the business-type activities in the government-wide financial statements, but in more detail. The Unemployment Compensation Trust Fund's total net position balance increased from \$26.2 million at June 30, 2012 to \$86.0 million at June 30, 2013, an increase of \$59.8 million in one year. The fund received Federal grants of \$20 million. In addition, the State paid \$24 million of the \$78 million Title XII cash advance from the U.S. Treasury in fiscal year 2013, and the remaining balance of \$53 million was paid in July 2013.

The State's *internal service funds'* total net position at June 30, 2013 was \$14.7 million, a \$3.1 million decrease from June 30, 2012. This decrease is primarily due to operating loss totaling \$10.2 million, net non-operating revenues of \$1.5 million and net transfers in from other funds of \$5.7 million. It should be remembered that the internal service funds' activity has been combined with the governmental funds' activity in the government-wide financial statements.

Fiduciary Funds

The State's fiduciary funds account for resources held for the benefit of parties outside State government. The *pension and other postemployment benefit trust funds*' net position increased by 5.82 percent to \$3.65 billion at June 30, 2013. For more information regarding the State's retirement and other postemployment benefit plans, see Note IV. G. 4. to the financial statements. The Unclaimed Property Fund's total assets balance at June 30, 2013 is \$9.5 million, and total liabilities balance is \$7.4 million, including the escheat property claims liability estimated at \$7.3 million, resulting in ending net position of \$2.1 million. The Investment Trust Fund's total net position at June 30, 2013, were \$134.8 million. Net position of all fiduciary funds are reported as held in trust for particular purposes.

GENERAL FUND BUDGET HIGHLIGHTS

The State ended fiscal year 2013 with General Fund revenues of \$1.289 billion, expenditures of \$977.1 million, and net transfers to other funds of \$339.2 million (non-GAAP budgetary basis). This was a \$91.6 million increase in revenues over the previous year. The fiscal year 2013 General Fund consensus revenue forecast initially approved by the Emergency Board in July, 2012 was subsequently revised upward by the Emergency Board at their January 2013 meeting. Compared to target, the revenues were 2.3 percent above the July, 2012 revised revenue forecast of \$1,260.2 million, and 2.1 percent above the January 2013 revenue forecast of \$1,262.5 million. The higher than projected General Fund revenues were attributable to higher than expected Personal Income Tax receipts (\$36.0 million above target) and Corporate Income Tax receipts (\$0.9 million above target). Receipts from the Inheritance and Estate Tax were \$6.2 million below target and receipts from Sales and Use Tax were \$1.6 million below target. The General Fund results allowed for a fully funded General Fund Budget Stabilization Reserve of \$62.5 million, representing the statutory maximum of 5 percent of the prior year appropriations level.

PRIMARY GOVERNMENT'S CAPITAL ASSETS AND DEBT ADMINISTRATION**Capital Assets**

The State investment in capital assets (net of accumulated depreciation) for its governmental and business-type activities as of June 30, 2013, was \$2.011 billion, a total increase of 3.1 percent (Table 3). This investment in capital assets includes land, buildings, improvements, equipment, infrastructure and construction in progress. Infrastructure assets are items that are normally immovable and of value only to the State, such as roads, bridges, streets and sidewalks, drainage systems, lighting systems, and similar items.

Many component unit, municipal and non-profit organizations' capital construction projects and acquisitions are financed by the State, but the assets are actually owned by these other entities. Therefore, these capital assets are recorded on the financial statements of those entities and not on the books of the State. But the general obligation bonds issued by the State to finance these capital assets are reported as a liability of the State's governmental activities. At June 30, 2013, the State had \$218.0 million of general obligation bonds outstanding related to capital assets of these other entities. Additional information on the State's capital assets can be found in Note IV. E. of the notes to the financial statements.

Debt Administration

The State has no constitutional or other limit on its power to issue obligations or to incur debt besides borrowing only for public purposes. In 1990, the General Assembly created the Capital Debt Affordability Advisory Committee and made it responsible for overseeing the long-term capital planning for the State. Annually, the General Assembly passes appropriations for capital purposes and authorizes the State Treasurer to issue general obligation bonds to provide the financing for all or a portion of the appropriations. Bonds are backed by the full faith and credit of the State, including the State's power to levy additional taxes to ensure repayment of the debt.

During fiscal year 2013, the State of Vermont's outstanding general and special obligation bond debt increased by approximately \$50.9 million. This increase can be accounted for by the issuance of \$93.2 million of general obligation bonds, \$10.8 million of special obligation bonds, and accretion of \$0.2 million in principal on the State's capital appreciation bonds offset by the redemption of \$53.3 million. Additional information on the State's bonded debt is contained in Note IV. G. 1. of the notes to the financial statements.

The State's general obligation bond ratings are as follows: Aaa by Moody's Investor Service (since February 2007), AA+ by Standard & Poor's Ratings Services (since September 2000), and AAA by Fitch Ratings (since April 2010).

ECONOMIC FACTORS AFFECTING THE STATE

Capital Debt Affordability

Annually the Capital Debt Affordability Advisory Committee (CDAAC) completes a review of the size and affordability of the State tax-supported general obligation debt. By October 1, the CDAAC submits to the Governor and to the General Assembly an estimate of the maximum amount of new long-term general obligation debt that prudently may be authorized for the next two fiscal years. In September 2012, the CDAAC proposed that the maximum amount of long-term general obligation debt authorized to be issued by the State for fiscal years 2014 and 2015 not exceed \$159.9 million.

Economic Outlook

Recent data on Vermont economic conditions indicate that the performance of the Vermont economy has generally outperformed the developments in the U.S. economy overall during the past 12 to 18 months since the State's last period of economic recession ended, although there has been little change in the economic and revenue outlook over the previous six months to a year. Monetary policy and fiscal policy in Washington contradict one another and prevented achievement of potential economic growth and full recovery. Job market data shows that Vermont labor markets have continued to outpace the U.S. average, with the lowest unemployment rate in New England, and the fourth lowest unemployment rate in the nation in June, 2013. Housing markets continue to heal, but will take several years to recover to prior levels. Total revenues for the General Fund, Transportation Fund, and Education Fund all closed FY13 about 1.5% above expectations. The large consumption taxes (meals and rooms, sales and use, and motor vehicle purchase and use) are right on target. Such growth is expected to continue into fiscal year 2014.

REQUESTS FOR INFORMATION

This financial report is designed to provide a general overview of the State of Vermont's finances for all of Vermont's citizens, taxpayers, customers, and investors and creditors. This financial report seeks to demonstrate the State's accountability for the money it receives. Questions concerning any of the information provided in this report or requests for additional information should be addressed to:

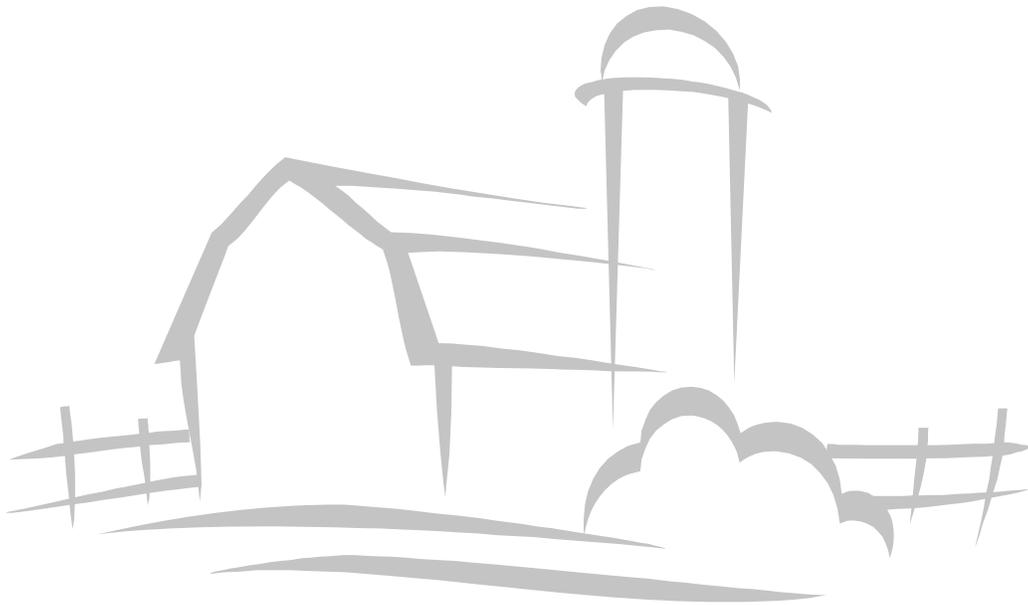

State of Vermont
Department of Finance and Management
109 State Street, 5th Floor
Pavilion Building
Montpelier, Vermont 05609-0401

The State's component units issue their own separately issued financial statements. Their statements may be obtained by directly contacting them at the addresses found in Note I to the State's financial statements.

**STATE OF VERMONT
RECONCILIATION OF GOVERNMENTAL FUND BALANCES TO THE
STATEMENT OF NET POSITION - GOVERNMENTAL ACTIVITIES
JUNE 30, 2013**

Total fund balances from previous page	\$	934,296,699
Capital assets used in governmental activities (net of internal service funds' capital assets) are not considered financial resources for fund perspective reporting and, therefore, are not reported in the funds ⁽¹⁾		1,970,452,523
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications, to certain funds. The assets and liabilities of the internal service funds are included in the governmental activities in the statement of net position.....		14,671,637
Amounts presented in the statement of net position relating to, but not in fund balances due to a different basis of accounting ⁽¹⁾		189,292,082
Long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not considered financial liabilities for fund perspective reporting, and therefore are not reported in the funds ⁽¹⁾		<u>(1,479,650,822)</u>
Net position of governmental activities	\$	<u>1,629,062,119</u>

⁽¹⁾ Additional information on these amounts can be found in Note II. A.

The accompanying notes are an integral part of these financial statements.

**STATE OF VERMONT
RECONCILIATION OF STATEMENT OF REVENUES, EXPENDITURES AND CHANGES IN
FUND BALANCES - GOVERNMENTAL FUNDS TO THE
STATEMENT OF ACTIVITIES - GOVERNMENTAL ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2013**

Total net change in fund balances from the previous page.....	\$ 67,673,443
<p>Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period (net of internal service funds) ⁽¹⁾</p>	
	56,760,826
<p>Repayment of bond principal is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the statement of net position.</p>	
Principal repayment.....	53,250,000
<p>Bond proceeds provide current financial resources to the governmental funds, but issuing debt increases long-term liabilities in the statement of net position ⁽¹⁾</p>	
	(114,558,904)
<p>Receivables in the governmental funds that are not available to provide current financial resources are not reported as revenues in the governmental funds.....</p>	
	3,710,562
<p>Estimated personal income tax refunds and retirement incentives that are not due and payable are not reported as expenditures in the governmental funds.....</p>	
	6,105,529
<p>Some expenses reported in the statement of activities do not require the use of current financial resources and, therefore, are not reported as expenditures in the governmental funds ⁽¹⁾</p>	
	(81,286,089)
<p>Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.....</p>	
	<u>(3,053,082)</u>
Total changes in net position of governmental activities as reported on the statement of activities.....	\$ <u>(11,397,715)</u>

⁽¹⁾ Additional information on these amounts can be found in Note II. B.

The accompanying notes are an integral part of these financial statements.

**STATE OF VERMONT
NOTES TO BASIC FINANCIAL STATEMENTS
JUNE 30, 2013**

Note I. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Vermont (State) have been prepared in accordance with generally accepted accounting principles as applicable to governmental entities. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing accounting and financial reporting policies.

Newly implemented in these statements are the requirements of four new GASB statements. GASB Statement No. 61—*"The Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34"* - modifies certain requirements for inclusion of component units in the financial reporting entity. GASB Statement No. 62—*"Codification of Accounting and Financial Reporting Guidance Contained in Pre-November 30, 1989 FASB and AICPA Pronouncements"* - incorporates into the GASB's authoritative literature certain accounting and financial guidance included in FASB and AICPA pronouncements issued on or before November 30, 1989, which does not conflict with or contradict GASB pronouncements. GASB Statement No. 63—*"Financial Reporting of Deferred Outflows of Resources, Deferred Inflows of Resources, and Net Position"* - provides financial reporting guidance for deferred outflows of resources and deferred inflows of resources, and identifies net position as the residual of all other elements presented in a statement of net financial position. GASB Statement No. 65—*"Items Previously Reported as Assets and Liabilities"* - establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously classified as assets and liabilities; and recognizes, as outflows of resources or inflows of resources, certain items that were previously reported as assets and liabilities.

The accompanying financial statements present the financial position of the State, the results of operations of the State and the various funds and fund types, and the cash flows of the various proprietary funds. The financial statements are presented as of and for the period ending June 30, 2013.

The following is a summary of the more significant accounting policies employed in the preparation of these financial statements.

A. Financial Reporting Entity

The State of Vermont's Primary Government is comprised of three branches: the Executive Branch, with the Governor as the chief executive officer; the Legislative Branch, with a Senate of 30 members and a House of Representatives of 150 members; and the Judicial Branch, with Supreme and Superior Courts and the Judicial Bureau.

The basic financial statements include all funds, agencies, boards, commissions and organizations of the primary government (the State), as well as component units that have been determined to meet the requirements for inclusion in the State's financial reporting entity.

Component Units are entities that, although legally separate from the State, have been included because they are either financially accountable to the State, or have relationships with the State such that exclusion would cause the State's financial statements to be misleading or incomplete. These component units are financially accountable to the State if the State appoints a voting majority of the organization's governing body and it is able to impose its will on that organization, or if there is a potential for the organization to provide a financial benefit or financial burden to the State. Alternatively, for those organizations where the State does not appoint a voting majority, an organization is financially accountable to the State if the organization is fiscally dependent and the organization provides a financial benefit or financial burden to the State.

Component unit activity may be "blended" into the activity of the primary government or may be reported

separately. Blended component units are, in substance, part of the primary government's operations, even though they are legally separate entities. Thus, blended component units are appropriately presented as funds of the primary government. If they are reported separately, they are called "discretely presented component units" and are reported in a separate column in the government-wide financial statements to emphasize that they are legally separate from the primary government. Each discretely presented component unit's designation as either "major" or "non-major" has been determined by the entity's relative significance to the State. Additional information as well as separately issued financial reports may be obtained by contacting the individual entity desired at the address given in the following text.

Discretely Presented Major Component Units

The "Discretely Presented Component Units" contained in the government-wide financial statements report the financial results of the following entities:

Vermont Student Assistance Corporation (VSAC) – VSAC was established by the Vermont Legislature to provide opportunities for persons who are residents of Vermont to attend colleges or other institutions of higher education by awarding grants and by making, financing, servicing, and guaranteeing loans to qualifying students. The Governor of the State appoints five of the eleven members of the Board of Directors and the State Legislature appoints two additional members. The State of Vermont has the ability to impose its will upon VSAC through its ability to change or alter the organization, structure or programs. For further information, contact their administrative offices at 10 East Allen Street, P.O. Box 2000, Winooski, Vermont 05404.

*University of Vermont (UVM)** - The University of Vermont's financial report includes both the University and the State Agricultural College. The State appoints twelve of the twenty-three voting members of the Board of trustees. The State has assumed an obligation to provide financial support through its annual appropriation and is obligated to maintain the University's debt service reserves. Additional information may be obtained by contacting the university's administrative offices at 348 Waterman Building, Burlington, Vermont 05405.

Vermont State College System (VSC) – The Vermont State College System's annual report includes the financial activity for the following organizations:

- System Offices and Services
- Community College of Vermont
- Castleton State College
- Johnson State College
- Lyndon State College
- Vermont Technical College
- Vermont Interactive Television
- Allied Health Nursing Program
- Vermont Manufacturing Extension Center

The Governor, with the advice and consent of the Senate, appoints nine of the fifteen members of the board of trustees, and the legislature appoints an additional four members. The State has assumed an obligation to provide financial support through its annual appropriations and has assumed an obligation to maintain VSC's debt service reserves. Additional information about the system itself or about any of the individual organizations included in the system may be obtained by contacting the Office of the Chancellor, Vermont State Colleges, PO Box 7, Montpelier VT 05601.

Vermont Housing Finance Agency (VHFA) – The VHFA was created in 1974 by an Act of the General Assembly of the State of Vermont for the purpose of financing and promoting affordable, safe and decent housing opportunities for low- and moderate-income Vermonters. The State appoints voting members of VHFA's board of commissioners. The State is able to impose its will on the organization as the Governor can remove any member of the board at will. The State also has an obligation to maintain the organization's debt reserves. Further information may be obtained by contacting the Agency's administrative offices at 164 Saint Paul Street, Burlington, VT 05401.

Discretely Presented Non-major Component Units

*Vermont Economic Development Authority (VEDA)** – VEDA, a tax-exempt entity, was created by the Vermont Legislature for the purpose of promoting economic prosperity in the State by directly financing eligible businesses and projects including manufacturing, agricultural, and travel and tourism enterprises; and by operating programs which provide eligible borrowers with access to capital. The authority has 15 voting members consisting of the secretary of the agency of commerce and community development, the State treasurer, the secretary of agriculture, food and markets, the commissioner of forest, parks, & recreation, and the commissioner of public service or a designee of any of the above; and ten members, who are residents of the State of Vermont and appointed by the Governor with the advice and consent of the senate. The State has the ability to impose its will on the entity as the Governor can remove members at will and the State can change the structure and activities of the organization at any time. The entity's services primarily benefit the Vermont citizenry.

VEDA also administers the State Infrastructure Bank (SIB), the Drinking Water State Revolving Loan Fund – Private Loans, the Brownsfield Revitalization Fund, and the Clean Energy Development Fund. These four funds are administered for the benefit of the State and are consolidated and reported in VEDA's agency fund. Audited financial statements and additional information may be obtained by contacting VEDA at 58 East State Street, Suite 5, Montpelier, Vermont 05602.

Vermont Housing and Conservation Board (VHCB) – The Legislature created and charged this organization with two goals: create affordable housing for Vermont residents; and conserve and protect Vermont's agricultural lands, historic properties, important natural areas, and recreational lands. The VHCB's Board of Directors is appointed by the Governor of the State of Vermont and there is a material financial relationship. Funding for the organization is provided by the Legislature, comprised of 50% of the revenue from the property transfer tax, plus other monies appropriated from time to time. The VHCB issues audited financial statements under separate cover. Additional information may be obtained by contacting them at 58 East State Street,, Suite 5 Montpelier, Vermont 05602.

Vermont Sustainable Jobs Fund, Inc. (VSJF) – The Vermont Legislature established a jobs program and directed VEDA to set up a non-profit 503(c)(3) corporation to implement the program and to establish policies and procedures in order to fulfill the goals of the jobs program as listed in 10 V.S.A. 326(a). The majority of the voting members of the Board are indirectly appointed by the State. The State is able to impose its will on the organization as the Governor can remove any member at will, and VEDA can appoint the management of the organization. Audited financial statements and additional information may be obtained by contacting them at 58 East State Street, Suite 5, Montpelier, Vermont 05602.

Vermont Municipal Bond Bank (VMBB) – The Vermont Legislature established the VMBB for the express purpose of fostering and promoting adequate capital markets and facilities for borrowing money by governmental units of the State of Vermont for the financing of public improvements or other public purposes. The Governor appoints the four directors, and can remove members at will. VMBB is authorized, with written consent of the Governor and the State Treasurer, to carry out these charges by borrowing money or by issuing its own bonds and notes to obtain funds which are then utilized to purchase bonds and notes issued by local governmental entities. The State is obligated annually to appropriate any funds necessary to maintain required reserves of the bond bank. The VMBB has an annual fiscal year (December 31) and issues audited financial statements under separate cover.

VMBB also administers the Special Environmental Revolving Fund in accordance with 24 V.S.A. 4753(b). This fund was created by the Vermont Legislature for the purpose of fostering and promoting timely expenditures by municipalities for water supply, water pollution control, and solid waste management. The fund has a June 30 year-end and issues its own audited financial statements. For financial reporting purposes, its financial statements have been consolidated with the State's Federal Revenue Fund financial statements in this CAFR. Further information regarding VMBB or the Special Environmental Revolving Fund may be obtained by contacting VMBB at 20 Winooski Falls Way, Winooski VT 05404.

Vermont Educational and Health Buildings Financing Agency (VEHBFA) – VEHBFA is a non-profit entity which

finances or assists in the financing of projects for eligible Vermont educational or health related entities. The majority of the Board of VEHBFA is appointed by the Governor of the State. The Board may appoint officers, agents, consultants and employees and fix their compensation, subject to approval of the Governor. It has a December 31 (annual) year-end and issues audited financial statements under separate cover. For additional information, they may be contacted at 20 Winooski Falls Way, Winooski VT 05404.

Vermont Center For Geographic Information (VCGI) –VCGI is a public non-profit chartered by the State of Vermont to assist the Vermont GIS Community with creating a comprehensive strategy for the development and use of a geographic information system. The State appoints all members, and has the ability to impose its will on the entity as directors serve at the pleasure of the Governor. Audited financial statements or additional information may be obtained by contacting them at 58 South Main Street, Suite 2, Waterbury, Vermont 05676.

Vermont Veterans' Home – The Vermont Veterans' Home was originally chartered in 1884 by the Vermont Legislature and incorporated on November 24, 1884. A Board of Trustees appointed by the Governor oversees the operations of the Vermont Veterans' Home. The State can impose its will on the entity as directors serve at the pleasure of the Governor. The Vermont Veterans' Home is financially accountable to the State as the State provides all funding and controls the finances of the Home. The Vermont Veterans' Home issues its own audited financial statements under separate cover. Additional information may be obtained by contacting them at 325 North Street, Bennington, Vermont 05201.

Vermont Rehabilitation Corporation – The Vermont Rehabilitation Corporation is a non-profit quasi-public corporation that was incorporated in 1935 in accordance with 10 V.S.A. 272-277. Its main purpose is to provide a limited source of loan funds to family farmers or prospective family farmers under terms and conditions which will reduce their investment costs to an extent that offers them a reasonable chance to succeed. The Vermont Rehabilitation Corporation is included as a component unit of the State as it is closely related and financially integrated with the State of Vermont. Additional information may be obtained by contacting the Vermont State Treasurer at 109 State Street, 4th Floor, Montpelier, Vermont 05609-6200.

Vermont Telecommunications Authority – The Vermont Telecommunications Authority was created in June 2007, pursuant to 30 V.S.A. 8061, for the purposes of ensuring that all regions of the State have access to affordable broadband and mobile telecommunications services and promoting and facilitating ongoing upgrades in statewide telecommunications infrastructure in the most efficient and economically feasible manner. The State appoints all members of the Vermont Telecommunications Authority and the State has the ability to impose its will on the entity as it must approve all bonds issued by the authority. Additional information may be obtained by contacting the corporation at 100 State Street, Suite 342, Montpelier VT 05620-3205.

Vermont Transportation Authority (VTA) – The Vermont Legislature specifically authorized the creation of VTA pursuant to the acquisition, operation, and support of an authorized transportation facility as defined in 29 V.S.A. 701. All members of the authority are appointed by the Governor, and all resources revert to the State on termination of the authority. The VTA, currently inactive, has remained in the State Statutes in case it becomes necessary to reactivate it in the future. Additional information may be obtained from the Agency of Transportation – Rail Division, National Life Building, Montpelier, Vermont 05633–5001.

* - Indicates entity was audited by KPMG LLP.

Joint Ventures

A joint venture is a legal entity or other contractual arrangement that is owned, operated or governed by two or more participants as a separate and specific activity subject to joint control, in which the participants retain an ongoing financial interest or responsibility. The Tri-State Lotto Commission (31 V.S.A. 673) is classified as a joint venture. The financial activities' of this organization have not been included in the State's financial statements; however, see Note V. E. for additional information regarding the organization.

Jointly-governed Organizations

The following organizations are classified as jointly-governed organizations, because they represent units over which control is exercised jointly by the State along with various other governmental agencies. There is no specific ongoing financial benefit or burden for the State associated with these organizations, which distinguishes these arrangements from those classified as joint ventures. The financial activities of these organizations are not included in the State's financial statements.

Connecticut River Valley Flood Control Commission (10 V.S.A. 1153)

New England Board of Higher Education (16 V.S.A. 2692)

New England Interstate Water Pollution Control Commission (10 V.S.A. 1333)

Northeastern Forest Fire Protection Commission (10 V.S.A. 2503)

Related Organizations

Related organizations are separate legal entities for which the primary government appoints a voting majority of the board members, but does not have either (a) the ability to impose its will on the organization or (b) a relationship of financial benefit or burden with the organization. The Vermont State Housing Authority (24 V.S.A. 4005) has been classified as a related organization, and thus their financial activity has not been included in the State's financial statements.

Excluded Organizations

The following entities have been determined not to be part of the reporting entity after applying the criteria of GASB Statement No. 14 "The Financial Reporting Entity", as amended by GASB Statements No. 61.

Vermont Information Technology Leaders (VITL)

Vermont Council on the Humanities

Vermont Council on the Arts

Vermont Historical Society

Vermont Public Power Supply Authority

Connecticut River Atlantic Salmon Commission (10 V.S.A. 4654)

Texas Low Level Radioactive Waste Disposal Compact (10 V.S.A. 7013)

These organizations have not been included in the reporting entity because they are legally separate entities and the voting majority of their governing boards are not appointed by the State. They are not fiscally dependent on the State's primary government and exclusion from the reporting entity would not render Vermont's financial statements incomplete or misleading.

B. Basis of Presentation—Government-wide Financial Statements

The basic financial statements of the State of Vermont include both *government-wide statements* and *fund financial statements*. The focus of the government-wide statements is on reporting the operating results and financial position of the State as a whole and present a longer-term view of the State's finances. The focus of the fund financial statements is on reporting on the operating results and financial position of the most significant funds of the State and present a shorter-term view of how operations were financed and what remains available for future spending.

While separate government-wide and fund financial statements are presented, they are interrelated. The governmental activities column incorporates data from governmental funds and internal service funds, while business-type activities incorporate data from the government's enterprise funds. Separate financial statements are provided for governmental funds, proprietary funds, and fiduciary funds, although the latter are excluded from the government-wide financial statements.

The State of Vermont's Government-wide Financial Statements (the Statement of Net Position and the Statement of Activities) report information on all of the financial activities of both the primary government and its component units, except fiduciary activity. Fiduciary fund activity has not been included in these entity-wide

statements in accordance with the requirements of GASB Statement No. 34. For the most part, the effect of interfund activity has also been removed from these government-wide statements. Primary government activities are segregated between governmental activities and business-type activities. Governmental activities' sources of revenues are normally taxes and inter-governmental revenues. Business-type activities rely, to a significant extent, on fees and charges for support. Further, the primary government is reported separately from its legally separate discretely presented component units.

The Statement of Activities demonstrates the degree to which direct expenses of a given function, segment, or component unit are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function, segment, or component unit. Program revenues include charges to customers who purchase, use, or directly benefit from goods or services provided by a given function, segment, or component unit. Program revenues also include grants and contributions that are restricted to meeting the operational or capital requirements of a particular function, segment, or component unit. Items not properly included among program revenues are reported instead as general revenues. Taxes and other resources that are dedicated internally are reported as general revenues rather than as program revenues. The State does not allocate general government (indirect) expenses to other functions.

Net position (the amount by which assets and deferred outflows exceed liabilities and deferred inflows) are reported on the Statement of Net Position in three components:

- (1) Net investment in capital assets— total amount of capital assets, net of accumulated depreciation and reduced by outstanding balances of bonds and other debt that are related to the acquisition or construction of those assets, including related deferred outflows of resources and deferred inflows of resources;
- (2) Restricted – for amounts when constraints placed on the net position are either externally imposed, or are imposed by constitutional provisions or enabling legislation.
- (3) Unrestricted – the total net position which do not fit the two preceding categories.

When both restricted and unrestricted resources are available for use, generally it is the State's policy to use restricted assets first with unrestricted resources utilized as needed.

C. Basis of Presentation—Fund Financial Statements

The financial activities of the State are recorded in individual funds, each of which is deemed to be a separate accounting entity. A fund is defined as a separate accounting entity with a self-balancing set of accounts. The State uses fund accounting to report on its financial position and results of operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain government functions or activities.

Separate financial statements are provided for governmental funds, proprietary funds, fiduciary funds, and discretely presented component units. Major governmental funds, major proprietary funds, and major component units are reported in individual columns in their respective fund financial statements. Non-major funds and component units are combined and reported in a single column. The single test for classifying a fund as either major or non-major consists of applying the following two steps:

- a. Total assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, revenues, or expenditures/expenses of that individual governmental or enterprise fund are at least 10 percent of the corresponding element total (assets plus deferred outflows of resources, liabilities plus deferred inflows of resources, etc) for all funds in that category or type (that is total governmental or total enterprise), **and**
- b. The same element that met the 10 percent criterion in (a) is at least 5 percent of the corresponding element total for all governmental and enterprise funds combined.

In addition to the above major fund criteria, any other governmental or enterprise fund that government officials believe is particularly important to financial statement users (i.e. because of public interest or for consistency) may be reported as a major fund.

The financial activities of the State reported in the accompanying financial statements have been classified into the following governmental, proprietary and fiduciary funds:

Governmental Funds

General Fund – The Vermont Legislature has established the General Fund as the basic operating fund of the State. As such, the General Fund is used to finance and to account for all expenditures for which no special revenues have otherwise been provided by law. All revenues received by the State and not otherwise required by law to be deposited in any other designated fund or used for any designated purpose are deposited in the General Fund. Unexpended and/or unencumbered appropriation balances will, unless otherwise directed by law, revert to fund balance at the end of the fiscal year to be re-appropriated in the future.

Special Revenue Funds - These funds are used to account for and report the proceeds of specific revenue sources that are restricted, committed or assigned to expenditures for specified purposes other than debt service or capital projects, and include the following:

Transportation Fund – This fund is a major special revenue fund. It is used primarily for preservation, maintenance, and improvements to the State's transportation infrastructure. This infrastructure includes highways, bridges, railroads, airports, public transportation, and other related activities. The fund is also used for construction of transportation capital facilities. The primary sources of revenue in this fund are motor fuel taxes, motor vehicle purchase and use tax, motor vehicle license and registration fees, traffic ticket revenue, other statutorily specified revenues, as well as reimbursements from the federal government for transportation projects.

Education Fund – This fund is a major special revenue fund. It was established by the Vermont Legislature to equalize statewide education funding requirements. Sources of funding and allowable expenditures are codified in 16 V.S.A. 4025. These allowable expenditures include payments to school districts and supervisory unions for the support of education, the costs of short-term borrowing, and statewide education tax income sensitivity adjustments. Funding includes the statewide education tax, allocations of other taxes, State lottery profits, Medicaid reimbursements, and appropriated transfers from the General Fund.

Special Fund – This fund is a major special revenue fund. It combines many individual special revenue funds that account for proceeds or specific revenues not categorized above that are limited to expenditures for specific purposes. These purposes cross the entire range of State government activities.

Federal Revenue Fund – This fund is a major special revenue fund. All federal grant receipts are recorded in this fund except for those federal funds specifically designated for human services as part of the global commitment to health Medicaid waiver, transportation or fish and wildlife purposes (which are recorded in the State's Global Commitment Fund, Transportation Fund or Fish and Wildlife Fund respectively).

Global Commitment (to Health) Fund – This fund is a major special revenue fund created in accordance with Section 16c of 33 V.S.A. 1901(e). It is the result of Vermont entering into a Medicaid demonstration waiver agreement with the Federal Government. The original waiver agreement was amended on January 1, 2011, was renewed on October 2, 2013, and will expire on December 31, 2016. This agreement caps Federal expenditures in Medicaid services, but gives Vermont great latitude in promoting universal access to health care, cost containment, and effective administration. The State will be financially at risk for managing costs within the capped limits but stands to benefit

from any savings realized from program efficiencies. As part of the agreement, the Agency of Human Resources (AHS) has contracted with the Department of Vermont Health Access (DVHA), which serves as a publicly sponsored managed care organization, and adheres to all Federal managed care organization regulations.

In addition to the grant received from the Federal Government, General and Special Fund resources are used to fund payments from the Agency of Human Services to the managed care organization within the DVHA for the purpose of providing services under the global commitment to health care waiver approved by the Federal Centers for Medicare and Medicaid Services under Section 1115 of the Social Security Act. These payments are reported as transfers out of the General and Special Funds and as transfers in to the Global Commitment Fund. These funds will be expended as appropriated by the general assembly, authorized by the Director of the DVHA, and approved by the Commissioner of Finance and Management consistent with agreements between the managed care organization within the DVHA and departments delivering eligible services under the waiver. These resources paid to the Global Commitment Fund are adjusted by the AHS each quarter to the actual expenditures paid.

Non-major governmental funds column includes the balances and activities of the following:

Fish and Wildlife Fund – This fund is a non-major special revenue fund. The fund’s revenue is committed by statute and can only be utilized for fish and wildlife purposes. Principal sources of revenue include license fees and federal grants.

Capital Projects Funds – These funds, consisting of the General Obligation Bond Projects Fund and the Transportation Infrastructure Bond Projects Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for capital outlays, including the acquisition or construction of capital facilities and other capital assets. These capital expenditures may be for the State directly or for outside organizations such as the Vermont State College System, municipalities, etc.

Debt Service Funds—These funds, consisting of the General Obligation Debt Service Fund and the Transportation Infrastructure Debt Service Fund, are non-major governmental funds, and account for and report financial resources that are restricted, committed, or assigned to be used for expenditures for bond principal and interest.

Permanent Funds – These are non-major governmental funds that report resources that are legally restricted to the extent that only earnings, not principal, may be expended for purposes that benefit the government or citizenry, such as higher education, cemetery care, and monument preservation.

Proprietary Funds

These funds account for those activities for which the intent of management is to recover the cost of providing goods or services to the general public or other departments of government primarily through user charges; or where prudent financial management dictates that periodic determinations of results of operations are appropriate. These funds include the following types:

Enterprise Funds – These nine funds are used to account for operations that are financed and operated in a manner similar to private business enterprises. The State’s intent in these funds is to recover the costs including depreciation expense associated with providing the goods and services to the public primarily through user charges. Three of these enterprise funds, reporting the activities of the State’s unemployment compensation program, the liquor control board, and the State’s lottery program, are reported as “major funds” while the remaining six are reported as non-major funds.

Unemployment Compensation Trust Fund – accounts for federal monies and unemployment taxes collected from employers to provide payment of benefits to the unemployed (21 V.S.A. Chapter 17).

Liquor Control Fund – accounts for the operations of the Liquor Control Board which purchases, distributes, and sells distilled spirits through its agency stores (7 V.S.A. Chapter 40).

Vermont Lottery Commission – accounts for the operations of the Vermont Lottery (31 V.S.A. Chapter 14). The net profits of the Vermont Lottery Commission are used to support public education and are transferred monthly to the Education Fund.

Internal Service Funds – These twenty-three separate funds are used to account for the financing of goods and services provided by one State department to other State agencies, departments, or intergovernmental units. Their objective is not to make a profit but rather to recover the total cost of providing these goods and services by charging users of their services and products. Activities accounted for in the State's internal service funds include risk management; employee group insurance programs; equipment acquisition and maintenance; rental and maintenance of facilities; financial, human resource, audit, and information technology services; postage, copying and supply procurement services; and State vehicle fleet management. In the government-wide financial statements, Internal Service Funds are reported within the governmental activities.

Fiduciary Funds

These funds are used to account for assets held in a trustee capacity or as an agent for individuals, private organizations, or other governmental units. These funds include the following:

Pension and Other Postemployment Benefit Trust Funds – These funds are used to report assets and associated financial activity that are held in trust for the members and beneficiaries of the Vermont State Retirement (defined benefit) System, the Vermont State Defined Contribution Retirement System, the State Teachers' Retirement (defined benefit) System, the Vermont Municipal Employees' (defined benefit) Retirement System, the Vermont Municipal Employees' Defined Contribution Plan, the State's Single Deposit Investment Account, the State Employees' Postemployment Benefit Trust Fund and the Vermont Municipal Employees' Health Benefit Fund.

Investment Trust Fund – Under the authority granted in 3 V.S.A. 523, beginning in Fiscal Year 2009, the State Treasurer created and began accepting deposits into the Vermont Pension Investment Committee (VPIC) Investment Pool, an external investment pool. The investment trust fund is used to account for the investments of the external participants in the Pool.

Private Purpose Trust Fund – The State's only fund in this category is the *Unclaimed Property Fund*, which accounts for all abandoned property that is required to be remitted to the State. The Unclaimed Property Division in the State Treasurer's Office administers procedures for returning this property to its rightful owner if they can be located. In addition to monetary assets, from time to time, the Unclaimed Property Division may have custody of tangible property that has not been valued and therefore is not reported in the financial statements. Each year, the fund retains the greater of \$100,000 or fifty percent of the amount received during the previous year, and the balance, after deduction for the Unclaimed Property Division's operating expenses, is transferred to the General Fund. Additionally, amounts which have been held by the Unclaimed Property Division for at least 10 years and which are less than \$100 are transferred to the Vermont Higher Education Endowment Fund (a permanent fund). It should be noted that any of the funds so transferred above will be returned to their rightful owners upon request at any time in the future.

Agency Funds – These funds report assets and liabilities for deposits and investments entrusted to the State as agent for others. They have no net position and report items such as Federal income tax withholding, social security tax withholding, etc.

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The accounting and financial reporting treatment is determined by the applicable measurement focus and

basis of accounting. Measurement focus indicates the type of resources being measured, such as *current financial resources* or *economic resources*. The basis of accounting indicates the timing of transactions or events for recognition in the financial statements.

Government-wide Financial Statements – The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements have been met. Statewide education property taxes are recognized as revenues in the year for which the taxes are levied. This property tax is levied by the State on July 1, is included in the property tax bills levied by municipalities, and is collected by municipalities. The municipalities, by December 1 and June 1, must make payment to the State Treasurer in the amount specified by the Commissioner of Taxes.

Governmental Fund Financial Statements – The governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period.

Major revenue sources considered susceptible to accrual include federal grants, interest on investments, and sales and income taxes.

Expenditures generally are recorded when a liability is due and payable, with the following exceptions:

- a. Employees' vested annual, personal, and compensatory leave time are recorded as expenditures when utilized. The amount of accumulated leave unpaid at the end of the fiscal year has been reported only in the accrual-basis financial statements and does not include any accruals for the State's share of any payroll taxes that will be due when the expenditures are actually paid. See the "Compensated Absences" section of this footnote for additional information.
- b. Interest on general long-term debt is recognized when due to be paid.
- c. Debt service expenditures and claims and judgments are recorded only when payment is due to be paid.

Proprietary Funds, Fiduciary Funds, and Discretely Presented Proprietary Fund Type Component Units – The financial statements presented for these types of funds use the economic resources measurement focus and the accrual basis of accounting. Revenues are recognized when earned and expenses are recorded when the liabilities are incurred.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services, and producing and delivering goods in connection with the proprietary fund's principal ongoing operations. Revenues and expenses not meeting this definition are categorized as non-operating revenues and expenses.

E. Assets, Liabilities, Deferred Outflows/Inflows, and Net Position/Fund Balance

Cash and Cash Equivalents

Cash balances for most funds are deposited with the State Treasurer. Except for the Pension and Vermont Municipal Employees Health Benefit Trust Funds, Investment Trust Fund, and Capital Projects Funds, cash balances deposited with the State Treasurer are pooled together and amounts that are not immediately required are invested in short-term investments.

Income earned by these short-term investments is allocated based on average daily balances to those funds authorized to receive it while any remaining earnings are deposited in the General Fund.

Cash and cash equivalents as reported in the financial statements include bank accounts, imprest cash, short-term investments with an original maturity of three months or less such as certificates of deposit, commercial paper, federal government agencies' discount notes, money market accounts, and repurchase agreements.

Investments

Investments are stated at fair value. Fair values of investments are based on quoted market prices. For additional information regarding types of investments and basis of valuation, see Note IV.B.—Investments.

Receivables

Receivables in the government-wide financial statements represent amounts due to the State at June 30 that will be collected at some time in the future. They consist primarily of accrued taxes and federal grants and are reported net of allowance for uncollectible accounts. See Note IV.C.—Accounts Receivable for further information.

Receivables reported in the governmental funds financial statements consist primarily of accrued taxes, federal grants receivable, and notes receivable from drinking water and clean water special environmental loans. Other receivables include primarily fees, fines, and expenditure reimbursements due to the Medicaid program from drug companies and third party insurance companies. Revenues accrued in the governmental funds' financial statements consist primarily of accrued taxes, and notes receivable from component units that will be collected by the State within 60 days after year-end. Amounts estimated to be collected after the 60-day revenue recognition period are recorded as unavailable revenues. Federal receivables are amounts due from the federal government to reimburse the State's expenditures incurred pursuant to federally funded programs. Federal grant revenues are accrued when the qualifying expenditure is incurred. Notes receivable in the General Fund consist primarily of Vermont Economic Development Authority notes purchased by the State. See Note V.C. – Contingent Liabilities for further information. No allowances for uncollectible amounts have been recognized in these notes receivable.

Inventories

Inventories of materials and supplies in governmental funds are recorded as expenditures when purchased. Inventories reported in the proprietary funds are valued at the lower of cost or market, except inventories reported in the Federal Surplus Property Fund (an enterprise fund) are reported at the federal acquisition cost. Cost valuation methods used in the various funds are as follows: weighted average method – Liquor Control enterprise fund, Vermont Life Magazine enterprise fund, Highway Garage internal service fund, and Offender Work Programs internal service fund; specific identification method – Vermont Lottery Commission enterprise fund, Federal Surplus Property enterprise fund, and State Surplus Property internal service fund; and first-in, first-out method – Postage internal service fund.

Prepaid Expenses

In the governmental funds, all purchases are recorded as expenditures when the invoice is entered for payment. In the proprietary and fiduciary funds, certain payments reflect costs applicable to future accounting periods and as such, are recorded as prepaid expenses. These prepaid items will be expensed as they are liquidated.

Capital Assets and Depreciation

Capital assets, which include property, plant, equipment, art and historical treasures, and infrastructure assets, are reported in the applicable governmental or business-type activities columns in the government-wide Statements of Net Position, and in the fund financial statements for the proprietary and fiduciary funds. All purchased capital assets are valued at historical cost or estimated historical cost, if actual historical cost is not available. Donated assets are valued at estimated fair market value on the date donated to the State.

Capital assets, except as stated below, have an initial cost of at least \$5,000, and that provide a future economic benefit for a minimum of 2 years. This includes buildings that are not considered to be part of an infrastructure asset. All land and land use rights, regardless of cost, are capitalized and are not depreciated. Infrastructure assets are defined as long-lived economic resources that are normally stationary in nature, utilized primarily by the general public as opposed to State employees, cost at least \$50,000 and provide future economic benefit for a minimum of 3 years. Normally, infrastructure assets are much greater in value, have a longer economic life, and can be preserved for a greater number of years than most capital assets. Software with a cost of at least \$50,000 and a useful life of more than two years, and internally generated intangible assets with a cost of at least \$150,000 and a useful life of more than one year are capitalized.

Capital assets are depreciated over their useful lives using the straight-line mid-month depreciation method. Useful lives for buildings are 5 to 50 years, equipment is 3 to 20 years, software is 3 to 10 years, and infrastructure assets are 7 to 80 years. Additional disclosures related to capital assets and assets acquired through capital leases are found in Notes IV. E. - Capital Assets - and IV. G. 3.- Lease Commitments - respectively.

When a capital asset is disposed of, its cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in income for the period. Repairs and maintenance are recorded as expenses. Significant renewals and improvements that increase the life expectancy are capitalized and deductions are made for retirements resulting from the renewals or improvements. Interest incurred on debt issued for construction of governmental activities capital assets is not capitalized.

The majority of the historic artifacts and collections that are maintained by the various State agencies and departments are not included in the capital asset reporting. The items not reported are protected and preserved, held for public exhibition and educational purposes and the proceeds from any sales of such items are used to acquire new items for the collection.

Deferred Outflows/Inflows of Resources

In addition to assets, the Statement of Net Position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, *deferred outflows of resources*, represents a consumption of net position that applies to a future period(s) and so will *not* be recognized as an outflow of resources (expense/expenditure) until then. The Primary Government only has one item that qualifies for reporting in this category, the unamortized balance of losses on bond refunding reported in the government-wide Statement of Net Position. A loss on a bond refunding results from the difference in the carrying value of refunded debt and its reacquisition price. This amount is deferred and amortized over the shorter of the life of the refunded or refunding debt.

In addition to liabilities, the Statement of Net Position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, *deferred inflows of resources*, represents an acquisition of net position that applies to a future period(s) and so will *not* be recognized as an inflow of resources (revenue) until that time. The Primary Government has only one type of item, which only arises under the modified accrual basis of accounting, that qualifies for reporting in this category, and that is *unavailable revenue*. Governmental funds report unavailable revenue in the balance sheet for revenue that is not available under the modified accrual basis. The amount is deferred and recognized as revenue in the period that the it becomes available.

Tax Refunds Payable

Tax refunds payable primarily represent amounts owed by the State to taxpayers because of overpayment of their income tax liabilities. Tax refunds payable, which reduce respective tax revenues, are accrued to the extent they are measurable based on payments and estimates. The amount reported as tax refunds payable at June 30, 2013 in the governmental funds statements is comprised of tax refunds for filed tax returns due and payable at June 30, 2013, and will be paid within sixty days. The amount reported as tax refunds payable at June 30, 2013 in the government-wide financial statements is comprised of estimated tax liability

overpayments for the first and second calendar quarters of year 2013's tax liability that will be paid out in calendar year 2014.

Arbitrage Rebate Obligations

In accordance with Section 148(f) of the U.S. Internal Revenue Code, the State must rebate to the U.S. Government the excess of interest earned from the investment of certain debt proceeds over the yield rate of the applicable debt. Arbitrage rebate, if any, is due and payable on each five-year anniversary of the respective debt issue. As of June 30, 2013, the primary government had no outstanding arbitrage rebate obligation. The arbitrage rebate liabilities reported by the discretely-presented component units are included in "Other Long-term Liabilities" in the government-wide statement of net position.

Compensated Absences

Compensated absences' liabilities include amounts for accumulated unpaid vacation, compensatory time, and personal leave credits. Classified State employees accrue vacation leave based on the number of years employed up to a maximum rate of 24 days annually and may not accumulate more than a maximum of 45 days (360 hours) at any one time. This liability is expected to be liquidated in future periods as either salary payments or cash payments upon termination of employment. Compensatory time and personal leave time accumulates as earned by the employees but must be taken within the subsequent year or be forfeited.

Liabilities for compensated absences are recorded in the government-wide statement activity where the employees are assigned, and in the funds, where applicable. The amounts are calculated based on an employee's pay rate in effect as of year-end. Additional information including changes in balances may be found in Note IV. G. 5. – Changes in Long-term Liabilities.

Employees earn sick leave credits based on the number of years employed with a maximum accrual rate of 21 days per fiscal year. Sick leave may only be liquidated if and when sickness or injury is incurred. Additionally, if employment is terminated, any sick leave that the individual may have accrued is forfeited without any payout; therefore, it is not an accruable liability to the State. There is no limit on the amount of sick leave an employee may accumulate.

Encumbrances

Contracts and purchasing commitments are recorded as encumbrances when the contract or purchase order is executed. When the terms of the purchase order or contract have been fulfilled and payment to the contracting party is due, the encumbrance is liquidated and the liability and expenditure are recorded. Encumbrances remaining at fiscal year-end are reported within the restricted, committed, or assigned fund balances of the governmental funds, as appropriate. The amount of the encumbrances remaining in the general fund, reported as assigned fund balances, is \$5,274,128.

Fund Balances

The fund balance amounts for governmental funds have been classified in accordance with GASB Statement No. 54—"Fund Balance Reporting and Government Fund Type Definitions." Fund balances are reported in classifications that comprise a hierarchy based primarily on the extent to which the government is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. As a result, amounts previously reported as reserved and unreserved are now reported as nonspendable, restricted, committed, assigned, or unassigned.

- Nonspendable fund balance includes items that cannot be spent. This includes activity that is not in a spendable form (inventories, prepaid amounts, long-term portions of loans or notes receivable, or property held for resale unless the use of the proceeds are restricted, committed or assigned) and activity that is legally or contractually required to remain intact, such as a principal balance in a permanent fund.

- Restricted fund balances have constraints placed upon the use of the resources either by an external party or imposed by law through a constitutional provision or enabling legislation.
- Committed fund balances can be used only for specific purposes pursuant to constraints imposed by a formal action of the Vermont Legislature, the State's highest level of decision-making authority. This formal action is the passage of a law by the legislature specifying the purposes for which amounts can be used. The same type of formal action is necessary to remove or change the specified use.
- Assigned fund balance includes amounts that are constrained by the State's intent to be used for a specific purpose, but are neither restricted or committed. For governmental fund types other than the General Fund, this is the residual amount within the fund that is not restricted or committed. In the General Fund, amounts are assigned by the Agency of Administration under authorization by the Legislature in the annual Budget Adjustment Act.
- Unassigned fund balance is the residual amount of the General Fund not included in the four categories above. Also, any deficit fund balances within the other governmental fund types are reported as unassigned.

When both restricted and unrestricted amounts are available for use, generally it is the State's policy to use restricted amounts first, with unrestricted resources utilized as needed. In the case of unrestricted resources, it is generally the State's policy to use committed amounts first, followed by assigned amounts, then unassigned amounts as needed. Additional information may be found in Note IV. H.—Fund Balance/Net Position

Bond Discounts, Premiums and Issuance Costs

In the government-wide financial statements, bond discounts or premiums are capitalized and amortized over the term of the bonds using the effective interest rate method. Bonds payable are reported net of the applicable bond premium or discount. Bond issue costs other than prepaid insurance are reported as expenses.

In the fund financial statements, governmental fund types recognize bond discounts, premiums and issuance costs in the period the bond proceeds are received. The face amount of the debt issued is reported as other financing sources. Premiums received on debt issued are reported as other financing sources while discounts are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds, are reported as expenditures.

Interfund Transactions

Interfund Loans – Short-term loans between funds outstanding at year-end for such things as cash overdrafts are recorded as Interfund Receivables/Payables. Advances To/From Other Funds represent long-term interfund loans receivable and payable.

Reimbursements – Reimbursements result when one fund makes an expenditure for a second fund when that expenditure or expense is properly applicable to the second fund. Reimbursement transactions reduce expenditures in the reimbursed fund and increase expenditures/expenses in the reimbursing fund.

Quasi-External Transactions – These transactions occur between two government funds that would be accounted for as revenue and expenditures if they occurred between a government entity and a private sector entity.

Transfers – These transfers encompass all types of transfers, except for the residual equity transfers, and are primarily routine transfers of appropriation resources between funds. Transfers are not revenue, expenditures, or expenses, and are classified as "Other Financing Sources (Uses)" in the operating statements of the governmental funds and in a separate subsection before net income in the proprietary funds.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts of assets and liabilities that affect the disclosure of contingent assets and liabilities as of the date of the financial statements, and that affect the reported amounts of revenues and expenses for the reporting period. Actual results could differ from these estimates.

Note II. RECONCILIATION OF GOVERNMENT-WIDE AND FUND FINANCIAL STATEMENTS

The governmental fund financial statements each include a schedule that reconciles the fund balance and net changes in fund balance in the fund financial statements to the net position and changes in net position in the government-wide financial statements. Differences between the two occur because the current financial resources measurement focus and modified accrual basis of accounting that is used in governmental funds must be converted to the economic resources measurement focus and accrual basis of accounting that is used in government-wide reporting. In addition, differences will occur because balances and transactions associated with interfund activity must be eliminated in the process of preparing the government-wide financial statements, including consolidation of internal service fund data into the governmental activities in the government-wide financial statements.

A. Explanation of Certain Differences Between the Governmental Fund Balance Sheet and the Government-wide Statement of Net Position

The governmental fund balance sheet includes a reconciliation between *fund balance—total governmental funds* and *net position—governmental activities* as reported in the government-wide statement of net position.

One element of that reconciliation explains that “capital assets used in governmental activities (net of internal service funds’ capital assets) are not considered financial resources for fund perspective reporting and, therefore, are not reported in the funds.” The details of this \$1,970,452,523 are as follows:

Land	\$ 127,458,849
Construction in progress	522,897,782
Works of art	127,803
Depreciable capital assets and infrastructure	
Capital assets	2,414,891,028
Less accumulated depreciation	<u>(1,094,922,939)</u>
 Net adjustment to increase <i>fund balances - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	 <u>\$ 1,970,452,523</u>

Another element of that reconciliation explains that “amounts are presented in the Statement of Net Position but are not presented in fund balances due to a different basis of accounting.” The details of this \$189,292,082 are as follows:

Long-term assets are not available to pay for current period expenditures and therefore are reported as unavailable revenues in the governmental funds	181,866,174
Deferred outflow for unamortized loss on sale of refunding bonds	<u>7,425,908</u>
 Net adjustment to increase <i>fund balance - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	 <u>\$ 189,292,082</u>

The final element of that reconciliation explains that “long-term liabilities, including bonds payable, are not due and payable in the current period and therefore are not considered financial liabilities for fund perspective reporting, and therefore, are not reported in the funds.” The details of this \$1,479,650,822 are as follows:

Bonded and capital lease debt (net of internal service funds' liability)	\$ (603,122,513)
Accrued interest payable on bonds	(8,615,940)
Intergovernmental payable - federal government (accrued interest)	(1,136,687)
Compensated absences (net of internal service funds' liability)	(29,925,369)
Tax refunds payable	(51,168,956)
Other long-term liabilities	<u>(785,681,357)</u>
 Net adjustment to reduce <i>fund balance - total governmental funds</i> to arrive at <i>net position - governmental activities</i>	 <u>\$ (1,479,650,822)</u>

B. Explanation of Certain Differences Between the Governmental Fund Statement of Revenues, Expenditures, and Changes in Fund Balances and the Government-wide Statement of Activities

The governmental fund statement of revenues, expenditures, and changes in fund balances includes a reconciliation between *net changes in fund balances—total governmental funds* and *changes in net position of governmental activities* as reported in the government-wide statement of activities.

One element of that reconciliation explains that “governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of these assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlay exceeded depreciation expense in the current period, net of internal service funds.” The details of this \$56,760,826 difference are as follows:

Capital outlay/functional expenditures	\$ 323,473,538
Expensed net book value of disposed assets	(166,722,189)
Depreciation expense	<u>(99,990,523)</u>
 Net adjustment to increase <i>net changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	 <u>\$ 56,760,826</u>

Another element of that reconciliation states that the issuance of long-term debt (e.g., bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position. Also, governmental funds report the effect of premiums, discounts, and similar items when debt is first issued, whereas these amounts are deferred and amortized in the statement of activities. This amount is the net effect of these differences in the treatment of long-term debt and related items. The details of this \$114,558,904 difference are as follows:

Bonds issued increases long-term debt in the statement of activities	\$ (104,005,000)
Refunding bonds issued increases long-term debt in the statement of activities	-
Bond premium is amortized over the life of the bonds in the statement of activities	(7,766,777)
Refunding bonds deferred outflow amortized to interest expense over life of refunded bonds	<u>(2,787,127)</u>
 Net adjustment to decrease <i>changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	 <u>\$ (114,558,904)</u>

Another element of that reconciliation states that “some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in governmental funds.” The details of this \$81,286,089 difference are as follows:

Increase in accrued interest payable	\$ (1,450,950)
Accreted interest on capital appreciation bonds	(153,488)
Decrease in compensated absences	1,566,675
Increase in employer pension and other postemployment benefit related costs	(77,514,510)
Increase in pollution remediation related costs	(4,616,811)
Decrease in intergovernmental payable - federal government (accrued interest)	801,620
Decrease in early retirement incentives	<u>81,375</u>
 Net adjustment to decrease <i>net changes in fund balances - total governmental funds</i> to arrive at <i>changes in net position of governmental activities</i>	 <u><u>\$ (81,286,089)</u></u>

Note III. STEWARDSHIP, COMPLIANCE AND ACCOUNTABILITY

A. Budgetary Information

Vermont statutes require the head of every State department, board and commission, and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years, in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of appropriations made under any appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts, including federal receipts, exceed the appropriated amounts, the receipts may be allocated and expended, subject to the approval of the Secretary of Administration. If, however, the expenditure of those receipts will establish or increase the scope of the program, which establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature.

B. Deficit Fund Balances/Net Position**Business-type Proprietary Funds**

Federal Surplus Property Fund ended fiscal year 2013 with both a deficit unrestricted net position and a total net position of \$259,588. The program continues to suffer from a lack of inventory for sale from the federal government that could in turn be retrieved for sale by the State. In 2013, the fund received additional capital from the General Fund in the amount of \$250,000. The plan going forward is to reduce the deficit by actively retrieving goods for sale to increase program sales in 2014. Given the program is popular with local governments further recapitalization from the General Fund would be required if sales continue to keep the program in a deficit position.

Vermont Life Magazine Fund ended fiscal year 2013 with a deficit unrestricted net position of \$1,659,239 and a deficit total net position of \$1,658,836. The Vermont Agency of Commerce & Community Development hired a publisher with business turn-around experience. The publisher advised the Agency in February of his intent to work with staff and the Vermont Life Advisory Board to balance Vermont Life Enterprise's operating budget by the end of fiscal 2015. In May, the Legislature gave Vermont Life Enterprise authority to generate revenues from additional sources. The fiscal 2013 consolidated loss increased the deficit total net position to \$1,658,836. On February 21, 2013, the publisher submitted a document to the Secretary of Commerce & Community Development outlining Vermont Life's strategies to balance the budget by the end of fiscal 2015. Some strategies, such as the reengineering of the Vermont Life Catalog, increased circulation revenue due to a direct mail campaign and lower introductory rates, and cost cutting in editorial took place as planned, and the resulting improvements to the bottom line will hopefully be evident after the end of the fiscal year.

Internal Service Funds

Single Audit Revolving Fund ended fiscal year 2013 with both a deficit unrestricted net position and a total net position of \$306,154. In part, the deficit can be attributed to fiscal year 2009 budget rescissions resulting in a transfer to the General Fund of \$196,000. The remaining deficit is due to estimated billing costs that were understated in prior year billings, but should be recovered through normal billing for services in future years.

Financial & HR Information Fund ended fiscal year 2013 with a deficit unrestricted net position of \$67,326 and a deficit total net position of \$34,458. This fund has had a fund surplus up until this year. This small deficit will be recovered through increased efficiencies in the program in the coming years. If the deficit continues to grow a small rate increase will be needed.

Communications & Information Technology Fund ended fiscal year 2013 with a deficit unrestricted net position of \$2,889,346 and a deficit total net position of \$334,449. The fund is made up of three different programs. The mainframe program has a large surplus that was reduced during fiscal year 2013 by \$190,000. The allocation program had an increase in its deficit; while telecom program had a large decrease in its surplus. The programs in total resulted in a deficit balance. Fiscal year 2014 should continue to see a reduction in the surplus from the mainframe program due to rate holidays, while the allocation program should see a reduction of its deficit through increased efficiencies.

Fleet Fund ended fiscal year 2013 with a deficit unrestricted net position of \$4,939,985. The unrestricted deficit is the result of the rolling annual replacement schedule for vehicles that are financed through the inter-fund payables. More importantly, the total net position is positive and is expected to remain in that position. A rate holiday or a possible payback of unused mileage charges is possible in 2014 to help reduce the overall program fund surplus.

Copy Center Fund ended fiscal year 2013 with a deficit unrestricted net position of \$3,289,695 and a deficit total net position of \$1,701,804. The print shop has increased its sales volume over the last few years which have helped to stabilize the fund. Sales volume is expected to continue to increase as a result of the administrative requirement that all state entities use the print shop when possible. The increased volume, however, may need to be supplemented with an increase in rates to keep up with the increasing cost of goods.

Postage Fund ended fiscal year 2013 with both a deficit unrestricted net position and a total net position of \$1,976,049. It is the intention that the current fund deficit will be recovered through business operations. An increase in the General Fund subsidy to cover the increasing cost of internal mail delivery and bomb screening has been budgeted for 2014 and 2015.

Facilities Operations Fund ended fiscal year 2013 with a deficit unrestricted net position of \$3,453,991 and a deficit total net position of \$3,552,179. The fund deficit will need to be recovered through increased billings. To do this a deficit reduction amount would need to be added to the fee for space rates.

Property Management Fund ended fiscal year 2013 with a deficit unrestricted net position of \$22,713,804 and a deficit total net position of \$22,710,701. The fund deficit continues to expand due to the lack of a revenue source to cover the ongoing operating expense of the program. The administration is exploring adding a surcharge to the existing leases to aid in covering these costs. The 20-year bonding of the three buildings in the program and the 50-year recovery period of the bond principle resulted in the lion's share of the fund deficit. As of 2013, only one building remains with bond principal payments.

Workers' Compensation Fund ended fiscal year 2013 with both a deficit unrestricted net position and a total net position of \$5,032,896. The rates for fiscal year 2014 include an additional \$1 million to help alleviate part of this fund deficit. In 2015, the fund deficit will be addressed in the rate setting process for departments and agencies. The workers' compensation program has an aggressive medical case management team that is striving to return injured employees back to work at the earliest possible signs of recovery. This goal should result in an improvement in the claims expense going forward.

Human Resources Fund ended fiscal year 2013 with both a deficit unrestricted net position and total net position of \$446,057. This program continues to grow beyond its initial plans and initial funding amounts. As the fund has now reached a more stable situation there should be no further increases to the deficit. Planned rate increases and program efficiencies will be used to offset the current deficit.

Governmental Fund Types

General Obligation Bond Projects Fund ended fiscal year 2013 with a negative unassigned fund balance of \$1,120,411. Spending authority for this fund is done through appropriations, while the bonds to pay for these expenses are not issued until the next fiscal year.

Special Fund ended fiscal year 2013 with a negative unassigned fund balance of \$5,337,970. This is due to payment of expenses for Tropical Storm Irene, while reimbursements are expected in later fiscal years.

NOTE IV. DETAIL NOTES ON ALL ACTIVITIES AND FUNDS

A. Cash and Cash Equivalents

Deposits for the primary government are governed by State statutes. When depositing public monies, the State Treasurer must act in accordance with 32 V.S.A. Chapter 431. Although the statute provides requirements for the collateralization of deposits, it does not establish limits. These limits are set by published formal guidelines issued by the State Treasurer.

The custodial credit risk for deposits is the risk that in the event of a depository financial institution failure, the government will not be able to recover funds deposited in the failed institution or will not be able to recover collateral securities that are in the possession of an outside party. Deposits are exposed to custodial credit risk if they are not covered by depository (FDIC) insurance and are uncollateralized; or collateralized with securities held by the pledging financial institution's trust department or agent, that are not registered in the depositor – government's name. Although State statute does not require deposits to be collateralized, the Treasurer requires the State's cash deposits held in its primary bank to be collateralized with either United States Treasury securities or Vermont municipal securities or other approved money market instruments, or

other collateral acceptable to the Treasurer. Certificates of deposit are collateralized, in whole or in part, on the basis of agreements with the bank, a protocol requiring periodic due diligence and review of bank capitalization and assets. Bank deposits in excess of the FDIC amounts and collateral agreements are uninsured and uncollateralized. Bank balances of deposits for the primary government, excluding pension trust funds, as of June 30, 2013, (including certificates of deposits) were \$377,193,075. Of these, \$1,571,644 was exposed to custodial credit risk as uninsured and uncollateralized.

The pension trust funds' cash deposits, outside of the pension trust funds' custodian bank, totaled \$11,576,772, none of which was exposed to custodial credit risk.

B. Investments

Primary Government—Excluding All Pension Trust Funds

Investments for the primary government are governed by State statutes. The State has an investment policy with an overriding goal of minimizing exposure to risk and maintaining liquidity necessary for future cash needs while maximizing the return on investments. Two sections of State statute govern the investment of the State's operating and restricted cash (i.e., non-pension funds).

When investing public monies, the State Treasurer must act in accordance with 32 V.S.A. 433. Types of investments allowed include obligations of the United States, its agencies and instrumentalities, and any repurchase agreements whose underlying collateral consists of such obligations or other approved money market instruments; certificates of deposit issued by banks and savings and loan associations approved by the State Treasurer; prime bankers' acceptances; prime commercial paper; tax exempt securities; and domestic money market funds. Also, the State Treasurer's Office issues additional formal guidance that is reviewed periodically, to assure that the three investment objectives -- safety, liquidity, and yield -- are met.

The statutory guidelines for certain trust funds are contained in 32 V.S.A. 434, referred collectively as the Trust Investment Account. These include the Tobacco Trust Fund, the Higher Education Trust Fund, the ANR Stewardship Fund, two Veterans' Home trusts, the Fish and Wildlife Trust, Vermont State Retirement OPEB Fund, and various small trusts.

The State Treasurer may invest funds in accordance with the standard of care established by the prudent investor rule and apply the same investment objectives and policies adopted by the Vermont State Employees' Retirement System, where appropriate, to the investment of funds in the Trust Investment Account.

Investments are stated at market value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at market value when published market prices and quotations are available, or at amortized cost, which approximates fair value. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

(a) Interest Rate Risk

Interest rate risk is the risk that changes in market interest rates will adversely affect the fair value of an investment. The primary government's investments, other than pension and investment trust funds' investments, at June 30, 2013 are presented as follows:

**Primary Government Investments - Excluding
Pension, Other Postemployment Benefits and Investment Trust Funds**
(Expressed in Thousands)

Investment Type	Fair Value	Investment Maturities (in years)			
		Less Than 1	1 to <6	6 to 10	More Than 10
Debt Investments					
US Agencies/Treasuries	\$ 30,580	\$ 211	\$ 731	\$ 437	\$ 29,201
Money Market Mutual Fund	246,824	246,824	-	-	-
Other	181	24	75	50	32
Total Debt Investments	277,585	\$ 247,059	\$ 806	\$ 487	\$ 29,233
Other Investments					
Equity Securities	241				
Mutual Funds	15,863				
US Unemployment Trust Pool	75,114				
Total Investments	\$ 368,803				

The above includes instruments that are classified as cash and short-term investments for balance sheet purposes. The following is a reconciliation of the investment types to the financial statement presentation (*in Thousands*).

**Primary Government Investments - Excluding
Pension, Other Postemployment Benefits and Investment Trust Funds**

Investments per maturity schedule	\$ 368,803
Included in cash & cash equivalents:	
Money market mutual fund	(240,459)
Certificates of deposit	103
US Unemployment trust pool	(75,114)
Financial statement investments total	\$ 53,333
Governmental activities total	\$ 50,732
Business activities total	1,757
Fiduciary - private purpose trust fund	844
Total	\$ 53,333

(b) Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributable to the monetary magnitude of the State's investment in a single issuer. While State statute does not establish ceilings, formal investment guidelines for operating funds limit the amount invested to 10% in any one issuer of commercial paper, corporate securities, or bankers' acceptances. There are no limitations for U.S. Government and Federal Agencies. Money market funds utilized by the State Treasurer's Office are highly rated and incorporate the requisite diversification. As of June 30, 2013, no single issuer exceeded 5% for the primary government portfolios.

(c) Custodial Credit Risk

For investments, custodial credit risk is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The State has no formal policy on custodial credit risk but maintains contractual relationships with custodian banks that provide coverage and define the procedures. As of June 30, 2013 all securities were registered in the name of the State at its custodian bank. Investments in open-end mutual funds are not exposed to custodial risk because their existence is not evidenced by specific securities.

(d) Credit Risk

Credit risk is the possibility that the issuer or other counterparty to an investment may default on their obligations. In non-pension funds this risk has been mitigated by implementing statutory guidelines on credit quality and further restricted by formal investment guidelines and the use of low-risk money market instruments. The credit risk associated with the State's debt securities, money market funds, bond mutual funds, and other pools of fixed income securities, exclusive of pension fund investments, as of June 30, 2013, is presented as follows using the Moody's rating scale.

**Primary Government Rated Debt Instruments Excluding
Pension, Other Postemployment Benefits and Investment Trust Funds**
(Expressed in Thousands)

<u>Debt Investments</u>	<u>Fair Value</u>	<u>Quality Ratings</u>	
		<u>Aaa</u>	<u>Unrated</u>
US Agencies/Treasuries	\$ 30,580	\$ 30,580	\$ -
Money Market Mutual Fund	246,824	246,824	-
Other	181	-	181
Totals	\$ 277,585	\$ 277,404	\$ 181

(e) Foreign Currency Risk

Foreign currency risk is the extent to which changes in exchange rates affect the value of an investment. Vermont's operating funds are restricted, through statute and formal guidelines, to specific money market instruments and money market funds who only invest in domestic instruments. In the Trust Investment Account portfolio, total exposure to foreign currency risk as of June 30, 2013, was \$0.

Primary Government—Pension , Other Postemployment Benefits and Investment Trust Funds

The State has three defined benefit plans (Vermont State Retirement System (VSRS), State Teachers Retirement System (STRS), and Vermont Municipal Employees' Retirement System (MERS)); three defined contribution plans (VSRS, MERS, and Single Deposit Investment Account); and two other postemployment benefit funds. Additional information on these plan benefit and actuarial valuations may be found in Note IV.G.4.—Pension and Other Postemployment Benefits.

By statute, the assets of the three defined benefit plans are invested on behalf of each plan's Trustees through the Vermont Pension Investment Committee (VPIC), which was established by the Vermont Legislature (Title 3 V.S.A. Chapter 17), effective July 1, 2005, to combine the assets of the VSRS, STRS and MERS defined benefit plans for the purpose of (i) investment in a manner that is more cost- and resource-efficient; (ii) improving the effectiveness of the oversight and management of the assets of the Retirement Systems; and (iii) maintaining the actuarial, accounting, and asset allocation integrity of the Retirement Systems. The majority of these assets have been pooled for investment purposes. Effective May 31, 2006, legislation amended VPIC's authority allowing VPIC to enter into agreements with municipalities administering their own retirement systems to invest retirement funds for those municipal plans.

On November 1, 2007, the City of Burlington, Vermont pooled its investments with the majority of the assets of the State, Teachers and Municipal defined benefit plans pursuant to a change in State statute permitting Vermont municipalities to pool their funds with the VPIC thereby creating an "external investment pool." An "external investment pool" is defined by GASB 31 as the commingling and investing of the monies of more than one legally separate entity, on the participants' behalf, in an investment portfolio. In this case, one of the participants, the City of Burlington, is not part of the State's reporting entity. Each of the participating funds has an equity position in the external pool and individual investment securities are not specifically identified to any of the participating funds. As a result, the "pooled investment" is a net equity position, incorporating the results of the underlying securities, receivables and liabilities. Earnings in each pooled investment are allocated based on the month-end balances of each of the respective systems.

The three defined benefit plans and the City of Burlington's assets managed by VPIC are externally managed in the pool established July 1, 2005 with a startup share price of \$1,000. Ownership in the pool is based on the number of shares held by each member. The net asset value per share is determined by dividing the total fair value of the net assets of the pool by the number of shares of the pool outstanding on the valuation date. Contributions to and withdrawals from the pool are based on the beginning of the day net asset value per share on the day of the transaction.

The pool's net position and statement of changes in net position are as follows.

All three defined benefit plans managed by the State have adopted a common asset allocation as determined by the Vermont Pension Investment Committee. As of October 29, 2009, the VPIC adopted a set of investment policies and guidelines common to all three defined benefit plans. These are used by VPIC with the objective of maximizing returns within acceptable risk parameters.

The State's Single Deposit Investment Account (SDIA), a non-contributory defined contribution plan, is invested in a commingled stable bond fund. The investment policy governing the SDIA portfolios includes a minimum average credit quality of double-A, no bonds rated below investment grade, and limitations on asset-

backed, mortgage-backed, collateralized Mortgage Obligations, corporate bonds, and single issuers of non-treasury/government agency backed bonds.

The Vermont State Retirement's defined contribution plan's trustee is the State Treasurer. The Vermont Municipal Employees' Retirement System Board of Trustees is the trustee for the Vermont Municipal Employees' defined contribution plan. Both plans are administered by Fidelity Investments Institutional Operations Company. Investment choices are made by participants from a range of funds approved by the trustees' for the plans. Investment options are Fidelity and non-Fidelity mutual funds including large and small market capitalization equities (actively managed and indexed), international equities, fixed income securities, balanced funds, target retirement date age based funds, and a stable value fund. Funds included in the plans were selected based on consideration of fund performance for one and multi-year periods, performance ranked against peer group funds in asset class, management fee expense ratios, fund asset class and investment objectives, historical annual returns, Morningstar ratings, performance in various stages of the capital market cycle, and consultant recommendations as to the optimal number of funds and appropriate asset classes. Fidelity provides quarterly investment reports and analysis that are reviewed by Treasury staff, the State Treasurer and Vermont Municipal Employees' Retirement's Board.

The State has two other postemployment benefit funds, the Vermont State Postemployment Benefits Trust Fund (State OPEB) and the Vermont Municipal Employees Health Benefit Fund (Muni OPEB). The "State OPEB" is invested in the Trust Investment Account utilized as an investment vehicle by many of the State's primary funds, exclusive of pension funds, and is included in the cash and investment disclosures for the primary government as is its cash deposits. The "Muni OPEB" is invested under the authority of the Municipal Retirement Board of Trustees and utilizes an outside administrator, ICMA-RC employing mutual funds.

Investments are stated at market value in the case of marketable securities and at estimated fair value for certain nonmarketable securities. Money market and other short-term investments are reported at market value when published market prices and quotations are available, or at amortized cost, which approximates fair value. Real estate is carried at the net asset value of each retirement system's real estate fund investments, which net asset value is further based on the fair market value of the real properties. Properties' fair market values in each of the retirement systems' fund investments are established quarterly by real estate fund manager appraisals and are validated at least yearly by third-party property appraisals. Nonmarketable securities include alternative investments such as private equity and venture capital, which are valued using current estimates of fair value obtained from the investment manager in the absence of readily determinable public market values. Such valuations generally consider variables such as the high, medium, and low values for portfolio investments; the investments' exit timetables, and the status of any proceedings leading to a liquidity event; the financial performance of investments, including comparison of comparable companies' earning multiples; cash flow analysis; and recent sales prices of investments. Management at the State Treasurer's Office is responsible for the fair value measurements of investments reported in the financial statements. The State Treasurer's Office has implemented policies and procedures to assess the reasonableness of the fair values provided; the Office believes that reported fair values at the balance sheet date are reasonable.

a) Interest Rate Risk

As pension trust funds have a different investment term horizon based on a long average liability term, the VPIC manages exposure to fair value loss arising from movements in interest rates by establishing duration guidelines with its debt securities with Core, Core Plus and Global Fixed Income investment managers, requiring that the duration be within a specified percentage of the duration band of the appropriate benchmark index. In the case of domestic Core Fixed Income managers the average duration (interest rate sensitivity) of an actively managed portfolio shall not differ from the appropriate passive benchmark's duration by more than +/- 25 percent. The Core Plus portfolio restriction is +/- two years around the passive benchmark duration. With respect to Global Fixed Income portfolios, current portfolio durations are restricted to a range of one to ten years. High yield fixed income portfolios prices and yields are not as directly correlated with the general level of interest rates and are duration monitored but not duration restricted. The calculation of the duration of mortgage backed securities involves assumptions as to the expected future prepayment rate for the security. The Managers are required to calculate duration at the time of initial purchase and on a routine basis to

maintain compliance with these guidelines. Fixed income managers are required to report portfolio characteristics quarterly inclusive of portfolio duration as a measure of portfolio interest rate sensitivity. Pension, Other Postemployment Benefits and Investment Trust Funds investments are as follows:

**Pension, Other Postemployment Benefits, and
Investment Trust Funds' Investments**
(Expressed in Thousands)

Investment Type	Fair Value	Less Than 1	1 to <6	6 to 10	More Than 10

Equity Securities	755,549				
Real Estate - Venture Capital	179,625				
Fixed Income - Derivatives	2,588				
Total	\$ 3,824,258				

(b) Concentration of Credit Risk

Formal guidelines for pension funds state that no more than 5% of the market value of a portfolio's domestic fixed income assets may be invested in the debt securities of any one issuer. No limitations on issues and issuers shall apply to obligations of U.S. Government and Federal Agencies. As of June 30, 2013, no issuer exceeded 5%.

(c) Custodial Credit Risk

Custodial credit risk for investments is the risk that a government will not be able to recover the value of an investment or collateral securities that are in the possession of an outside party if the counterparty to the transaction fails. The VPIC manages exposure to custodial credit risk by requiring all relevant investment managers to hold investments in separate accounts with VPIC's custodian. VPIC guidelines specify the custodial requirements for these accounts and the duties of the Managers and the custodian. As of June 30, 2013, all securities were registered in the name of the State at its custodian bank. Investments in pools, open-end mutual funds, and other investments not evidenced by specific securities are not categorized.

(d) Credit Risk

Detailed pension guidelines by asset class and supplemental requirements by investment manager are used to set risk parameters and are stated in written contracts. These guidelines are reviewed and adopted by

VPIC. Treasury staff and independent investment consultants are utilized to assure compliance. The credit risks associated with these securities are as follows:

**Pension, Other Postemployment Benefits, and

e) Foreign Currency Risk

Unless VPIC stipulates specific exceptions to the guidelines, the global bond portfolio may hold no more than 30% of its assets, at market value, or 120% of each country's benchmark weight (whichever is greater) in the debt securities of any single foreign government or non-U.S. government entity. For the purposes of this calculation, all countries within the European Single Currency shall count as one country. Single non-government debt security limitations are also set for the global bond portfolio. In the case of equities, the investment manager is afforded flexibility in the number of issues held and their geographic or industry distribution, provided that equity holdings are within the lesser of established percentage ranges in relative to single holding limitations and a stock's weighting in the style benchmark against which the manager is measured. Most foreign currency exposure is in the pension and investment trust funds' portfolios. The value in US dollars by foreign currency denomination and type of investment is as follows:

**Pension, Other Postemployment Benefits, and
Investment Trust Funds' Investments**
Foreign Currency Risk - International Securities at Fair Value
(Expressed in Thousands)

Formal investment policy guidelines adopted by the VPIC state that international equity managers may enter into forward exchange contracts on currency provided that use of such contracts is designed to dampen portfolio volatility and facilitate securities transaction settlements rather than leverage portfolio risk exposure. In global fixed income accounts, opportunistic currency positioning may be utilized to hedge and cross-hedge the portfolio's currency risk exposure or in the settlement of securities transactions. The managers may vary the total portfolio exposure to currency from fully unhedged to fully hedged. The global fixed income managers are permitted to hedge all, some, or none of the portfolio's currency exposure. They are permitted to cross-hedge currency positions, but may not net short any currency, or net long more than 100% of the portfolio. VPIC has funds allocated to a global allocation asset manager in the form of shares of a commingled trust. The manager for this trust may enter into long and/or short positions in currencies of the countries represented in established indices. The strategy is permitted to cross-hedge currency exposure and will actively manage its currency exposure. This active management may go beyond fully-hedged or unhedged currency exposure, and is provided for by a specific exemption to the VPIC general guidelines.

Derivative Financial Instruments

Vermont Pension Investment Committee (VPIC) policy authorizes certain investment managers (Managers) to invest in derivative financial investments. Derivatives are financial arrangements between two parties whose payments are based on, or "derived" from, the performance of some agreed upon benchmark. Disclosures related to derivatives positions required under Governmental Accounting Standards Board Statement No. 53 – "Accounting and Financial Reporting for Derivative Instruments" (GASB No. 53) apply only to those derivative instruments held directly by the VPIC on behalf of the defined benefit plans and the external investment trust

and not those held within commingled fund investment vehicles. The Pension and Other Postemployment Benefit Trust Funds do not have hedgeable assets or liabilities, and all derivative instruments are considered investment derivatives, with corresponding changes in fair value reported in investment income. The fair value of all derivative financial instruments are reported in the Statement of Fiduciary Net Position. All of the derivatives reported at June 30, 2013, are at fair value.

The fair value balances and notional amounts of derivative instruments outstanding at June 30, 2013, classified by type, and the changes in fair value of such derivative instruments for the year then ended are as follows:

	Changes in Fair Value		Fair Value at June 30, 2013		Notional
	Classification	Amount	Classification	Amount	
Fiduciary Funds					
Investment derivatives					
Currency forwards					
FX forwards	Investment revenue	\$ 1,970,810	Investment	\$ -	\$ (293,469,615)
Options					
Fixed income options	Investment revenue	(488,359)	Investment	(612,163)	(47,500,000)
Foreign currency options	Investment revenue	4,331	Investment	(2,169)	(1,200,000)
Swaps					
Credit default swaps	Investment revenue	(725,445)	Investment	366,145	24,136,813
Fixed interest rate swaps	Investment revenue	2,530,524	Investment	2,525,525	1,038,376,169

Derivative instruments may be used for any of the following purposes;

- To gain market exposure.
- To convert financial exposure in a given currency to that of another currency (e.g., to hedge Japanese Yen exposure back to the U.S. dollar). Any and all international Managers may enter into foreign exchange contracts on currency provided that: a) such contracts are one year or less, and b) use of such contracts is limited solely and exclusively to hedging currency exposure existing within the Manager's portfolio. There shall be no foreign currency speculation or any related investment activity, with the exception of currency hedging Managers who enter into currency hedging will be guided by specific risk parameters in their contracts.
- To adjust the duration of a bond portfolio in a manner that is consistent with the accepted approach of the Manager and other contract terms applicable to the Manager.
- To make portfolio adjustments that are consistent with other elements of the VPIC's investment policies and that do not systematically increase risk or expected volatility of the rate-of-return of the total portfolio.
- For trading purposes which are intended to enhance investment returns. This purpose is subject to the requirement that it be consistent with other elements of the VPIC's investment policies and that it does not systematically increase the risk or expected volatility of the rate of return of the total portfolio.

All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC Portfolio. Separately managed funds include the following reporting requirements: a list of all derivative positions as of quarter-end; an assessment of how the derivative positions affect the risk exposures of the total portfolio; an explanation of any significant pricing discrepancies between the Manager and custodian bank; an explanation of any non-compliance. Commingled funds provide the VPIC

with a quarterly list of derivative positions and assessment of the effect on the risk exposure of the portfolio.

For derivative securities, the Custodian Bank is required to obtain two independent prices, or to notify the VPIC that two independent prices are not available. Managers are required to reconcile the valuations of all derivatives positions on a monthly basis with the Custodian Bank. Derivatives, which are futures contracts, are Commodity Futures Trading Commission approved and exchange-traded. Options may either be exchange-traded or traded over-the-counter (OTC).

Futures represent commitments to purchase (asset) or sell (liability) securities at a future date and at a specified price. Futures contracts are traded on organized exchanges (exchange traded) thereby minimizing the VPIC's credit risk. The net change in the futures contracts value is settled daily in cash with the exchanges. Net gains or losses resulting from the daily settlements are included with trading account securities gains (losses) in the Statement of Changes in Fiduciary Net Position.

Currency forwards represent forward foreign exchange contracts that are entered into in order to hedge the exposure to changes in foreign currency exchange rate on the foreign currency dominated portfolio holdings. A forward foreign exchange contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in the net realized gains or losses on foreign currency related transactions in the Statement of Changes in Fiduciary Net Position.

Only forward currency contracts are defined as derivatives per GASB No. 53 are reported above; currency spot contracts are not included.

Risk of loss arises from changes in currency exchange rates. At June 30, 2013, currency forward positions consisted of pending foreign exchange sales of \$1,970,810.

Options represent or give buyers the right, but not the obligation, to buy or sell an asset at a preset price over a specified period. The option's price is usually a small percentage of the underlying asset's value. As a writer of financial options, the VPIC receives a premium at the outset of the agreement and bears the risk of an unfavorable change in the price of the financial instrument underlying the option. As a purchaser of financial options, the VPIC pays a premium at the outset of the agreement and the counterparty bears the risk of an unfavorable change in the price of the financial instrument underlying the option.

Swaps represent an agreement between two or more parties to exchange sequences of cash flows over a period in the future. At June 30, 2013, the VPIC had two different types of swap arrangements; interest rate swaps and credit default swaps. In the most common type of interest rate swap arrangement, one party agrees to pay fixed interest payments on designated dates to a counterparty who, in turn, agrees to make return interest payments that float with some reference rate. The interest rate swaps allowed the VPIC to effectively convert long term variable interest investments into fixed interest rate investments. Credit default swaps are used to manage credit exposure without buying securities outright. Gains and losses on swaps are determined based on market values and are recorded in the Statement of Changes in Fiduciary Net Position.

Counter-party creditworthiness, for non-exchange traded derivatives, shall be at a minimum of "A3" as defined by Moody's Investor Service, "A-" by Standard & Poor's, and "A-" by Fitch. The use of counter-parties holding a split rating with one of the ratings below A3/A- is prohibited. The use of unrated counter-parties is prohibited. Individual counter-party exposure, for non-exchange traded commodity derivatives, is limited to 50% of the notional amount of the VPIC Portfolio commodity derived exposure. An exception is allowed if the total commodity derivative exposure is less than \$3 million. Any entity acting as counter-party must be regulated in either the United States or the United Kingdom. All other uses of derivatives are prohibited unless specifically approved by the VPIC. Managers are expected to have internal risk management programs in place to ensure that derivatives-based strategies do not result in inappropriate risks to the VPIC portfolio. For fiscal year 2013 all counterparties for derivatives met the VPIC counterparty risk rating requirements.

The following shows the market value of credit exposure per Moody's ratings at June 30, 2013.

<u>Moody's Rating</u>	<u>Market Value</u>
Aa3	\$ 1,574
A1	435,722
A2	413,740
A3	587,002
Baa1	<u>753,602</u>
Total	<u>\$ 2,191,640</u>

In addition, Manager credit research teams are tasked with evaluating potential counterparties for their creditworthiness as counterparties, not relying on ratings agencies alone. Managers evaluate individual counterparties using various methods of credit analysis: company visits, reports, earnings updates and take into account other factors, including the broker's/dealer's reputation for sound management, the past experience of the manager with the broker/dealer, market levels for its debt and equity, its quality of liquidity provided and its share of market participation. At June 30, 2013, risk concentrations are as follows:

<u>Counterparty Name</u>	<u>Percentage of Net Exposure</u>	<u>S&P Rating</u>	<u>Fitch Rating</u>	<u>Moody's Rating</u>
Morgan Stanley Capital Services LLC	34%	A-	A	Baa1
Citibank NA	20%	A	A	A3
Deutsche Bank AG	19%	A	A+	A2
HSBC BANK USA, N.A.	18%	AA-	AA-	A1
Royal Bank of Scotland PLC	6%	A-	A	A3
Credit Suisse International	2%	A	A	A1
Bank of America NA	1%	A	A	A3
Goldman Sachs Bank USA	0%	A	A	Aa3
Barclays Bank PLC	0%	A	A	A2
BNP PARIBAS S.A.	0%	A+	A+	A2

VPIC's Managers use master agreements and may receive additional protection through the collateralization requirements, which helps to mitigate a party's exposure to another party in the event of a default or termination event by requiring the pledging/posting of assets to the other party to secure any outstanding obligations under certain transactions. By regular, generally daily, movement of collateral on forward settling trades, VPIC's exposure to any particular counterparty can be reduced. Collateral movement threshold for securities under the master forward agreements typically ranges from \$0 to \$250 thousand per account, depending on the particular counterparty. Managers require daily posting of collateral with many of our counterparties.

VPIC does not have a formal policy regarding master netting arrangements. As a general practice, Managers use industry standardized contracts, generally known as "master agreements" or "netting agreements," counterparty risk is reduced by providing parties to a transaction the ability to close out and net its total exposure to a counterparty in event of a default with respect to all transactions governed under that particular agreement. These agreements (ISDA Master Agreement and Credit Support Annex, Master OTC Options Agreement, Master Securities Forward Transaction Agreement, Global/Master Repurchase Agreement) allow parties to a transaction to know their legal rights and obligations, in addition to an ability to net. Managers generally put master agreements in place on behalf of each account it manages and each separate counterparty legal entity with which it transacts. The maximum amount of loss VPIC would face in case of default of all counterparties as of June 30, 2013 consists of the aggregated fair value of OTC positions in the amount of \$2,191,640.

Derivative instruments often contain credit-risk-related contingent features that could result in an immediate payment to the counterparty. For example, a material adverse change clause could provide the counterparty with the right to early terminate the derivative agreement. Alternatively, it could provide a basis for renegotiating the agreement if specific events occur, such as a downgrade of the entity's credit rating below investment grade. These provisions may include an obligation to post additional collateral in instances where the credit-risk contingent feature is triggered or the counterparty is provided the right to terminate the agreement early.

The VPIC funds hold mortgage-backed securities including collateralized mortgage obligations (CMOs) at fair value. Mortgage-backed securities represent a direct interest in a pool of mortgage loans. CMOs are bonds that are collateralized by whole loan mortgages, mortgages pass-through securities, or stripped mortgage-backed securities. Income is derived from payments and pre-payments of principal and interest generated from collateral mortgages. Cash flows are distributed to different investment tranches in accordance with the payment order established for the CMO instrument. Cash flows associated with these tranches may demonstrate varying degrees of sensitivity to interest rate fluctuations. A reduction in interest rates may cause some of the tranches to experience a reduction in fair value as prepayments reduce the interest payments, causing a decline in total cash flows. In a rising interest rate environment, an increase in interest payment and cash flows may cause an increase in fair value.

Risk is minimized through the purchase of high quality instruments with limited default or prepayment risk. Agency fixed and floating rate pass-through, U.S. Treasury securities and cash equivalents can be held without limitation. Securities designed to provide more precisely targeted maturities (Sequential Collateralized Mortgage Obligations) and those that create tranches, or Planned Amortization Classes (PAC I and PAC II), with cash flows that are protected from prepayment changes within certain limits, may also be purchased without limitation. Policy restrictions and portfolio percentage limitations are established for the purchase of more interest rate sensitive instruments and certain interest rate and price stress tests are required.

Asset-backed securities are collateralized by a loan, lease, or receivable other than real estate. Payments are collected by a servicer through a "pass-through" arrangement. As monthly payments of principal and interest are made, the pass-through security holder is entitled to a pro rata portion of the payments received. Risk of pre-payment varies with the underlying assets. Risk is minimized through the purchase of high quality instruments with limited default or prepayment risk.

C. Receivables

Accounts receivable at June 30, 2013 are summarized as follows:

D. Interfund Balances

1. Due From/To Other Funds

Due from/to other funds represents amounts owed to one State fund by another, for goods sold, services received or reimbursement of costs. The balances of due from/to other funds at June 30, 2013, are as follows.

Due to Other Funds				
Governmental Funds				
Due From Other Funds	Transportation			
	General Fund	Fund	Education Fund	Special Fund
General Fund	\$ -	\$ 11,141	\$ -	\$ 118,629

Total	\$ 73,594	\$ 260,217	\$ 215	\$ 1,547	\$ 113,811,076

2. Advances To/From Other Funds

The General Fund has made cash advances to certain proprietary funds for imprest petty cash disbursements needs. The General Fund advances to other funds at June 30, 2013, are summarized below.

Proprietary Funds	
Vermont Lottery Fund	\$ 300,000
Liquor Control Fund	75
Non-major Proprietary Funds	<u>1,200</u>
Total	\$ <u>301,275</u>

3. Interfund Receivables/Payables

The primary government cash in most funds is pooled in the State Treasurer's accounts. When a fund has a deficit cash balance, this amount is reclassified to a liability account - interfund payable. The General Fund reports the corresponding interfund receivable for the cash borrowed from the pool. The following funds at June 30, 2013, reported interfund payables. It is expected that certain amounts due the General Fund from the Internal Service Funds will not be repaid within one year. It is expected that these interfund payables will be reduced in future years through changes to billing rates and management of operations.

Proprietary Funds	
Non-major Enterprise Funds	\$ 1,989,818
Internal Service Funds	108,133,972
Fiduciary Funds	
Investment Trust Fund	159,280
Agency Funds	<u>300,146</u>
Total	\$ <u>110,583,216</u>

4. Inter - Primary Government/Component Unit Balances

Advances to component units consist of the amounts advanced under various agreements with component units to use the funds for specific programs. As the component unit uses the funds, the advance is reduced and expenditures are recognized by the State. At June 30, 2013, the General Fund advances to component units was \$737,472 advanced to the Vermont Development Authority for interest rate subsidies and grants to be issued at the direction of State agencies. The Special Fund advance was \$572,826 to VEDA for emergency flood relief loans.

Due from component units/Due to primary government consist of the amounts owed to the primary government for programs administered by component units, in accordance with memoranda of understanding with State departments, and for the elimination of negative balances in the State Treasurer's pooled cash. Due from primary government/Due to component units consist of amounts appropriated from the primary government's funds to the component units that had not been disbursed by fiscal year end.

At June 30, 2013, these account balances are as follows.

	Vermont Housing & Conservation Board	Vermont Economic Development Authority	Total
Due from Component Units			
General Fund	\$ 2,759,649	\$ -	\$ 2,759,649
Special Fund	-	50,799	50,799
Federal Fund	-	5,667	5,667
Due to Component Units			
Non-major Governmental Funds	<u>(152,240)</u>	<u>-</u>	<u>(152,240)</u>
Total	\$ <u>2,607,409</u>	\$ <u>56,466</u>	\$ <u>2,663,875</u>

5. Interfund Transfers

Transfers between funds occur when one fund collects revenues and transfers the assets to another for expenditure or when one fund provides working capital to another fund. All transfers are legally authorized by the Legislature through either statute or Appropriation Acts.

The Education Fund received transfers from the General Fund and the Vermont Lottery Commission to support the general State grant for local education. The Special Fund received transfers from the General Fund for Emergency Relief Assistance and Home Heating Fuel Assistance Funds, from the Federal Revenue Fund for the earned income tax credit for the year, and from the Global Commitment Fund for education Medicaid reimbursements. The Global Commitment Fund received transfers from the General and Special Funds for Medicaid related services provided under the Vermont Global Commitment to Health Medicaid waiver.

Interfund transfers for the fiscal year ending June 30, 2013, are on the following page.

Depreciation on capital assets held by Internal Service Funds	<u>8,575,905</u>		
Total	\$ <u>108,566,428</u>		

2. Impairment of Capital Assets

During the fiscal year ended June 30, 2012, the State recognized impairment losses for damage caused by Tropical Storm Irene. In accordance with GASB Statement No. 42, *Accounting and Financial Reporting for Impairment of Capital Assets and for Insurance Recoveries*, insurance recoveries during the year were used to offset the amount of loss that was recognized. During the fiscal year ended June 30, 2013, additional insurance recoveries in the amount of \$11,000,000 were received and recorded as revenues. This amount represents an initial settlement with the insurance company. Additional recoveries are expected; however the amounts are subject to negotiations with the company and cannot be reasonably estimated at this time.

F. Deferred Outflows and Deferred Inflows

Deferred outflows in the government-wide Statement of Net Position consist of the unamortized balance of losses related to refunding of debt. The difference between the reacquisition price (the amount placed in escrow to pay for advance refunding) and the net carrying amount of the old debt, is reported as a deferred outflow and recognized as a component of interest over the remaining life of the old debt or the life of the new debt, whichever is shorter.

Balance, July 1, 2012	\$ 10,213,035
Current year amortization	<u>(2,787,127)</u>
Balance, June 30, 2013	<u>\$ 7,425,908</u>

Deferred inflows in the governmental funds Balance Sheet consist of unavailable amounts related to revenue recognition. Revenues and other governmental fund financial resources are recognized in the accounting period in which they become both available and measurable. When an asset is recorded in governmental fund financial statements but the revenue is not available, a deferred inflow of resources is reported until such time as the revenue becomes available.

G. Long-term Liabilities

1. General Obligation Bonds Payable

General obligation bonds payable have been authorized and issued primarily to provide funds for acquisition and construction of capital facilities for higher education, public and mental health, correctional facilities, environmental conservation purposes, maintenance and construction of highways, assistance to municipalities for construction of water and sewage systems, and local schools.

Once authorized by the Legislature, the State Treasurer, with the approval of the Governor, may issue general obligation bonds. Except for zero coupon capital appreciation bonds, the bonds are to be payable in substantially equal or diminishing amounts, the first such payment to be payable not later than five years after the date of the bonds, and the last such payment to be made no later than twenty years after the date of the bonds.

Special obligation transportation infrastructure bonds are limited obligations of the State of Vermont payable from and secured solely by a pledge of funds held in trust by the Peoples United Bank in accordance with the terms of a Trust Agreement. Funding sources for the pledged funds are funds to be received from the Motor Fuel Infrastructure Assessments as authorized by Act 50 of the 2009 legislative session. The proceeds from this issue are expected to be expended for transportation infrastructure purposes, namely the rehabilitation or replacement of five State bridges, construction of one roadway capacity project.

The changes in bonds principal payable for fiscal year 2013 are summarized in the following schedule.

	General Obligation Bonds	Special Obligation Bonds	Total Obligation Bonds
Balance, July 1, 2012	\$ 506,256,565	\$ 13,260,000	\$ 519,516,565
Additions:			
Issuances	93,185,000	10,820,000	104,005,000
Accretions	153,488	-	153,488
Total	93,338,488	10,820,000	104,158,488
Deductions:			
Redemptions	(52,260,000)	(990,000)	(53,250,000)
Total	(52,260,000)	(990,000)	(53,250,000)
Balance, June 30, 2013	\$ 547,335,053	\$ 23,090,000	\$ 570,425,053

On December 1, 1993, the State issued capital appreciation bonds with a maturity value of \$32,625,000 maturing on August 1 in the years 1999 through 2013. The proceeds from these bonds totaled \$17,987,640. These bonds have a remaining maturity value of \$2,000,000 and an accreted value of \$1,945,053 at June 30, 2013.

General obligation and special obligation transportation infrastructure bonds outstanding at June 20, 2013, are shown on the following page:

General Obligation and Special Obligation Transportation Infrastructure Bonds Outstanding at June 30, 2013

2. Bond Refundings

During fiscal years 2004, 2005, 2010, and 2012, the State defeased "in-substance" certain general obligation bonds by issuing new bonds and by placing the proceeds of these new bonds in an irrevocable trust. These trust assets are utilized to make all debt service payments on the defeased bonds. Accordingly, these trust assets and the liability for the defeased bonds are not included in the State's financial statements.

The total amount of defeased bonds remaining outstanding at June 30, 2013, is \$79,280,000.

3. Lease Commitments

A. Operating Leases

The State is committed under various operating leases covering real property (land and buildings) and equipment. Although lease terms vary, certain leases continue subject to appropriation by the General Assembly. If continuation is reasonably assured, leases requiring appropriation by the General Assembly are considered non-cancelable leases for financial reporting purposes. It should also be noted that the State is currently negotiating a small number of operating leases on which rent is being paid on a month-by-month basis and for which there is no signed agreement. These leases have not been included in the following table.

Total lease payments paid by the primary government in fiscal year 2013 was \$15,072,511 for operating leases of which \$14,989,425 was paid for property leases, \$58,537 for equipment leases and \$24,549 for cancellable land rentals.

The following is a summary of the estimated future minimum rental commitments under operating leases for real property and equipment at June 30, 2013:

<u>Fiscal Year</u>	<u>Primary Government</u>		
	<u>Non-Cancelable Leases</u>	<u>Cancelable Leases</u>	<u>Total</u>
2014.....	\$ 13,097,386	\$ 9,634	\$ 13,107,020
2015.....	10,175,272	9,881	10,185,153
2016.....	7,528,380	1,394	7,529,774
2017.....	6,097,689	784	6,098,473
2018.....	5,633,940	453	5,634,393
2019 - 2023....	21,947,088	2,265	21,949,353
2024 - 2026....	226,137	1,359	227,496
Totals	<u>\$ 64,705,892</u>	<u>\$ 25,770</u>	<u>\$ 64,731,662</u>

B. Capital Leases

The State has entered into capital lease arrangements to acquire various items of machinery and equipment and building improvements with a gross asset value totaling \$3,935,989. The majority of the gross value total is from a lease with HLFB, Inc., for energy efficiency projects for State buildings located in Montpelier, Waterbury and Middlesex.

Capital lease payments for the primary government in 2013 totaled \$491,950, with \$30,815 for machinery and equipment, and \$461,135 for building improvements.

The future minimum lease obligation and the net present value of the minimum lease payments at June 30, 2013 are as follows:

<u>Fiscal Year</u>	<u>Primary Government</u>
2014.....	\$ 424,212
2015.....	432,366
2016.....	440,573
2017.....	447,614
2018.....	435,801
2019.....	105,337
Total minimum lease payments.....	2,285,903
Less interest.....	(231,929)
Present value of minimum lease payments....	<u>\$ 2,053,974</u>

4. Retirement Plans and Other Postemployment Benefits

In accordance with State statutes, the State Treasurer and the individual retirement systems' Board of Trustees administer the State's three defined benefit pension plans and two defined contribution plans. These systems are considered part of the State's reporting entity and are included in the accompanying financial statements as pension trust funds in the fiduciary fund type. There are no separate stand-alone financial statements issued for these plans.

Summary of significant accounting policies – basis of accounting and valuation of investments

The financial statements for the pension and other postemployment benefit trust funds are prepared using the accrual basis of accounting. Plan members' contributions are recognized in the period in which the contributions are due. The employers' contributions are recognized when due and a formal commitment to provide the contributions has been made. Benefits and refunds are recognized when due and payable in accordance with the terms of the plans. All investments are reported at fair value. Securities traded on a national exchange are valued at the last reported sales price on June 30, 2013. Securities without an established market are reported at estimated fair value. Additional information on the plans' investments may be found in Note IV. B.—Investments.

A. Defined Benefit Retirement Plans

Retirement Plan Descriptions

The Vermont State Retirement System (VSRS) (3 V.S.A. Chapter 16) is a single-employer public employee defined benefit retirement system which covers substantially all general State employees and State Police, except employees hired in a temporary capacity. Membership in the system is a condition of employment. The membership consists of:

- general employees who did not join the non-contributory system on July 1, 1981 (Group A), with a contribution rate of 6.4% of payroll (contributions cease upon attainment of 25 years of creditable service);
- State police, law enforcement positions, and airport firefighters (Group C), with a contribution rate of 8.28% of payroll;
- judges (Group D), with a contribution rate of 6.4% of payroll;
- terminated vested members of the non-contributory system (Group E); and
- all other general employees (Group F), with a contribution rate of 6.4% of payroll.

Effective July 1, 2011, the contribution rate for all State employees was raised, through legislation enacted in fiscal year 2011. The rate for Group A and D employees was increased from 5.10% to 6.40% through June 30, 2016. The rate for Group C employees was increased from 6.98% to 8.28% through June 30, 2016. The rate for Group F employees was increased from 5.10% to 6.40% through June 30, 2016, and will then decrease to 5.10% through June 30, 2019, then 4.85% thereafter.

The State Teachers' Retirement System (STRS) (16 V.S.A. Chapter 55) is a cost-sharing public employee defined benefit retirement system with a special funding situation. It covers nearly all public day school and nonsectarian private high school teachers and administrators as well as teachers in schools and teacher training institutions within and supported by the State that are controlled by the State board of education. Membership in the system for those covered classes is a condition of employment. The membership is made up of:

- general teachers who did not join the non-contributory system on July 1, 1981 (Group A), with a contribution rate of 5.5% of payroll (contributions cease upon attainment of 25 years of creditable service);
- terminated vested members of the non-contributory system (Group B); and
- all other general teachers (Group C), with a contribution rate of 5.0% of covered payroll.

The State appropriates funding for pension costs associated with the above two plans. In fiscal years prior to 1982, both systems were solely contributory. Under legislation effective July 1, 1981, Vermont State employees and State teachers could have elected to transfer their memberships from a contributory to a non-contributory membership class. However, in 1990, the Legislature again made both systems contributory effective July 1, 1990, for the STRS and January 1, 1991, for the VSRS. The State's contribution to each system is based on percentage rates of each member's annual earnable compensation. These rates include a "normal contribution" rate and an "accrued liability contribution" rate and are calculated based upon the liabilities of each system as determined by actuarial valuations.

The Vermont Municipal Employees' Retirement System (MERS) (24 V.S.A., Chapter 125) is a cost-sharing, multiple-employer public employees' retirement system that is administered by the State Treasurer and its Board of Trustees. It is designed for school districts and other municipal employees that work on a regular basis and also includes employees of museums and libraries if at least half of that institution's operating expenses are met by municipal funds. An employee of any employer that becomes affiliated with the system may join at that time or at any time thereafter. Any employee hired subsequent to the effective participation date of their employer who meets the minimum hourly requirement is required to join the system.

Prior to July 1, 1987, the State was statutorily responsible for contributions to the MERS' pension accumulation fund. Effective July 1, 1987, and thereafter, all payments to the system's pension accumulation fund are supported entirely by employer (municipal) and employee contributions. Employers make quarterly payments into the pension accumulation fund. These payments are percentages of annual earnable compensation for each membership group and consist of a "normal" and an "accrued liability" portion. The percentage rates of such contributions are fixed on the basis of the liabilities of the system pursuant to actuarial valuations.

Copies of each individual defined benefit retirement plan's annual actuarial valuation report, information describing each defined benefit plan's provisions including vesting requirements, benefits provided, post retirement adjustments, etc., and information relating to the two defined contribution plans are available for inspection at the Retirement Division, Office of the State Treasurer, 109 State Street, Montpelier, Vermont 05609-6901.

The defined benefit plans' financial statement are as follows:

Actuarial Valuation - Methods and Assumptions

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future. The actuarial method for both the STRS and the VSRS plans is set by State statute. Through fiscal year 2005, the method used was entry age normal (EAN) with frozen initial liability (FIL). The Legislature enacted a statute change revising the method to entry age normal without FIL for the actuarial valuation for the year ending June 30, 2006, which effectively restated the starting balance.

Under the previous method, set by State statute, the unfunded liability was frozen at 1988 levels. Any impact of underfunding subsequent to the "freezing" of the liability in 1988 falls to normal cost instead of being added to the unfunded liability as in more conventional funding methods. If funding levels approximate the actuarially required contribution (ARC), as in the case of the funding of VSRS, the effect of changing from EAN-FIL to EAN is attributable to variances between the actuarial assumptions and experience.

Actuarial valuations attempt to estimate costs associated with the pension system based on a number of demographic, economic, and retirement experience assumptions. To the extent assumptions are at variance to experience, this can result in actuarial gains and losses ultimately impacting contribution rates and the development of the ARC. Experience studies are required by statute to be conducted every five years to review actual experience in comparison to these assumptions and to provide recommended changes to assumptions.

At the same time there has been significant discussion on the national level relative to the appropriate interest rate assumptions used by public pension plans. The Vermont retirement systems, in concert with its investment and actuarial consultants, determined that rather than dealing with the interest rate as an isolated calculation, it should be viewed as part of an interrelated set of actuarial assumptions through a formal experience study, and completed these studies in fiscal year 2011 for the four year period ending June 30, 2010.

In fiscal year 2011, all three systems adopted the new method of developing interest rate assumptions called "select-and-ultimate". Under this method, differences between near-term and long-term expectations of rates of return on assets may be incorporated in the assumed rate of return by setting it on a select-and-ultimate basis. The most recent asset allocation established by the Vermont Pension Investment Committee (VPIC) was the basis of the data inputs into the model.

A select-and-ultimate rate structure can be used to reflect expectations of unusually strong or weak returns in near-term years followed by a trending to a long-term equilibrium. In this sense, it is a more elaborate and complete specification of future return assumptions than is a single rate used in all future years. This interest rate set is restarted every year. All three systems adopted a uniform interest rate assumption based on the application of this model:

· Year 1:	6.25%
· Year 2:	6.75%
· Year 3:	7.00%
· Year 4:	7.50%
· Year 5:	7.75%
· Year 6 through year 8:	8.25%
· Year 9 through year 15:	8.50%
· Year 16:	8.75%
· Year 17 and later:	9.00%

Per the experience study, the 50th percentile rate of return forecast for such a portfolio is approximately 7.9%. Since the cash flows associated with each system varies, however, for computational or administrative ease, it is preferable to set the assumed interest rate equal to the single rate that produces the same result as the select-and-ultimate rate set. The effective rate, based on assumed cash flows, for VSRS and MERS is 8.1% and 7.9% for STRS. Since the interest rate is restarted every year, this results in a more conservative return assumption for the amortization of the unfunded liability. For fiscal year 2013, the actuarial rate of return of the assets was 6.71% for VSRS and 6.72% for STRS compared to the select-and-ultimate year 1 expected rate of return of 6.25%.

The VSRS, STRS and MERS have had no changes in the assumptions since the June 30, 2012 valuation. The assumptions now in use are based on the 2011 experience studies. The STRS has had no changes in benefit provisions since the last valuation. The MERS has changes in benefit provision since the July 1, 2012 valuation. The MERS employee and employer contribution rates were increased.

The various actuarial methods and significant assumptions used to determine the annual required contributions at the State level for VSRS and STRS and at the municipal employer level for MERS, are shown on the following page.

	VSRS	STRS	MERS
Valuation date	06/30/13	06/30/13	07/01/13
Actuarial cost method ⁽¹⁾	Entry Age Normal	Entry Age Normal	Projected benefit cost method
Amortization method	Level percentage of payroll	Level percentage of payroll	Installments increasing 5% per year
Remaining amortization period ⁽²⁾ All closed basis	25 years	25 years	25 years
Asset valuation method ⁽³⁾	Preliminary Asset Value plus 20% of difference between market and preliminary asset values	Preliminary Asset Value plus 20% of difference between market and preliminary asset values	Actuarial value of assets using a five year smoothing technique
<u>Actuarial assumptions</u>			
Investment rate of return ⁽⁴⁾	6.25%-9.00%	6.25%-9.00%	6.25%-9.00%
Projected salary increases	3.00%-7.79%	4.25%-8.40%	5%
Cost of living adjustments	1.5%-3.0%	1.5%-3.0%	Group A - 1.5% Groups B, C & D - 1.8%
<u>Post Retirement Adjustments</u>			
Allowances in payment for at least one year adjusted for cost of living based on CPI but not in excess of percentage indicated	Groups A, C & D - 5%	Group A - 5%	N/A
Allowances in payment for at least one year increased on January 1 by one-half of the percentage increase in CPI but not in excess of percentage indicated	Group F - 5% ⁽⁵⁾	Group C - 5%	Group A - 2% Groups B, C & D - 3%
Assumed annual rate of cost-of-living increases	For those eligible for increases of 100% of CPI change: 3.0%	For those eligible for increases of 100% of CPI change: 3.0%	
	For those eligible for increases of 50% of CPI change: 1.5%	For those eligible for increases of 50% of CPI change: 1.5%	

- (1) Beginning with June 30, 2006, the actuarial cost method was changed to the Entry Age Normal method for VSRS and STRS.
- (2) The 30-year period for amortization of the unfunded actuarial accrued liability was restarted effective 7/1/08 for STRS, and VSRS.
- (3) The preliminary asset value is equal to the previous year's asset value (for valuation purposes) adjusted for contributions less benefit payments and expenses and expected income.
- (4) Effective 6/30/11, a select-and ultimate interest rate assumption was used, as described earlier in the note.
- (5) Effective January 1, 2014, the Group F employees who were actively contributing into the system on June 30, 2008, and retire on or after July 1, 2008, will be eligible for the enhanced cost of living adjustment, which will increase to equal the full CPI change.

The actuary has estimated the change in the unfunded actuarial accrued liability between June 30, 2012 and June 30, 2013, as follows:

	<u>VSRS</u>	<u>STRS</u>
Unfunded actuarial accrued liability, June 30, 2012...	\$ 401,824,745	\$ 945,502,316
Normal cost.....	39,217,558	36,673,377
Contributions.....	(81,856,395)	(97,722,641)
Interest on unfunded liability, normal cost and contributions.....	25,045,898	58,378,429
Restart of select-and-ultimate interest structure.....	33,541,162	44,499,276

NPO - June 30, 2013.....	<u>\$ 39,938,721</u>	<u>\$ 175,508,310</u>
Percentage of APC contributed	129.57%	106.56%

Three-Year Trend Information

Year Ended 6/30	Annual Pension Cost	Percentage Contributed	NPO Balance
<u>VSRS</u>			
2011	\$ 46,018,749	81.65%	\$ 62,820,259
2012	29,143,475	138.29%	51,661,301
2013	39,647,727	129.57%	39,938,721
<u>STRS</u>			
2011	53,295,844	94.32%	183,273,322
2012	52,394,531	107.17%	179,515,842
2013	61,078,788	106.56%	175,508,310

Funded Status and Funding Progress

The following is funded status information for the three defined benefit plans as the most recent valuation date, with amounts in thousands:

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
<u>VSRS</u>						
6/30/13	\$ 1,469,170	\$ 1,914,300	\$ 445,130	76.7%	\$ 416,766	106.8%
<u>STRS</u>						
6/30/13	1,552,924	2,566,834	1,013,910	60.5%	563,623	179.9%
<u>MERS</u>						
7/1/13	446,236	528,426	82,190	84.4%	220,372	37.3%

The schedule of funding progress, presented as Required Supplementary Information following the notes to the financial statements, presents multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

B. Defined Contribution Retirement Plans

Retirement Plan Descriptions

In accordance with Title 3 of the Vermont Statutes Annotated, Chapter 16A, the State established an optional defined contribution plan for exempt State employees effective January 1, 1999. The Vermont State Defined Contribution Plan is reported in the Pension Trust Funds.

Exempt employees hired after January 1, 1999, have a one-time opportunity to elect either the defined benefit or defined contribution plan. Employees are required to contribute at the rate of 2.85%. The State is required to contribute to each employee's account at the rate of 7% of the employee's compensation for each payroll period. An employee becomes vested in the plan after completion of 23 months of creditable service as a State employee. During the fiscal year ending June 30, 2013, member contributions totaled \$723,894 with State employer contributions at \$1,857,713. As of June 30, 2013, the Vermont State Defined Contribution Plan's net position totaled \$49,089,174 and there were 419 participants.

The Vermont Municipal Employees' Defined Contribution Plan (24 V.S.A. 5070) was implemented by the Vermont Municipal Employees' Retirement System's Board of Trustees on July 1, 2000, and is reported as a pension trust fund. The defined contribution plan was offered by municipal employers to one or more groups of their eligible employees. Once offered by the employer, each eligible employee was required to make an election to participate. Employees participating in one of the municipal defined benefit plans who elected to participate in the defined contribution plan had the July 1, 2001, actuarial value of their accrued defined benefit plan transferred to the defined contribution plan. Employers that did not offer the defined contribution plan to their employees as of December 31, 1999, have an opportunity to do so no later than December 31 of any subsequent year with the transfer effective July 1 of the following year.

Participating municipal employees and their employers are required to contribute at the rate of 5% of earnable compensation. Effective July 1, 2008, employers began contributing 5.125% while employee contribution percentages remain unchanged. Employees become vested in the plan after 12 months of service. During the fiscal year ending June 30, 2013, member contributions totaled \$627,840 and employer contributions at \$678,918. As of June 30, 2013, the Municipal Employees' Defined Contribution Plan's net position totaled \$18,527,140, and there were 289 participants.

The Single Deposit Investment Account (SDIA), a non-contributory defined contribution plan reported as a Pension Trust Fund, was established according to the provisions of Public Act 41 of the 1981 Session. The Act authorized a new Group B non-contributory plan within the State Teachers Retirement System (STRS) and a new Group E non-contributory plan within the Vermont State Retirement System (VSRS).

The STRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group B non-contributory plan. Group A members electing to transfer to the Group B plan had their choice between the following three options:

- have both their accumulated employee contributions and accumulated interest returned to them; or
- have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

The VSRS's members in the Group A contributory plan could have elected to either remain in the Group A plan or transfer to the new Group E non-contributory plan. Group A members electing to transfer to the Group E plan had their choice between the following three options:

- have both their accumulated employee contributions and accumulated interest returned to them; or

- have their accumulated contributions returned to them and only their accumulated interest invested by the retirement board in the SDIA; or
- have both their accumulated employee contributions and accumulated interest invested by the retirement board in the SDIA.

No additional contributions could be made to the SDIA beyond those described above. The SDIA funds are not available to the members until they retire or terminate employment. At June 30, 2013 there were 1,722 members, with net position of \$68,461,221 in the Single Deposit Investment Account.

The defined contribution plans' financial statements are as follows:

C. Other Postemployment Benefits

In addition to providing pension benefits, the State offers postemployment medical insurance, dental insurance, and life insurance benefits to retirees of the VSRS and STRS.

Medical Insurance Plan DescriptionsVermont State Retirement SystemEmployees Hired Prior To July 1, 2008

Employees hired prior to July 1, 2008, and retiring directly from active State service for any reason (disability, early, or normal) may elect to carry whatever medical coverage is in effect at that time into retirement for themselves and their dependents. During their lifetime the retiree will pay 20% of the cost of the premium, except in the case where retirees select joint or survivorship options. If the retiree chooses the joint or survivor pension options and predeceases his or her spouse, the medical benefits along with the pension benefit will continue for the spouse. However, generally, the surviving spouse must pay 100% of the cost of the premium.

In addition, once a retiree or surviving spouse becomes eligible for Medicare coverage (at age 65); it is mandatory that they enroll in both Medicare Part A and Part B as soon as possible. Medicare thus becomes the primary insurer with the State plan becoming the secondary insurer. The insured's State insurance premium costs will then decrease in recognition of this change.

If an employee, other than a group C member, does not retire directly from State service, they are not eligible to participate in the State's medical insurance plan. Group C members who terminate with 20 or more years of service, but are not yet 50 years old, may elect to receive medical coverage at the time they begin receiving their retirement benefits. If the insurance is terminated at any time after retirement benefits have been received, coverage will not be able to be obtained again at a later date.

Employees Hired After June 30, 2008

Based on legislation enacted during fiscal year 2008, Group F employees hired after June 30, 2008 will pay, upon retirement, a tiered retiree health care premium amount based on completed years of service. The tiered rate paid will range from 100% of the premium cost for retirees with less than 10 years of service to 20% of the premium cost for retirees with 20 or more years of service. Additionally, as part of the enacted legislation, Group F employees hired after June 30, 2008 will also have the ability to elect health care insurance at the 20% premium cost level when they begin to receive retirement benefits in a manner comparable to regular retirements even if the employee terminated prior to their early retirement date, provided the member had 20 years of service upon termination of employment.

As of June 30, 2013, retirees accounted for 4,223 of the 12,798 participants enrolled in the single, spousal, or family plan options. Of the \$130 million in premiums received by the Medical Insurance Fund (internal service fund) during 2013, retirees contributed \$6.7 million. Of the \$125 million in claims expense incurred by the Medical Insurance Fund during 2013, \$34.4 million was attributable to retiree claims.

The Vermont State Postemployment Benefits Trust Fund (3 V.S.A. 479a) was established in fiscal year 2007 as an irrevocable trust fund for the purpose of accumulating and providing reserves to support retiree postemployment benefits other than pension benefits for members of the VSRS. By definition this is a fund required to follow the reporting requirements of the Governmental Accounting Standards Board Statement No. 43 - "Financial Reporting for Postemployment Benefit Plans Other Than Pensions." The State's fiscal year 2013 contributions to this trust fund totaled \$25.6 million which included a \$1.7 million Medicare D reimbursement received from the Federal Government. The trust fund then paid premium payments of \$23.9 million (calculated on a pay-as-you-go basis) to the State's Medical Insurance Fund. At June 30, 2013, the trust fund has total net position of \$15,662,783 being held in trust for postemployment benefits other than pension benefits.

State Teachers Retirement System

Retirees in the STRS plan participate in multi-employer health coverage plans operated by the Vermont Education Health Initiative (VEHI) which is managed jointly by the Vermont School Boards Insurance Trust and the Vermont- National Education Association. VEHI partners with Blue Cross Blue Shield to provide health insurance to retired and active teachers. VEHI issues its own audited financial statements. These and plan information are available the VEHI Offices, 2 Prospect Street, Suite 5, Montpelier, VT 05602.

Members of the STRS have access to three medical benefit plans in retirement. The plans are identical to those offered to active teachers in public school systems in Vermont. Members may pick up medical coverage under one of the plans offered for themselves and all eligible dependents at the time of retirement, or anytime thereafter during one of the semi-annual open enrollment periods. Current employees with ten or more years of service as of July 1, 2010, receive a premium subsidy of 80%, and have a tiered years of service requirement to be eligible for an 80% spousal insurance premium subsidy. For new hires and those with less than 10 years of service as of July 1, 2010, there is no premium subsidy for those retiring with less than 15 years of service at retirement, 60% single premium subsidy at 15 years, 70% single premium subsidy at 20 years ,and 80% single and spousal premium subsidy at 25 years. The retiree must pick up the full cost of the premium for all covered dependents. No plan changes were made in fiscal year 2013.

Once a retiree becomes eligible for Medicare coverage (at age 65), it is mandatory that they enroll in both Medicare Part A and Part B. Medicare becomes the primary insurer and the Teacher's medical plans become the secondary insurer. Two of the plans offered become "carve-out" plans to coordinate with Medicare, and one of the plans is replaced with a true Medicare supplemental plan. The premiums for all plans are reduced in accordance with the decrease in liability once Medicare becomes the primary insurer.

As of June 30, 2013, 4,946 retirees are enrolled in the single, spouse, and family medical plan options. The retirees contributed \$13.6 million in premiums, the State contributed \$21.0 million to the STRS pension trust fund for medical benefit premiums, and the STRS pension trust fund paid \$22.5 million to VEHI on a pay-as-you-go basis, during fiscal year 2013. VEHI incurred \$34.9 million in retiree claims expense for the fiscal year ending June 30, 2013.

Medicare Part D - Prescription Drug Subsidy

Under the Medicare, Prescription Drug, Improvement, and Modernization Act of 2003 (MMA), employer sponsors of retiree prescription drug plans can apply for a 28% subsidy for the qualified prescription drug costs of their retirees. To be eligible for the subsidy, the employer coverage must be actuarially equivalent to the new Medicare Part D coverage and the employer must provide notices of creditable prescription drug coverage to individuals entitled to Medicare Part D.

The State Teachers' Retirement System Board of Trustees agreed that they would continue to offer the same prescription drug coverage program that has been available to active and retired teachers for the past several years. The Retirement Division has received an attestation from its actuaries that the prescription drug program offered to retired teachers is equivalent, and in fact, better than the drug program offered through Medicare Part D. The State system has also agreed to offer the same prescription drug coverage program that has been available to active and retired State employees for the past several years. The Department of Human Resources has received an attestation from its actuaries that the prescription drug program offered to retired members is equivalent, and in fact, better than the drug program offered through Medicare Part D

The systems will continue to evaluate the results of the Medicare Part D Program and its impact on the post-age 65 health care benefits marketplace and prescription drug pricing. The Vermont Teachers' Retirement Board of Trustees and the State will need to determine in future years whether it is in their best interest to continue to offer the same prescription drug program, or whether it should be modified or discontinued. If the determination is to continue to offer the same coverage, the estimated annual subsidy will fluctuate depending on the number of retirees and covered dependents that actually sign up for the Medicare Part D Program. If it is determined that the prescription coverage should either be modified or discontinued, then the savings will be realized by a decrease in medical premiums.

For the fiscal year ending June 30, 2013, the subsidy for the VSRS system was \$1,668,896. The State has elected to contribute this revenue in the Vermont State Postemployment Benefits Trust Fund to fund future postemployment health benefit liabilities. In the case of STRS, the subsidy for fiscal year 2013 was \$1,440,080 and was deposited into the STRS Pension Trust Fund.

Plan Membership

At June 30, 2013, the number of participants included in the OPEB valuations are as follows:

	<u>VSRS</u>	<u>STRS</u>
Active employees ⁽¹⁾	8,575	10,100
Terminated vested	-	750
Retired employees ⁽²⁾	<u>4,223</u>	<u>5,450</u>
Total participants	<u>12,798</u>	<u>16,300</u>

⁽¹⁾ Number of active employees includes participants in the defined contribution plan.

⁽²⁾ Includes 33 VSRS and 157 STRS July 1, 2013 retirements.

OPEB Actuarial Valuation- Methods and Assumptions

The State's independent actuary has prepared annual valuations of the OPEB liabilities for VSRS and STRS as of June 30, 2013. Both the VSRS and STRS reports present two separate calculations of the State's OPEB liability, depending on whether the liability would be prefunded or remain on a pay-as-you-go basis. Since the VSRS has accumulated some assets, a third blended calculation is also included. The MERS, a cost-sharing, multiple-employer public employees' retirement system, is administered by the State but has no associated State health care benefit or liability. While the Vermont Municipal Employees Health Benefit Fund is classified as a postemployment benefit fund, there is no accrued liability in excess of the assets of the fund. There is no annual required contribution and unfunded actuarial accrued liability. Component units and authorities of the State will perform their own valuation as the State does not assume the risk or financial burden for their health care costs.

In the VSRS and STRS OPEB plans' actuarial valuations, per unit capita healthcare costs were updated based on recent plan premium equivalents and enrollments. All other assumptions, including healthcare cost trend and assumed discount rate, were the same as those used in 2012. All State OPEB Plan provisions were the same as those reflected in the 2012 valuation.

The STRS OPEB Plan's valuation reflects a change in the way prescription drug benefits for Medicare-eligible retirees are structured. Beginning January 1, 2014, VEHI will change from participating in the Retiree Drug Subsidy Program to a Medicare Part D Employer Group Waiver Plan (EGWP).

The VSRS OPEB trust fund has accumulated some level of pre-funding. Therefore, the valuation reflected a blended rate of 4.25%, rather than the pay-as-you-go liability calculated at 4%. The STRS OPEB has no trust fund and no prefunding has been made. Therefore, the valuation used a 4% discount rate to calculate the liability.

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

The following list contains the various actuarial methods and significant assumptions used to determine the annual required contributions at the State level for VSRS and STRS OPEB plans.

	<u>VSRS</u>	<u>STRS</u>
Valuation date	6/30/2013	6/30/2013
Actuarial cost method	Projected Unit Credit	Projected Unit Credit
Amortization method	Open basis for pay-as-you-go	Open basis for pay-as-you-go
Amortization period	30 years starting in fiscal year 2014	30 years starting in fiscal year 2014
Actuarial assumptions		
Investment rate of return - prefunding	8.10%	7.90%
Investment rate of return - pay-as-you-go	4.25% ⁽¹⁾	4.00%
Medical Care and State Share Inflation	6.25% in 2014, 6.00% in 2015, 5.75% in 2016, 5.50% in 2018, 5.25% in 2019, 5.00% in 2020 and after	5.00%
Coverage	80% of current active employees will elect retiree medical coverage and 70% of terminated vested will elect coverage	60% of current active employees will elect retiree medical coverage and 30% of terminated vested will elect coverage

⁽¹⁾ In fiscal year 2013, partial prefunding resulted in a blended rate of 4.25%

The actuary has estimated the change in the unfunded actuarial accrued liability between June 30, 2012 and June 30, 2013, as follows:

	<u>VSRS</u>	<u>STRS</u>
Unfunded actuarial accrued liability, June 30, 2012..	\$ 998,403,967	\$ 827,180,098
End of year service cost.....	39,656,943	22,401,753
Interest cost.....	42,250,046	32,612,252
Estimated benefit payments.....	(35,699,629)	(23,982,688)
Estimated increase in assets.....	(3,063,611)	-
Impact of recent year demographic experience.....	8,753,852	19,076,143
New per capita costs.....	(133,417,643)	38,380,643
Other refinements.....	14,537,356	617,121
Asset loss.....	779,712	-
Implementation of EGWP.....	-	(203,619,214)
Unfunded actuarial accrued liability, June 30, 2013..	<u>\$ 932,200,993</u>	<u>\$ 712,666,108</u>

Implementation of the EGWP arrangement impacts the calculation of accrued liabilities, as it is treated differently for accounting purposes than the previous Retiree Drug Subsidy (RDS) program. GASB Statement No. 45 disallows reflecting future RDS payments as an offset to liabilities, while the EGWP arrangement flows into reduced premiums as opposed to an intergovernmental transfer, allowing those subsidies to be reflected in the calculation of the liabilities.

Annual OPEB Cost and Net OPEB Obligation

The State's annual OPEB cost (expense) is calculated based on the annual required contribution of the employer (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities over a period not to exceed thirty years. GASB Statement 45 was implemented in fiscal year 2008 prospectively with a zero net OPEB Obligation (NOO) beginning balance for both the VSRS and STRS OPEB defined benefit plans.

The following table shows the component of the State's annual OPEB cost for the year ended June 30, 2013 the amount actually contributed, and the changes in the State's net OPEB obligation.

	<u>VSRS</u>	<u>STRS</u>
Annual Required Contribution (ARC).....	\$ 67,977,179	\$ 45,458,358
Interest on NOO.....	8,072,470	10,788,358
Amortization of NOO.....	<u>(5,695,328)</u>	<u>(7,798,732)</u>
Annual OPEB Cost (AOC).....	70,354,321	48,447,984
Employer Contribution Made.....	<u>(25,557,683)</u>	<u>-</u>
Increase in NOO.....	44,796,638	48,447,984
NOO - July 1, 2012.....	<u>189,940,475</u>	<u>269,708,962</u>
NOO - June 30, 2013.....	<u>\$ 234,737,113</u>	<u>\$ 318,156,946</u>
Percentage of ARC contributed	36.33%	0.00%

Three-Year Trend Information

OPEB Fund/Plan	Year Ended 6/30	Annual OPEB Cost*	Percentage Contributed	NOO Balance
State Employees' Postemployment Benefit Trust Fund				
	2011	\$ 68,343,620	40.08%	\$ 145,886,587
	2012	71,706,077	38.56%	189,940,475

	2013	48,447,984	0.00%	318,156,946

* Determined on a pay-as-you-go basis

Funded Status and Funding Progress

The funding status of the plans as of June 30, 2013, was as follows (expressed in thousands):

Actuarial Valuation Date	Actuarial Value of Assets (a)	Actuarial Accrued Liability (AAL) (b)	Unfunded AAL (UAAL) (b-a)	Funded Ratio (a/b)	Covered Payroll (c)	UAAL as a Percentage of Covered Payroll ((b-a)/c)
<u>VSRS</u> ⁽¹⁾						
6/30/13	\$ 15,663	\$ 947,864	\$ 932,201	1.7%	\$ 436,949	213.3%
<u>STRS</u> ⁽²⁾						
6/30/13	-	712,666	712,666	0.0%	563,534	126.5%

⁽¹⁾ Reflects blended discount rate of 4.25% in 2013

⁽²⁾ Discount rate for 2013 at 4.0%, reflecting no prefunding

The schedule of funding progress, presented as required supplementary information immediately following these notes to the financial statements, presents multi-year trend information about whether the actuarial values of plan assets are increasing or decreasing over time relative to the actuarial accrued liabilities for benefits.

Dental Insurance

Dental plans are available to retired State employees, retired teachers, retired municipal employees and their eligible dependents. The dental plan must be elected at the time of retirement. The retiree pays the full premium for all covered lives. There is no cost to the State.

Life Insurance

In the case of life insurance, if a State employee retires with 20 or more years of service and was participating

in the life insurance program, a \$10,000 benefit will continue into retirement. If a State employee retires due to disability prior to age 60, and if proper documentation is approved by the life insurance company, full life insurance coverage will continue at the State's expense up to age 65. When the retiree reaches the age of 65 and if they have a total of 20 years or more of active and retired (while receiving disability) service, life insurance coverage will automatically change to the \$10,000 level with 100% of the premium being paid by the State. In addition, a retiree may convert their insurance coverage in effect at their time of retirement to an individual policy within 30 days of their retirement date without a physical exam.

Vermont Municipal Employees Health Benefit Fund

The MERS RHS Plan established on July 1, 2007, is a tax-advantaged savings plan that assists retirees in paying for healthcare costs after retirement. Contributions to this fund are deposited into the RHS Plan member accounts on a tax-free basis, accumulate interest on a tax-free basis, and are drawn out during retirement on a tax-free basis to reimburse health care expenses, including out-of-pocket expenses, deductibles and premiums.

The MERS Board deposited an initial amount of \$5.1 million into the RHS accounts on July 2, 2007. Additional employer contributions totaling approximately \$6 million were collected during the course of the fiscal years 2008 and 2009 that were deposited in member accounts during fiscal year 2009. No such contributions have been made since fiscal year 2009. Future contributions and subsequent transfers to member accounts will be made as directed by the MERS Board of Trustees. There is no guarantee that the RHS member accounts will receive any additional funding. While classified as a postemployment benefit fund, there is no accrued liability in excess of the asset of the fund. There is no annual required contribution and unfunded actuarial accrued liability.

All MERS defined benefit members and retirees who have a minimum of 5 years of contributory service are eligible to participate in the RHS plan. The amount each member will receive is determined by the total number of contributory years of service in the system. Each year of service is equal to one share. The share value is determined based on the total eligible population, the total number of years of contributory service represented, and the amount of the distribution. The share value will change when future deposits are made. All eligible members receive the first five shares in their medical reimbursement account, which may be used for any medical expense, including premium reimbursement. The additional shares, representing service credit above five years, are deposited into the premium reimbursement account, which may only be used for medical, dental, vision or long-term health care premium reimbursements.

The money may be accessed by members only after separation from service and the achievement of retiree status from the MERS plan. For members who were already receiving retirement benefits from the MERS, the funds in their RHS account could be accessed after July 2, 2007 to reimbursement expenses incurred after July 1, 2007. Members who are still actively employed, and members in a vested-terminated status, may access the funds once they retire and begin receiving monthly pension payments. Funds in the RHS accounts are invested in the appropriate age-related Milestone Fund through a third party record keeper.

At June 30, 2013, there were 5,251 active and retired members participating in the MERS RHS plan. Investments in member accounts as of June 30, 2013 totaled \$11,692,729.

The financial statements for the OPEB Funds are as follows:

5. Other Long-term Liabilities

Governmental activities long-term liabilities are generally liquidated by payments from the governmental and internal service funds' programs, including all major governmental fund types except for the Education Fund. Bonds payable are liquidated by transfers of resources from the General, Transportation, Special and Federal Funds. Other liabilities include the retirement incentive for VT State Hospital employees. During the year ended June 30, 2013, the following changes occurred in the long-term liabilities:

	<u>Total Liability July 1, 2012</u>	<u>Additions</u>	<u>Reductions</u>	<u>Total Liability June 30, 2013</u>	<u>Amounts due within one year</u>
Governmental activities					
Bonds payable					
Bonds ⁽¹⁾	\$ 519,516,565	\$ 104,158,488	\$ 53,250,000	\$ 570,425,053	\$ 54,855,000
Bond premium	25,017,136	9,922,543	2,155,765	32,783,914	2,328,003

Pollution remediation obligations ⁽³⁾	5,642,081	5,036,819	420,008	10,258,892	2,979,390
Total governmental activities long-term liabilities	<u>\$ 1,331,055,919</u>	<u>\$ 515,581,704</u>	<u>\$ 378,336,120</u>	<u>\$ 1,468,301,503</u>	<u>\$ 94,319,461</u>

⁽¹⁾ Governmental activities bonds payable additions of \$104,158,488 include \$93,185,000 in general obligation bonds, \$10,820,000 in special obligation bonds, and \$153,488 of accretions on capital appreciation bonds.

⁽²⁾ The reduction in capital leases payable includes an amendment to the lease for energy efficiency projects for State owned buildings. In 2013, the State elected to pay the lessor the prepayment price of \$1,302,121 for equipment located at the Waterbury Office Complex which was destroyed by Tropical Storm Irene.

⁽³⁾ The Pollution Remediation Obligation (PRO) liabilities were measured using the actual contract cost, where no changes in cost are expected, or a method that is materially close to the expected cash flow technique. Liability estimates are subject to change due to cost increases or reductions, or changes in technology or applicable laws or regulations governing the remediation efforts.

Under the federal Superfund law, the State is responsible for sharing remediation costs at sites where the United States Environmental Protection Agency (USEPA) expends resources from the superfund trust for cleanup. Currently, there are five superfund sites in Vermont in various stages of cleanup, from initial assessment to cleanup activities. The Pollution Remediation Obligation (PRO) for these Superfund sites at June 30, 2013 is \$5,044,064, which is a net reduction from last of \$18,208. The State does not anticipate recovering reimbursements from the parties who caused the pollution.

The State has been working with potential responsible parties and the USEPA to address the environmental contamination from an abandoned mine, which to date is not a superfund site. A remedy for the site's cleanup, including an estimate of the cost of cleanup, has not been determined due to the potential magnitude and the various options that are being investigated. In the interim, the USEPA has installed erosion control measures at the site. The State bears no obligation to USEPA for capital costs

but is responsible for monitoring the ongoing erosion control work performed and administering the support of the USEPA site programs. The PRO for the erosion mitigation stage of the work at June 30, 2013 is \$360,014, a net increase of \$288,808 from last year. These costs will be covered by a portion of special settlement funds received from one of the potential responsible parties.

The State is currently working on cleanup of ground water contamination resulting from a chemical spill at a former dry cleaner facility. The proposed cleanup includes the physical removal of contaminated soils and installation of a groundwater treatment system. By order of the Vermont Superior Court, the Agency of Natural Resources will conduct the cleanup work required and the former owners shall be responsible for reimbursing the State for cost related to implementing the cleanup plan. At June 30, 2013, the PRO is \$971,151.

Asbestos removal is underway in three State Buildings. The pollution remediation obligation is \$3,883,663 at June 30, 2013, a net increase of \$3,375,061 from last year. The asbestos abatement required at the State's Waterbury Office Complex before the buildings can be demolished is \$3,808,663 of the total PRO.

During previous fiscal years, the Unemployment Compensation Trust Fund drew advances from the U. S. Treasury's Unemployment Trust Fund (UTF). The American Recovery and Reinvestment Act of 2009 provided that these State advances be interest free through December 31, 2010. Subsequent to that date, accrued interest is payable annually each September, from the General Fund. Principal payments are also due annually each September. The amount of the payment depends on the health of the trust fund. Reductions consist of a payment of \$20,000,000 that was made in September 2012 and \$4,851,439 in FUTA tax credits that were applied directly against the loan balance. The balance of \$52,880,422 was paid in July 2013.

H. Fund Balance/Net Position

Governmental Funds

The composition of the fund balances of the governmental funds for the fiscal year ended June 30, 2013, are shown on the following page.

⁽¹⁾ Loans receivable for the Vermont Housing and Conservation Board include federally restricted funds.

Note V. OTHER INFORMATION**A. Risk Management****1. Workers' Compensation and Risk Management**

The Agency of Administration's Financial Services Division oversees the Workers' Compensation and Risk Management programs, which administers all insurance programs for State government with the exception of the health and life insurance plans listed below. State policy is to minimize the purchase of commercial insurance by either self-funding or otherwise retaining the risk when it makes sense to do so. The programs set aside assets and pay claims utilizing the following three Internal Service Funds:

Workers' Compensation Self Insurance Fund
State Liability Self Insurance Fund
Risk Management – All Other Fund (used for the purchase of commercial insurance)

The Workers' Compensation Fund covers all State employees who are injured on the job, pursuant to State statute. Certain quasi-governmental entities may also request coverage through this program. The State has unlimited exposure to liability and has not purchased any stop-loss insurance to limit this exposure. All claims are processed by Workers' Compensation personnel and are audited annually by an outside claims adjuster to ensure that the claims-based statistical information used to calculate the State's workers' compensation exposure is reliable. Liability is reviewed annually by an outside actuary, including a review of incurred but not reported claims (IBNR). The contribution required to fully fund losses is calculated annually by an outside actuary. Allocation to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The Liability Insurance Fund covers general and employment practices liability, discrimination, and auto

liability risk. The coverage is comparable to standard private commercial policies. It offers coverage to the same group of participants as those covered by the workers' compensation program described above. The State's exposure to tort risk in Vermont is subject to the doctrine of sovereign immunity and is governed by the Vermont Tort Claims Act, 12 V.S.A. §5601. Exposure outside of Vermont and to federal suit and other non-tort suit is potentially unlimited. The State is self-insured (SIR) for the first \$500,000 of exposure and has purchased excess commercial insurance to cover the additional per-occurrence exposure in amounts of up to \$1,500,000 (\$2,000,000 total) in Vermont and \$10,000,000 in excess of the \$500,000 SIR for claims that are not subject to the Vermont Tort Claims Act. Claims are processed by Risk Management personnel (prior to 2006, claims were processed by a third-party administrator), and are audited annually by an outside claims adjuster to ensure that the claims-based statistical information used to calculate the State's liability exposure is reliable. This liability is reviewed annually by an outside actuary, including a review of incurred but not reported claims (IBNR). The contribution required to fully fund losses is calculated annually by an outside actuary. Allocation to each participating entity is done by Risk Management personnel utilizing departmental exposure and experience factors.

The Risk-Management – All Other Fund provides insurance coverage through purchased commercial policies for risks not covered in the above funds or which are self-assumed. This coverage provides insurance for State-owned real property, bonds for various categories of employees, errors and omissions coverage for judges, and various other miscellaneous coverages. The State's liability exposure is limited to the amount of the various deductibles associated with the respective policies and potentially for any claims in excess of the purchased limits. Premium charges from the various insurers are either assessed directly against the entity requiring the coverage or apportioned among those entities receiving the benefits of the coverage. Risk Management also assesses a surcharge of up to 5% of the premium to cover administrative costs. Entities eligible for coverage are the same as those listed above for the other funds.

Insurance settlements have never exceeded the coverage disclosed above.

In addition to the three internal service funds above, effective July 1, 2007, the General Assembly established the Sarcoidosis Benefit Trust Fund (a program in the Special Fund) to cover specific claims arising from an outbreak of Sarcoidosis at the impaired State office building in Bennington, Vermont (Act 53 of 2007). Claims are reviewed and processed under rules established that mirror the rules for the Workers' Compensation Fund claims. Funding was established as a special fund and not a proprietary fund as funding will only be available by the General Assembly as claims arise and funding needs are determined. The Fund is managed by Workers' Compensation personnel. As of June 30, 2013, all claims in this special fund have been settled. Total payments issued from fiscal year 2008 through fiscal year 2013 are \$1,805,846.

2. Health Care Insurance, Dental Assistance Plan, Life Insurance, Employee Assistance Program, and Long Term Disability Funds for State Employee Benefit Plans

The Employee Benefits Division of the Department of Human Resources maintains medical/behavioral health insurance, dental assistance plan, life insurance, employee assistance program, and long term disability program funds for the benefit of current State employees, retired former employees, and legislators as well as employees and certain former employees of outside "special" groups which have been declared eligible to participate by statute or labor agreement. Not all of these named groups may participate in every plan. Detailed eligibility information for each group listed above can be found in the plan summaries that follow. Temporary and contractual employees are not eligible to participate in these plans.

Enrolled plan participants share in the premium cost of the medical/behavioral health plan. Prescription drug coverage is included in the medical/behavioral health plan. Premium rate setting is performed by an outside actuary in conjunction with the Administrative Services Division of the Department of Human Resources. The State's liability for incurred but not yet reported (IBNR) claims is calculated by the actuary and is based on the State's prior claims experience. Special Groups covered under the health insurance plan remit premium to the State for their members. Retirees covered under the health plan pay premium through the Retirement Division of the Treasurer's Office.

The medical insurance plan offerings have been in place since 2001 and include four plan options. TotalChoice and HealthGuard options are “preferred provider organization” indemnity-type plans. The SafetyNet option is a high-deductible catastrophic plan. The SelectCare plan is a “point of service” plan, similar to an open-ended HMO. Members may opt out of the SelectCare network but must meet a deductible and coinsurance to do so. Benefits are administered under a managed care arrangement. All four health plan options are self-insured by the State. The State employs a third party administrator to provide administrative services, including claims payment. To limit the State’s large claims exposure, the State has purchased a stop loss insurance policy.

The self-funded State of Vermont Employee Dental Assistance Plan provides up to \$1,000 regular dental benefits annually and up to \$1,750 lifetime benefit for orthodontic expenses for each participant. These plan caps effectively limit the State’s exposure to catastrophic loss so no stop-loss insurance has been purchased. The plan operates with a schedule of benefits which is bargained under the labor contract and has not been updated since 2001. The Administrative Services Division within the Department of Human Resources sets the premium rates, in consultation with the dental plan administrator’s actuary. Participants include all groups mentioned in paragraph 1 above except for retirees. The State pays 100% of the premium for State employee participants and their covered dependents. Special Groups covered under the dental assistance plan remit premium to the State for their members.

The State of Vermont Employee Life Insurance Program consists of a Term-Life benefit and an Accidental Death and Dismemberment (AD&D) benefit, each of which provides coverage equal to two times a participant’s base salary rounded down to the nearest \$100. Retirees who work for the State for at least twenty years and who have life insurance at the time of retirement receive a retiree life benefit of \$10,000 with no AD&D coverage. Both Life and AD&D are fully insured benefits. The State purchases insurance under which the carrier retains liability for all claims. The Administrative Services Division calculates the premium rates charged to departments for both of these programs. The State pays 75% of active employees’ premiums and 100% of retirees’ premium costs. Only current State employees, retired State employees, and current active employees of outside special groups are eligible to participate. Special Groups covered under the life insurance plan remit premium to the State for their members.

An Employee Assistance Program (EAP) is provided for the benefit of State employees and members of their immediate household. This program assists employees and family members in addressing problems that impact their lives including stress, family, financial, substance abuse, and other issues. Active State employees and their families are eligible for this program. The EAP Program Manager is paid a monthly fee based on the number of employees who work for the State. The plan provides up to 5 counseling sessions per case through a network of providers. No claims costs, or claims liabilities are incurred under this plan by the State. The State pays 100% of the fee for this plan.

A Long Term Disability Program is provided as an income replacement benefit for certain State employees who become disabled due to non-occupational injury or illness, and the disability is expected to be long term or permanent. The plan provides financial protection for State employees and their families by continuing a portion of their income while disabled. Only State employees who are not eligible to be represented by the employees’ unions (the Vermont State Employees Association and the Vermont Troopers Association) are eligible for this benefit. Employees must be employed for one (1) year before coverage is effective. This plan is fully insured through an insurance company, so there is no liability to the State for claims. The premium is based on a percentage of the salaries of eligible participants. The State issues payment to the insurance company for the premium and the cost is then recovered from eligible employees in the following manner: Those eligible employees who are covered by a leave plan forfeit one day of compensated absence leave per year. Those eligible employees who are not covered by a leave plan have a one-time 0.2% salary reduction in their next cost-of-living increase following eligibility. During 2013, departments were given a 5 pay-period rate holiday and normal premium recovery from employees was not processed.

Three years’ changes in the respective funds’ claims liability amounts are displayed in the following table:

<u>Fund and Fiscal Year</u>	<u>Liability at Beginning of the Fiscal Year</u>	<u>Current FY Claims and Changes in Estimates</u>	<u>Current FY Claims Payments</u>	<u>Liability at End of the Fiscal Year</u>
Workers' Compensation Fund

2013	213,839	5,129,557	4,963,106	380,290

B. Budget Stabilization Reserves

The 1993 Legislature amended action taken by the 1987 Legislature by repealing legislation creating the Budget Stabilization Trust Fund and created separate Budget Stabilization Reserves within both the General Fund and Transportation Fund. The Education Fund Budget Stabilization Reserve was created by the 1999 Legislature. These reserves were created to reduce the effects of annual variations in State revenues upon these funds by reserving certain surpluses of revenues.

The reserves balances consist of any budgetary basis surplus at the close of the fiscal year, provided the balance in each fund's Budget Stabilization Reserve shall not exceed an amount equal to five percent of its appropriations for the prior fiscal year plus any additional amounts as may be authorized by the Vermont Legislature. Use of the reserve is limited to offsetting the respective fund's deficit at the close of a fiscal year. For fiscal year 2013, the State fully funded the Budget Stabilization Reserves for the General, Transportation and Education Funds to their respective statutory maximum levels. The balances at June 30, 2013 are as follows: \$10,808,938 in the Transportation Fund's Budget Stabilization Reserve; \$62,502,016 in the General Fund's Budget Stabilization Reserve; and \$29,260,126 in the Education Fund's Budget Stabilization Reserve.

The State has previously reported its General Fund Budget Stabilization Reserve as reserved for budget stabilization in the governmental funds. With the implementation of GASB Statement No. 54, "Fund Balance Reporting and Governmental Fund Type Definitions", the reserve does not meet the criteria to be classified as restricted or committed fund balance, and is reported as unassigned fund balance. This is a reporting change. There has been no change in the budget stabilization policy or the way in which the policy is being carried out. The Transportation Fund's Budget Stabilization Reserve and the Education Fund's Education Reserve are classified as committed for transportation and education, respectively.

C. Contingent and Limited Liabilities

1. Contingent Liabilities

Vermont Economic Development Authority:

In 1974, the General Assembly created the Vermont Industrial Development Authority, renamed it the Vermont Economic Development Authority (VEDA) in 1993; and transferred the functions and the responsibilities of the Vermont Industrial Building Authority, Industrial Park Authority, and the Aid Board to it. Each of these original entities was relegated to a particular segment of commercial development. VEDA was established as a body corporate and politic and a public instrumentality of the State. It is governed by a twelve member board which consists of the Secretary of the Agency of Commerce and Community Development, the State Treasurer, the Secretary of Agriculture, Food and Markets, and nine public members appointed by the Governor with the advice and consent of the Senate. The full faith and credit of the State is pledged to support the activities of VEDA.

VEDA has the power, under its two insurance programs (the Mortgage Insurance Program – MIP and the Financial Access program – FAP), to insure various types of loans.

Under the MIP, VEDA has the power to insure up to \$9 million of loans made by financial institutions for the purchase of land and construction of industrial building facilities in the State; to finance the purchase of machinery and equipment; and to provide working capital. The refinancing of existing loans is also possible under the act that created VEDA. As of June 30, 2013, the State's contingent liability for mortgage insurance contracts insured under its MIP is \$1,423,598.

VEDA is authorized to reimburse lenders participating in its other insurance program (FAP) for losses incurred on loans that the lenders register with VEDA. The full faith and credit of the State is pledged in an amount equal to the reserve premium payment deposited by the participating lenders for each registered loan, with the aggregate amount of credit that may be pledged not to exceed \$1 million at any one time. The State's contingent liability for the FAP at June 30, 2013 is \$512,037. The State has no recorded payable to VEDA in the Governmental Funds for fiscal 2013.

Federal Grants:

The State receives federal grants that are subject to audit and review by federal grantor agencies that could result in expenditures being disallowed under the terms of the grants. However, it is believed that required reimbursements resulting from such disallowances would not be material.

2. Limited Liabilities

Vermont Economic Development Authority:

The State has a limited liability for the VEDA. VEDA may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 219. Annually, VEDA must report to the State the amount necessary to bring the reserve balances up to the minimum required by statute. This sum so certified may be appropriated by the State. To date, it has not been necessary for the State to appropriate money to maintain the reserve and it is not anticipated that any appropriation will have to be made.

Vermont Municipal Bond Bank:

The State has a limited liability for the Vermont Municipal Bond Bank (Bank). The Bank is required to maintain debt service reserve funds. 24 V.S.A. Section 4675 requires the State to provide annual appropriations to restore the reserve funds to the required minimum balance, if necessary. It has never been necessary for the State to appropriate money to the reserve fund and it is not anticipated that it will need to make an appropriation in the future.

Vermont Housing Finance Agency:

The State has a limited liability for the Vermont Housing Finance Agency (Agency). The Agency may create one or more debt service reserve funds in accordance with 10 V.S.A. Section 632. Annually, the Agency must

report to the State the amount necessary to bring these reserve fund balances up to the minimum required by statute. This sum so certified may be appropriated by the State. It has not been necessary for the State to appropriate money to maintain the reserve fund and it is not anticipated that any appropriation will have to be made.

3. Contractual Liabilities

At June 30, 2013, the State of Vermont had long-term contracts outstanding of approximately \$383,184,329 funded from federal sources, and \$654,007,565 funded from all other funding sources. Contracts such as retainer contracts and contracts for commodities have not been included since the nature of these on-going contracts are tracked statewide to insure the best prices for supplies and some professional services. Following is a summary of contractual liabilities by agency, department or office at June 30, 2013.

Agency, Department, or Office	Total Contractual Obligation	Funded by Federal Sources	Funded by Other Sources
Agency of Administration	\$ 169,323,074	\$ -	\$ 169,323,074
Agency of Agriculture, Food & Markets	836,847	229,737	607,110
Agency of Commerce & Community Development	6,147,511	70,188	6,077,323
Agency of Human Services	249,230,241	108,830,462	140,399,779
Agency of Natural Resources	7,001,260	1,397,170	5,604,090
Agency of Transportation	421,918,937	256,498,114	165,420,823
Auditor of Account's Office	10,048,584	-	10,048,584
Center of Crime Victims Services	27,415	6,000	21,415
Criminal Justice Training Council	172,594	-	172,594
Agency of Education	4,828,329	3,588,613	1,239,716
Department of Labor	103,567	103,567	-

Enhanced 911 Board	6,445,287	-	6,445,287
Department of Financial Regulation	2,096,387	143,231	1,953,156
Fire Service Training Council	154,553	-	154,553
Green Mountain Care Board	719,293	-	719,293
Joint Fiscal Office	334,198	-	334,198
Judiciary	175,750	-	175,750
Military Department	8,324,411	7,746,064	578,347
Office of the Attorney General	489,497	35,721	453,776
Office of the Defender General	138,510	-	138,510
Public Service Board	1,381,162	-	1,381,162
Public Service Department	9,923,678	523,260	9,400,418
Secretary of State's Office	3,543,548	1,064,945	2,478,603
State Treasurer's Office	116,429,924	-	116,429,924
State's Attorneys and Sheriffs Office	90,000	-	90,000
Vermont Life Magazine	361,090	-	361,090
Vermont Lottery Commission	11,854,795	-	11,854,795
Total	\$ 1,037,191,894	\$ 383,184,329	\$ 654,007,565

The Agency of Transportation contracts are mainly infrastructure construction contracts of which 71% have end dates of June 30, 2014 or earlier. Of the Agency of Human Services contract liability balance, 30% is for contracts in the Department of Corrections, 45% is Department of Vermont Health Access, and 9% is Department of Mental Health. Of the contracts in the Agency of Administration, 47% have end dates during fiscal year 2014, and are primarily for human resource benefit administration services, information technology services, and capital construction. The State Treasurer's Office contracts are mostly investment management services for the retirement plans which consist of 95% of the total, with 34% having end dates during fiscal year 2014.

4. Grant Awards

The State of Vermont engages in many grant programs that benefit municipalities, non-profits, individuals and families statewide. During fiscal year 2013, the State awarded over 5,500 grants. The chart below shows the funding sources for these awards, the fiscal year 2013 payments issued to grantees on both these awards and prior year grant awards, and the remaining unexpended award amounts and June 30, 2013.

	Award		Award		Award	
	Balances at	Current	Award	Current Year	Balances at	Expended from
	June 30, 2012	Year Awards	Adjustments	Expended	June 30, 2013	Federal Funding Sources
General Government	\$ 166,036	\$ 99,365,601	\$ -	\$ (99,501,022)	\$ 30,615	\$ 472,575
Commerce & Community Dev.	17,209,797	32,498,746	(103,071)	(13,453,978)	36,151,494	9,448,999
Education	20,992,203	115,667,952	(7,814,563)	(115,914,086)	12,931,506	85,523,538
Human Services	49,619,653	200,816,443	(6,620,870)	(187,989,470)	55,825,756	68,172,239
Labor	2,405,802	1,823,365	-	(2,324,801)	1,904,366	227,768
Natural Resources	14,143,858	39,202,625	(2,474,558)	(36,749,457)	14,122,468	26,005,007
Protection to Persons and Property	16,785,493	40,577,809	(1,611,881)	(28,747,952)	27,003,469	12,925,389
Transportation	186,608,103	137,288,395	(19,394,402)	(131,890,091)	172,612,005	78,766,726
	<u>\$ 307,930,945</u>	<u>\$ 667,240,936</u>	<u>\$ (38,019,345)</u>	<u>\$ (616,570,857)</u>	<u>\$ 320,581,679</u>	<u>\$ 281,542,241</u>

The major grants awarded in 2013 are summarized below by agency or department.

Human Services: Public health grants are awarded for prevention of diseases, public awareness programs like tobacco cessation, alcohol & drug abuse programs, HIV prevention and family planning, vaccinations and inspection programs. There were 148 grants awarded.

During fiscal year 2013, programs under mental health for adults and children were awarded 129 grants. Programs managed under mental health are child care services including youth in transition, success beyond six, and children's upstream.

The Department of Children and Families awarded 365 grants. Programs included economic assistance and services for families, child development programs, and weatherization programs.

There were 151 grants awarded to the aged and independent living programs. The majority of the grants were for training, work based learning and supported education, abuse prevention, caregiver programs and grants for congregate and home delivered meals.

During FY 2013, the State paid \$59.6 million to Fletcher Allen Health Care for the Graduate Medical Education program (GME). The GME program helps ensure access to quality, essential professional health services for Medicaid beneficiaries through the care provided by teaching physicians and teaching hospitals. The University of Vermont contributed \$25.8 million to the State to support the GME programs; this support is listed as other revenue in the Global Commitment Fund.

Education: The Agency of Education awarded 57 grants to education and literacy programs that aim to help

adults gain essential skills, professional learning, and adult high school diplomas. There were 1006 grants awarded for school improvements which included sources from Federal Title I, IIA, and III grants. Other programs included technology advances, early education and readiness programs, and wellness food programs. Federal ARRA funded 18 grant awards totaling \$2,204,879.

Commerce and Community Development: The U.S. Department of Housing and Urban Development funded Vermont grant programs including the Community Development Block Grants, Home Investment Partnerships, Emergency Solutions Grants, and Housing Opportunities for Persons with AIDS. These programs work to provide decent housing, assure a suitable living environment, and expand economic opportunities for Vermonters. The Agency awarded 269 grants of which 29 grants were funded by HUD totaling \$26 million.

Natural Resources: The Agency awarded 693 grants which included 35 by the Department of Fish and Wildlife, 37 by the Department of Forest, Parks & Recreation, 621 by the Department of Environmental Conservation. Also included are loans to Municipalities for repair and improvement of water systems, pollution control systems, and storm-water projects. Federal ARRA grants funded 8 clean water loan programs.

Protection to Persons and Property: Public Safety grants are made up of safety programs like homeland security, motorcycle safety, bicycle safety, traffic safety, seatbelt safety and boating safety. The Department awarded 587 grants; the Homeland Security Grant Program received 243 of the number awarded.

The United States Department of Justice awarded the Vermont Crime Victims' Services 39 federal grants for crime victim assistance, and domestic and family violence services' programs.

The Agency of Agricultural, Food & Markets awarded 489 grants supporting programs that encourage growth of agriculture in Vermont while protecting the health of consumers and Vermont's environment.

Transportation: Transportation grants mainly consists of town highway projects like bridge replacement and rehabilitation, culvert repair and state aid to towns; state and FTA funded projects; FEMA emergency projects, state paving projects, enhancement projects and various roadway projects. In 2013, the Agency awarded 651 grants.

D. Litigation

The State, its agencies, officials and employees are defendants in numerous lawsuits involving funding for social welfare programs, civil rights actions, public education funding, breach of contract and negligence. The Attorney General is unable to predict the ultimate outcome of the majority of these suits, some of which seek recovery of monetary damages of unspecified amounts. However, based on information provided by the Attorney General, any ultimate liability to the State resulting from these lawsuits that is not covered by various insurance policies, would not materially affect the State's overall financial condition.

E. Joint Venture

The State of Vermont has entered into a Tri-State Lotto Compact with the States of New Hampshire and Maine for the purpose of operating a tri-state lottery. This lottery does not replace Vermont's individual lottery games but is run in addition to the existing games. The Compact provided for the creation of a Tri-State Lottery Commission (Commission) which is an interstate body, both corporate and politic, serving as a common agent for the party states and representing them both collectively and individually in the exercise of its powers and duties. The Commission is composed of one member from each of the party states. Each State's lottery appoints one of its members to this position. The three-member Commission annually elects a chairperson from among its members. The Commission is empowered to promulgate rules and regulations governing the establishment and to administer the operation of the Tri-State Lotto. Tri-State Lotto tickets are sold in each of the party states and processed in a central location as determined by the Commission. Fifty percent of the gross sales from each State are aggregated in a common prize pool, and operating costs are charged proportionally to each of the party states. The remaining revenues generated within each State remain in that particular State.

At June 30, 2013, the Commission had total assets of \$53,334,396, and total liabilities of \$42,181,736, representing decreases of \$15.4 million and \$13.0 million respectively, compared to June 30, 2012 figures. For the fiscal year ended June 30, 2013, the Commission had operating revenues of \$54,219,248, a decrease of \$7.1 million; interest income of \$66,977, an increase of \$24,329; commissions, fees, and bonus expenses of \$5,443,412, a decrease of \$673,174; prize awards of \$27,454,001 a decrease of \$3.4 million; and other operating expenses of \$4,228,653 an increase of \$73,576; all activity as compared to the fiscal year ended June 30, 2012.

During fiscal year 2013, the Commission made operating transfers to member states of \$17,160,159 versus \$20,220,782 during fiscal year 2012. This total included \$2,770,628 transferred to Vermont during the fiscal year, a decrease of \$440,177 as compared to fiscal year 2012.

Additional information regarding the Tri-State Lotto Commission may be obtained by contacting the Vermont Lottery Commission, 1311 US Route 302-Berlin, Suite 100, Barre, Vermont 05641.

F. Accounting Changes

In November, 2010, GASB issued Governmental Accounting Standards Board Statement No. 61, *Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34*. This statement modified certain requirements for inclusion of component units in the financial reporting entity. As a result of the implementation of this standard, Vermont Information Technology Leaders (VITL) no longer qualifies as a component unit of the State. The Governmental Activities net position and the Special Fund fund balance were restated as of June 30, 2012 to remove the amount related to VITL.

In March, 2012, GASB issued Governmental Accounting Standards Board Statement No. 65, *Items Previously Reported as Assets and Liabilities*. This statement establishes accounting and financial reporting standards that reclassify as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities; and recognizes as outflows of resources (expenses) or inflows of resources (revenues), certain items that were previously reported as assets and liabilities. The State implemented this new statement during the year ended June 30, 2013, resulting in a restatement of the Government-wide Statement of Net Position as of June 30, 2012, and the Governmental Funds Statements of Revenues, Expenses and Changes in Fund Balance for the year then ended.

The effects of these changes on the statements were as follows:

	Net Position as of June 30, 2012	Fund Balance as of June 30, 2012
As originally reported	\$ 1,644,826,476	\$ 88,811,334
Restatements		
Remove VITL as blended component unit	(477,663)	(477,663)
Reclassification of bond issuance costs	(3,888,979)	-
Restated amount	<u>\$ 1,640,459,834</u>	<u>\$ 88,333,671</u>

Two discretely presented component units also restated their net position as of June 30, 2012. The Vermont Housing Finance Agency restated their net position for changes that resulted from the implementation of GASB Statement No. 65. The Vermont Telecommunications Authority restated their net position as a result of the correction of a prior period error. The effects of these changes on the statements were as follows:

	<u>Vermont Housing Finance Agency</u>	<u>Vermont Telecommunications Authority</u>
As originally reported	\$ 86,669,000	\$ 5,355,624
Restatements		
Correction of prior period error	-	16,021
Reclassification of items previously reported as assets and liabilities	<u>(8,580,000)</u>	<u>-</u>
Restated amount	<u>\$ 78,089,000</u>	<u>\$ 5,371,645</u>

G. Subsequent Events

1. Debt Issuances

2013 Series A - Special Obligation Transportation Infrastructure Bonds

The State issued \$11,165,000 of 2013 Series A - Special Obligation Transportation Infrastructure Bonds, dated August 8, 2013. The interest rates on these bonds vary from 3% to 4.25%, and payment to the bondholders is scheduled to commence on June 15, 2014, and terminate on June 15, 2033.

These bonds are not general obligations of the State, and are not secured by the full faith and credit of the State but are payable only from Pledged Funds held in Trust by the Peoples United Bank (Trustee) in accordance with the terms of a Trust Agreement between the State and Peoples United Bank dated July 1, 2010, as amended and supplemented, and a Second Supplemental Agreement dated August 1, 2012. Funding sources for the Pledged Funds are funds to be received from Motor Fuel Infrastructure Assessments as authorized by Act 50 of the 2009 legislative session.

The proceeds from this issue are expected to be expended for transportation infrastructure purposes, namely the rehabilitation or replacement of ten State bridges and four town highway bridges, reconstruction of two roadways, and rehabilitation and reconstruction of two interstate bridges.

2013 Series A (Vermont Citizens Bonds) – General Obligation Bonds and 2013 Series B – General Obligation Bonds

The State issued \$25,000,000 of 2013 Series A - General Obligation Bonds, dated November 14, 2013. The bonds are general obligations of the State of Vermont, and the full faith and credit of the State are pledged to the payment of principle and interest on these bonds. The interest rates on these bonds vary from 2% to 5%, and payment to bondholders is scheduled to commence on August 15, 2014, and terminate on August 15, 2028.

The State issued \$42,810,000 of 2013 Series B - General Obligation Bonds, dated November 14, 2013. The bonds are general obligations of the State of Vermont, and the full faith and credit of the State are pledged to the payment of principle and interest on these bonds. The interest rates on these bonds vary from 2% to 5%, and payment to bondholders is scheduled to commence on August 15, 2014, and terminate on August 15, 2033.

The issuance of these bonds is authorized by capital acts from legislative sessions: Act 40 (2011), Act 104 (2012), and Act 51 (2013). The proceeds are to be used for various purposes including capital projects, major maintenance at the State buildings, Vermont State Colleges, Vermont school construction, cellular and

broadband telecommunications improvements, various projects in the areas of human services, natural resources, public safety, agriculture, various grant purposes, and other projects.

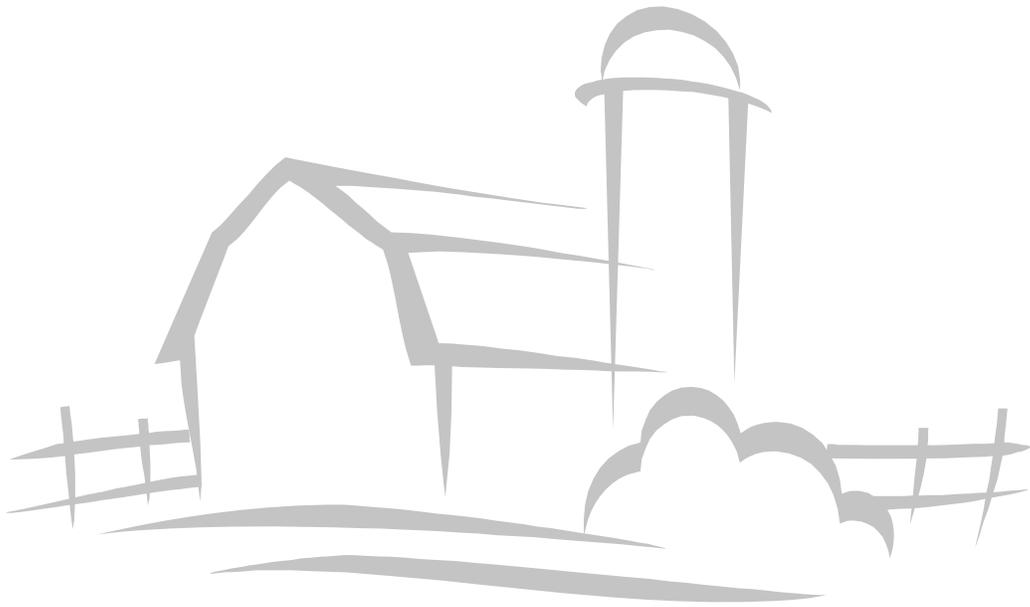

2013 Series C—General Obligation Refunding Bonds

The State issued \$18,935,000 of 2013 Series C—General Obligation Refunding Bonds, dated November 14, 2013, for the purpose of advance refunding of \$15,380,000 outstanding principle of the 2004 Series A - General Obligation Bonds and \$4,100,000 outstanding principle of the 2005 Series A - General Obligation Bonds. Interest rates on the bonds range from 3% to 5%, and payments to bondholders are scheduled to commence on August 15, 2014, and terminate on August 15, 2024. As a result of the bond refunding transaction, the State reduces its total debt service payments over the next 11 years by \$1,361,719, and achieves an economic gain of \$984,458.

2. FEMA Grant Award

On September 18, 2013, the Federal Emergency Management Agency announced the award of \$33,054,028 in disaster funding for payment for rebuilding portions of the Waterbury State Office complex damaged by Tropical Storm Irene.

Note to the Required Supplementary Information—Budgetary Reporting (unaudited)

Budgetary Comparison Schedules

The budgetary schedules provide a comparison of the original and final adopted budget with actual data on a budgetary basis for the Governmental Funds. The State compiles a separate legal basis budgetary report, which shows the legal compliance with the budget. Budgetary comparison schedules showing legal level detail may be obtained by contacting the State of Vermont, Department of Finance and Management, 109 State Street, 5th Floor, Pavilion Building, Montpelier, Vermont 05609-0401

Budgetary Process

Vermont statutes require the head of every State department, board, and commission and any officer or individual responsible for any activity for which funds are appropriated by the Vermont Legislature to provide, on or before September 1 preceding any biennium, statements to the Commissioner of Finance and Management showing in detail the amounts appropriated and expended for both the current and preceding fiscal years and the amount estimated to be necessary for similar activity for the ensuing two fiscal years. The Commissioner of Finance and Management and the Secretary of Administration are then required to submit to the Governor by November 15 preceding each biennium, the estimates as received along with any other estimates for the ensuing two fiscal years. The Governor then submits to the Vermont Legislature, no later than the third Tuesday of every annual session, a budget that embodies estimates, requests, and recommendations for appropriations or other authorizations for expenditures from the State treasury for at least the succeeding fiscal year. The Vermont Legislature then enacts into law an appropriations act that must be approved by the Governor before expenditures can be made. In recent years in accordance with Act 250 of 1979 Section 125, it has been the practice of the Governor to submit an annual budget and the Vermont Legislature to enact appropriations on an annual basis.

Budgets are prepared and appropriated on a cash basis and usually at the program level. The Governor may amend appropriations or transfer appropriations within limits established by 32 V.S.A. Chapter 9. The Agency of Administration maintains budgetary control by fund at the appropriation level. Governmental funds' unspent appropriation balances revert to the fund balance at the end of each fiscal year for re-appropriation unless authorized to be carried forward to the following year(s) by legislative act. Unexpended balances of capital projects funds are available for expenditure in the following fiscal year(s).

Budgetary Funds

Vermont's annual Appropriation Act, the State's legally adopted budget, does not present budgets using the same fund structure as what is used for reporting in accordance with accounting principles generally accepted in the United States of America (GAAP). The GAAP basis Special Fund is represented in the Appropriation Act as program-level budgets for the Special, State Health Care Resources, and Tobacco Trust Funds. These funds are presented separately in the accompanying schedules. The budgetary basis American Recovery and Reinvestment Act Fund includes certain portions of the GAAP basis Transportation and Federal Revenue Funds. These funds are presented on a budgetary basis in the accompanying schedules.

Revenue Estimates

By July 31 each year, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues in the General, Transportation, Education, State Health Care Resources, and Global Commitment Funds. The Emergency Board then has 10 days to determine the original revenue estimates for the fiscal year. For the Special, Federal Revenue, and American Recovery and Reinvestment Act Funds, the original budget for revenues is based on the amount appropriated for expenditures. By January 15, the Joint Fiscal Office and the Secretary of Administration provide to the Emergency Board their respective estimates of State revenues and the Emergency Board determines any revision to the July revenue estimates.

Expenditure and Transfer Budgets

The original budgets for expenditures and transfers are determined by the Legislature through the passage of the annual Appropriation Act. The Commissioner of Finance and Management (with approval from the Governor) may transfer balances of appropriations not to exceed \$50,000 made under any appropriation act for the support of the government from one component of an agency, department, or other unit of State government, to any component of the same agency, department, or unit; and may transfer balances of

appropriations made under any appropriation act from one department or unit of the agency of transportation to another department or unit of the agency of transportation for the specific purpose of funding authorized transportation projects which have been approved by the federal government for advance construction in which the expenditure of State funds will be reimbursed by federal funds when the federal funds become available, and the transfer is limited to funds which have been approved for reimbursement. If any receipts including federal receipts exceed the appropriated amounts, the receipts may be allocated and expended, subject to the approval of the Secretary of Administration. If, however, the expenditure of those receipts will establish or increase the scope of the program, which establishment or increase will at any time commit the State to the expenditure of State funds, they may be expended only upon the approval of the Legislature.

Budget and GAAP Basis Reporting

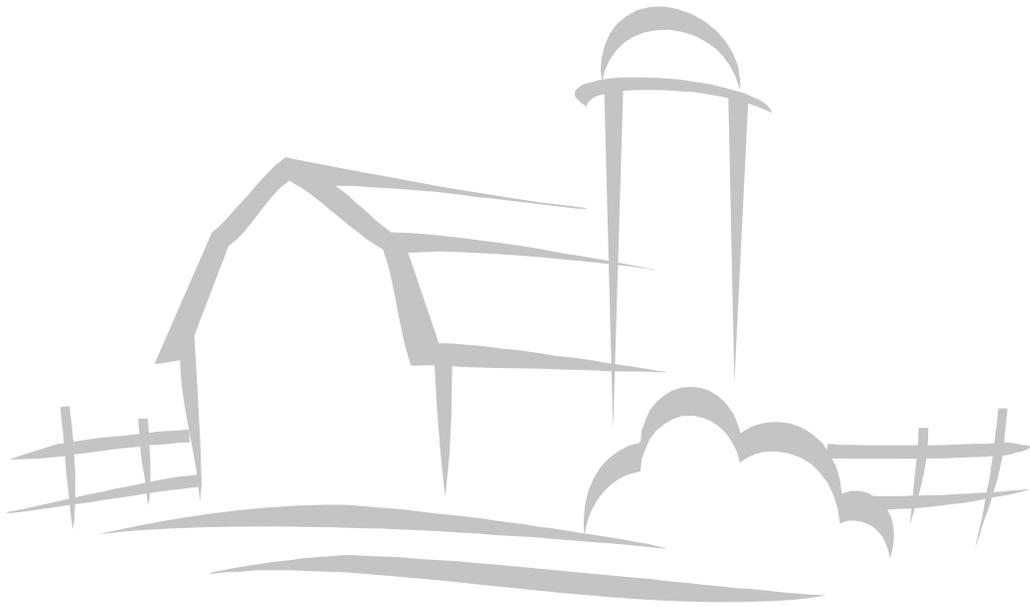

The accompanying budgetary comparison schedules report the actual revenues, expenditures and other financing sources (uses) on a budget basis, which differs significantly from GAAP. These different accounting principles result in basis, perspective, and entity differences in the fund balance—budgetary basis. *Basis differences* arise because the basis of budgeting (cash basis) differs from the GAAP basis used to prepare the statement of revenues, expenditures, and changes in fund balances—governmental funds. *Perspective differences* result because the Appropriation Act’s program-oriented structure differs from the fund structure required for GAAP. *Entity differences* arise because certain activity reported within the State’s financial reporting entity for GAAP purposes is excluded from the Appropriation Act. The following presents a reconciliation of the budgetary basis and GAAP basis fund balances for the funds reported in the accompanying schedules for the fiscal year ended June 30, 2013:

	General Fund	Transportation Fund	Education Fund	Federal Revenue Fund	Global Commitment Fund	ARRA Fund
Fund Balance - Budgetary Basis.....	\$ 131,089,960	\$ 5,905,295	\$ 66,214,586	\$ 48,746,152	\$ 86,542,105	\$ (7,465,929)

THIS PAGE INTENTIONALLY LEFT BLANK

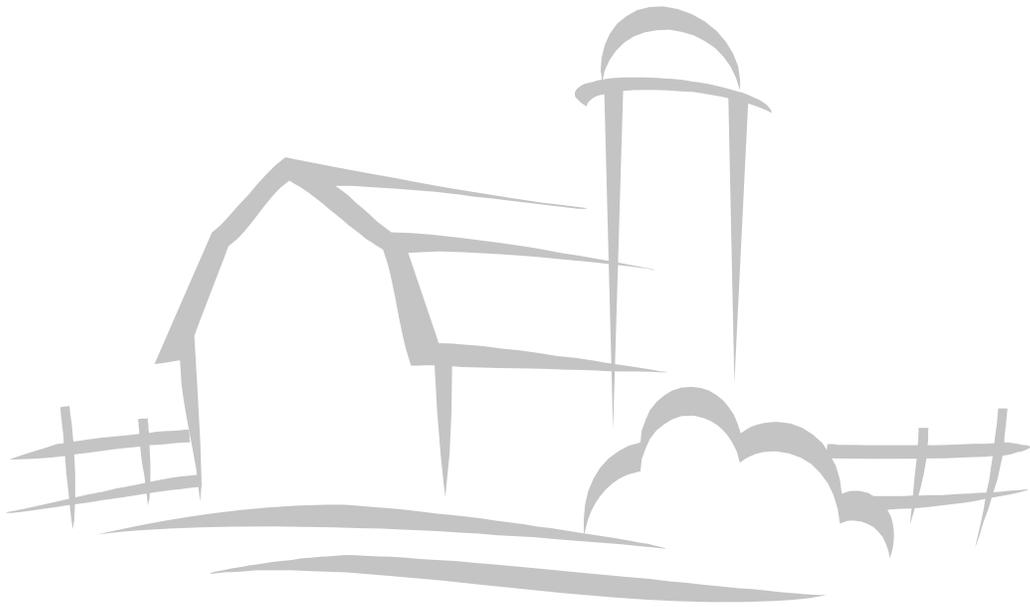

Vermont

Highway Garage Fund – This fund accounts for the maintenance and rental of equipment to the Agency of Transportation for use in construction, maintenance and operation of the State’s transportation infrastructure.

Offender Work Programs – This fund accounts for the activities of the print shop, sign shop and furniture shop run by the Department of Corrections.

Single Audit Revolving Fund – The purpose of this fund is to account for the costs attributable to the Auditor of Accounts Office’s performance of the annual Single Audit .

Financial & HR Information Fund – The activities of this fund account for the costs of the support of the State’s financial and human capital management ERP systems.

Communications & Information Technology Fund – This fund accounts for the activities of the Department of Information and Innovation’s communications and information technology services.

Fleet Fund – This fund accounts for the Department of Buildings and General Services’ vehicle management activities including the daily and long-term leasing of vehicles for employees use in travel on State business.

E-Procurement Fund - The purpose of the Purchasing Card Program is to establish a more efficient, cost-effective method of purchasing and paying for small dollar transactions and high-volume, repetitive purchases.

Copy Center Fund – This fund’s activities include the Department of Buildings and General Services Print Shop and copier leasing services.

Postage Fund – This fund accounts for the mail services for the Montpelier and Waterbury state complexes including mail collection and delivery, sorting, and applying postage.

Facilities Operations Fund – This fund’s purpose is to provide operating expenses, maintenance, renovations and acquisitions of buildings, grounds and support facilities.

Property Management Fund – This fund’s purpose is to provide State Agencies with safe, comfortable, and efficient space through leasing; purchasing; and planning which enables them to carry out their mission.

Equipment Revolving Fund – This fund is used as an internal lease purchase mechanism of equipment for State agencies and departments.

State Resource Management Fund – This fund accounts for the costs of energy resource conservation measures implemented by departments anticipated to generate a life cycle cost benefit to the state.

State Surplus Property Fund – This fund accounts for the sale of all items that are no longer needed by the State’s agencies and departments.

State Liability Insurance Fund – This fund provides liability insurance coverage for the actions performed by the State’s employees in the course of performing their assigned duties.

Risk Management-All Other Fund – This fund is used to purchase insurance protection for state property and other miscellaneous risks that are specific to certain departments or types of employees, such as judicial liability, liability related to maintenance of railroad tracks, and required bonds for certain state officials.

Workers’ Compensation Fund – This fund provides workers’ compensation coverage for all state employees.

Medical Insurance Fund – This fund provides health coverage for current state employees, retirees, legislators and other groups eligible to participate.

Dental Insurance Fund – This fund provides dental coverage for current state employees, legislators and other groups eligible to participate.

Life Insurance Fund – This fund provides a life insurance policy for current state employees, retirees and other groups eligible to participate.

Long-term Disability Fund – This fund provides an income replacement benefit for state employees that are not eligible to be represented by the employees’ union should they have a long term or permanent disability.

Employees’ Assistance Fund – This fund provides a program that assists state employees and members of their immediate household assistance in addressing problems that impact their lives.

Human Resource Services Fund - This fund provides centralized human resources management services for agencies and departments of the State.

STATISTICAL SECTION CONTENTS
JUNE 30, 2013

The Statistical Section of the Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures, and required supplementary information indicates about the State of Vermont's overall financial health. Below is a summary of the components and purpose of the tables provided in this section.

Financial Trends – Tables 1 through 4

These schedules contain trend information extracted from the State's financial statements, to help the reader understand how the State's financial performance and financial position have changed over time.

Revenue Capacity – Tables 5 through 7

These schedules contain information to help the reader assess the State's most significant revenue source – the personal income tax.

Debt Capacity – Tables 8 and 9

These schedules present information to help the reader assess the affordability of the State's current levels of outstanding debt, the State's ability to issue additional debt in the future, and related historical trend data.

Demographic and Economic Information – Tables 10 and 11

These schedules contain demographic and economic indicators to help the reader understand the environment within which the State's financial activities take place.

Operating Indicators – Tables 12 through 14

These schedules contain service levels and capital asset data to help the reader understand how the information in the State's financial report relates to the services the State provides to its citizens and visitors.

This information is unaudited.

Total All Other Governmental Funds.....	\$ 775,113	\$ 688,720	\$ 654,757	\$ 328,735

In 2011 the State implemented GASB Statement No. 54. Under GASB Statement No. 54, fund balances are classified as Nonspendable, Reserved, Committed, Assigned or Unassigned. Prior to GASB 54, fund balances were classified as Reserved or Unreserved. Amounts for fiscal years 2010 and earlier have not been restated to reclassify these balances.

(1) Data for 2013 are projected annual estimates based on information through 2013 second quarter. The estimates for 2011 and forward are based on the 2012 North American Industry Classification System ("NAICS"). Prior years are based on the 2002 NAICS.

(2) Includes non-earned income, such as interest and dividends, rental income, and government transfers to individuals.

(3) Total direct tax rate is not available. Average effective tax rate equals personal income tax collections (see Statistical Section Table 6) divided by total personal income. Source of collections data: Vermont Department of Taxes

Source: U.S. Department of Commerce, Bureau of Economic Analysis

¹ New department formed from consolidating GOVNet program (previously in Administration) and Communication & Information Technology program (previously in Buildings and General Services).

² In 2005 the Agency of Human Services reorganized with some department consolidations and other new departments established. Also in 2005, the Vermont Fire Service Training Council and portions of the Department of Labor and Industry were merged into the Department of Public Safety.

³ In 2006 portions of the Department of Labor and Industry merged with the Department of Employment and Training and the new consolidated department was named the Department of Labor.

⁴ Executive Order No. 01-10 consolidated human resource services statewide by transferring certain human resource positions within state government to the Department of Human Resources. The effective date of this consolidation was July 1, 2010.

⁵ In 2012 Act 64 of 2011 Session established the Enhanced 911 Board as an independent entity. Act 48 of the 2011 Session established the Green Mountain Care Board as an independent entity.

⁶ The reduction in employees in 2012 is the result of the Vermont State Hospital in Waterbury being forced to close due to Tropical Storm Irene.

⁷ In 2013 FTE's employees by function/program were provided by the Department of Human Resources.
