Cancel an Approved Travel Authorization

**Navigator Menu navigation:** Travel and Expenses > Manage Accounting > Expense Rpt Budget Exceptions

The Expense Report Exceptions search page displays:

1. **Report ID** - Enter the ID for the expense report in budget check error.
2. **Click** Search

The Expense Sheet Exceptions page displays. The Exception column describes why the expense report has a Budget Status of ‘Error in Budget Check’:

Common exceptions include: ‘No Budget Exists’ or ‘Exceeds Budget Tolerance’. For this expense report, the exception is ‘No Budget Exists’. This exception can relate to a few scenarios:

There was no budget journal entered for the Business Unit, Account, Fund and Dept combination used on the expense report or the accounting details are missing a required field. The latter scenario should rarely occur since combination edits requires a Fund and Dept on all expense transactions.

3. **Click on the Line Exceptions tab**
The **Line Exceptions** page displays the expense report line number and distribution line number in error along with the GL Business Unit on the distribution line:

4. Click the **Line ChartFields** tab

The ChartFields for the distribution line in error display. Review the ChartField information. Verify the required Account, Fund and Dept ChartFields are defined. In this scenario the Dept is incorrect for the GL Business Unit and a budget was not defined for the GL Business Unit, Account, Fund and Dept combination.

At this point the expense report should be sent back for revision. The employee will need to modify the expense report and enter a correct ChartField combination.
